PREFACE

It is a matter of great pleasure for me that the Rajasthan Puratana Granthamala publishes herewith as its No. 37 Svayambhū's important manual of Prakrit and Apabhraṃśa metres, called *Svayambhūcchandās*. Systematic accounts of Sanskrit and Prakrit-Apabhraṃśa prosodies reached their culmination in Hemacandra's *Chandonuśāsana*. The *Svayambhūcchandās* was one of the basic sources of the latter. Hemacandra's arrangement, classification and illustrations of metres owe much to Svayambhū.

But the importance of the present work is not confined merely to the fact that it was a two hundred and fifty years senior ancestor of the famous *Chandonuśāsana*. The *Svayambhūcchandās* is unique in several other ways too. Firstly, Svayambhū himself was a Kavirāja—a front rank poet with several voluminous epics of acknowledged merit to his credit. The literary worth of one published work of Svayambhū viz, *Paumacariu* (edited by my beloved pupil and learned colleague, Dr. H. C. Bhayani, a profound scholar of Apabhraṃśa and allied literature and published by me in 1953 and 1960 in three volumes in the Singhi Jain Series) is ample enough to establish it as a high water mark of Apabhraṃśa poetry. Svayambhū's account of metres, therefore, bears that stamp of authority of a practising artist, which the work of a mere theoretician would lack. And some of the illustrations in the *Svayambhūcchandās* are in fact taken from the *Paumacariu* (vide Appendix III, pp. 241-242 of the present volume.) Secondly, unlike Hemacandra who has composed his own illustrations, Svayambhū has drawn upon more than eighty earlier (or contemporary) Prakrit and Apabhraṃśa authors to illustrate his metrical definitions. This fact by itself is enough to make the *Svayambhūcchandās* highly authoritative.

Incidentally, however, so many citations of greatly varying form and content from divergent sources give us for the first time (if we exclude the stray lyric anthologies, with their near-worthless ascriptions) names of a host of authors who, over centuries preceding

Svayambhū, were responsible for cultivating an abundant and rich literature in Prakrit and Apabhraṃśa. Though about most of these names we know nothing more, they are strong evidence of a respectable and vigorous literary tradition. This is again more than confirmed by the aesthetic appeal and freshness that invest many of the cited verses. It is again from the *Svayambhūcchandas*, that we get a clearer picture of the form and structure of Sandhibandha and Rāsābandha, the two most characteristic *genres* of Apabhraṃśa literature. Several obscure points too in Hemacandra's work are clarified and some welcome light is shed on the function of several classes of mātrā-metres. Such points of importance of the Svayambhūcchandas can be easily multiplied.

The credit of rescuing so valuable a work from oblivion goes entirely to my learned friend Prof. H. D. Velankar, whose researches in the field of classical Indian metres are too important and well-known to need any mention here. His earlier edition of the *Svayambhūcchandas* was based on a single and then only known manuscript from Baroda, which was moreover fragmentary. The printing of the same text revised for the Rajasthan Puratan Granthamala was nearing completion when fortunately, he received quite unexpectedly a palm leaf fragment of another manuscript of the *Svayambhūcchandas* which, along with numerous Buddhist manuscripts was discovered in a Tibetan monastery by the great savant and my friend Pandit Rahula Sankrityayana, and which to a large extent supplied the missing portion of the *Svayambhūcchandas*. The find-spot of this new Ms. fragment and its Old Bengali script are quite significant for the spread and authority of Svayambhū's work. Though the two fragmentary Mss. between themselves cover a major portion of the original text, there still remain several serious lacunas.

Prof. Velankar has, as is his wont, spared no pains to increase the usefulness of the edition. The critical introduction, translations and informative and comparative notes, besides several indices and appendices readily reveal his acumen, thoroughness and erudition. Moreover, he has also included in the present edition Rājasekhara's *Chandaḥsekhara*, an eleventh century Sanskrit version of the *Svayambhūcchandas*, only a fragment of which comprising the fifth

chapter is preserved to us. Someday we may hope to discover the missing portions of the prosodic works of Svayambhū and Rājasekhara.

I am very happy to say that we have arranged to bring out further in this series two other equally important works of classical Indian prosody, viz. the *Vṛttajāṭisamuccaya* of Virahāṅka and the *Kavīdarpaṇa*, both edited by Prof. Velankar. His co-operation is always readily forthcoming, one happy result of which was his standard and scholarly edition of Hemacandra's *Chandonusāsana* which I was glad to include in the Singhi Jaina Series and publish in 1961.

In conclusion, it is earnestly hoped that for the lovers of Prakrit and Apabhraṃsa literatures, the publication of the present work will serve to enhance the enjoyment, as Svayambhū declares, 'of the charm and elegance' of the polished and sophisticated muse of Svayambhū and his worthy poetic predecessors and successors.

The Rajasthan Oriental Research Institute, JODHPUR

AIMS AND OBJECTS

1. To explore and bring to light the ancient literature of Rajasthan and adjacent area as available in Samskrit, Prakrit, Apabhramsa, Rajasthani - Gujarati Vraj, Hindi and other regional languages.
 2. To collect, preserve, compile and carry out survey of original source-materials of the ancient History and Culture of Rajasthan i.e. Architecture, Paintings, Arts, Inscriptions, Copper-plates, Coins, Documents etc.
 3. To collect old manuscripts and to prepare their pen-copies, microfilmed and photostat copies and sound records etc.
 4. To organise a well equipped reference library of books useful and indispensable for research work in the field of Indology.
 5. To investigate, record, interpret and present clearly :
 - (i) the varied folk-literature throwing light on public-life in Rajasthan.
 - (ii) devotional and canonical literature embodied in the lyrics of various religious sects.
 - (iii) all sorts of material related to the social, cultural, religious customs and secular practices.
-

TABLE OF CONTENTS

Preface by the General Editor

Abbreviations

p. ii

Introduction : (Figures within the brackets refer to Paragraphs).

Introductory (1-3); the Baroda manuscript of the Svayambhūcchandas (4); the Palm-leaf manuscript from Tibet (5); the five Amśas or Mātrā Gaṇas (6); Gāthā derived from Skandhaka (7); origin of Gāthā (8); contents of the Palm-leaf manuscript : Gīti, Galitaka, Khañjaka, Śīrṣaka (9); Māgadha Jāti, where the Vaitāliya group is derived from the Māgadhikā (10); Contents of the Baroda manuscript : Varna Vṛttas and their peculiarities (11-12); Ardhasama Vṛttas (13); Viṣama Vṛttas (14); shorter and longer Catuspadis are respectively called Vastuka and Dhruvaka by Svayambhū (15); Rājasekhara follows Svayambhū in this distinction, while Hemacandra does not (16); Phonetic peculiarities of Apabhramśa prosody noticed by Svayambhū (17); Utsāha, Dohā, Mātrā and Vadana with their varieties; terms of general signification like Dhavala, and Maṛgala employed by Svayambhū (18); Rāsābandha and Sandhibandha Kāvyaś in Apabhramśa (19-20); illustrations in Svayambhū (21-22); his directions about the inter-relation between the Varna Vṛttas of different length and their origination from one another (23); the underlying principle which helped in the growth of new metres from the old (24); Svayambhū was conscious of this, but has not clearly enunciated it nor followed it up systematically (25); Chandaśekhara of Rājasekhara : Contents of the available chapter (26); Svayambhū and Rājasekhara (27); manuscript of Chandaśekhara (28); Rājasekhara : his date and account (29); conclusion (30).

- H. Hemacandra's *Chandonuśāsana* as published in the *Jayadāman* pp. 94-113, mentioned below.
- HPk. Hemacandra's *Prākṛit Chandonuśāsana*, i. e., chs. IV to VII of the work mentioned under H. above, edited with *Svopajña Tikā* and *Tippaṇa* at Journal BBRAS., 1943 and 1944.
- Jayadāman : A Collection of four ancient texts on Sanskrit Prosody, namely, *Jayadevacchandas* of Jayadeva, *Chandonuśāsana* of Jayakīrti, *Vṛttaratnākara* of Kedāra and *Chandonuśāsana* of Hemacandra, published by the Haritoṣa Samiti (c/o the Sanskrit Department, Wilson College, Bombay 7), Bombay 1949.
- Jd. *Jayadevacchandas* as published in the *Jayadāman*, pp. 1-40; see above under *Jayadāman*.
- Jk. Jayakīrti's *Chandonuśāsana*, as published in the *Jayadāman*, pp. 41-70; see above.
- Jns. *Jānāśrayī Chandoviciti* as published by the Curator, University mss. Library, Trivandrum, 1949.
- Kd. *Kavidarpaṇa*, with a commentary, as published in the *Rajasthan Puratana Granthamala*, with an introduction, notes etc. by H. D. Velankar: Jaipur, 1962.
- N. Nanditādhya's *Gāthālakṣaṇa*, published as Appendix I in the edition of the *Kavidarpaṇa* mentioned above under Kd.
- P. Piṅgala's *Chandassūtra*, published by the Nirṇaya Sagar Press, Bombay, 1938 (3rd ed).
- R. Rājaśekhara's *Chandaḥśekhara*, published on pp. 129-139 in the present edition of the *Svayambhūcchandas*.
- P.C. *Paumacariu* of Svayambhū edited with introduction, notes etc. by Dr. H. C. Bhayani in the *Singhi Jain Granthamala*, Bombay, 1953.
- Sb. *Svayambhūcchandas* chs. 1 to 8 as published in the present edition.
- SbP. or SbPb. *Svayambhūcchandas Pūrvabhāga* as published on pp. 103 to 127 in the present edition.
- Vjs. *Vṛttajātisamuccaya* of Virahāṅka, with the commentary of Gopala edited with Introduction, Notes etc., by H. D. Velankar and published by the Rajasthan Puratattva Mandir, Jaipur, 1962.
- Vr. *Vṛttaratnākara* of Kedāra, as published in the *Jaydāman*, pp. 71-93, mentioned above.

INTRODUCTION

INTRODUCTION

1. In 1935 I had published the then available portion of the *Svayambhūchandas* from a paper ms. from the Oriental Institute of Baroda, in the Journal of the Bombay Asiatic Society. I am now re-editing the same along with portions of the earlier part of the work which were supplied by a palm-leaf ms., so kindly given me by Pandit Rahula Sankrtyayana, who secured it from one of the monasteries in Tibet. I got this second ms. at almost the last stage of printing the text and so I had to print it at the end, on pp. 103-127. I have, however, compared this new ms. with the old one and on page 127 I have recorded the variant readings from it in the portions of *Sb.* chs. 1-4 and 8 which alone are available in it. In giving the Notes, however, I have begun with the earlier portion of the work which was missing in the Baroda ms. Even though this new ms. is only a fragment, it is yet possible to get a proper outline of the nature and extent of the work as a whole with its help. This ms. also contains the concluding part of the work, which is not found in the Baroda ms. and I have incorporated it in the printed text as I got it in time for the press.

2. After the first publication of the *Svayambhūchandas*, Pandit Nathuram Premi, a reputed Jain scholar, published his work on the History of Jainism and its literature in Hindi, in 1942. This book of his contains learned articles on several Jain authors who wrote in Sanskrit, Prākṛit or Apabhraṃśa languages. Among these there is one on Mahākavi Svayambhū (pp. 370-387). Here Premi has proved that the author of the *Svayambhūchandas* had also composed two other works both in Apabhraṃśa, one called *Paumacariu* on the story of the Jain Rāmāyana and the other called *Ritṭhanemicariu* on that of the Jain Harivaṃśa. The latter is more generally known as *Harivaṃśa Purāṇa*. There is also a third work called *Pañcamīcariu* which too is ascribed to Svayambhū by his son Tribhuvana; but its mss. are not yet available. Of these three works of Svayambhū, one, namely, *Paumacariu*, is now carefully and critically edited by Dr. H. C. Bhayani, my colleague at the Bharatiya Vidya Bhavan, and published in the Singhi Jain Granthamala, Bombay, 1953. In the Introduction to this edition Dr. Bhayani has very thoroughly examined the question of the date and authorship of Svayambhū on the basis of all the available material at that time. I am particularly happy to say that his brilliant guess¹ about the contents of the earlier part of the *Svayambhū-*

1. Compare P. C. Introduction, pp. 20-27, p. 27 in particular.

chandās which was missing in the Baroda mss. has proved to be correct by the discovery of the palm leaf mss. of that work mentioned above.

3. As shown by Premi² and Bhayani³ Svayambhū is respectfully mentioned by Puṣpadanta in his Mahāpurāṇa and so must have lived before the latter half of the 10th century A.D. He probably belonged to the same part of the country in which Puṣpadanta lived. Bhayani also maintains⁴ that Dhanapāla, author of the *Bhavisayatta-Kahā*, has probably been influenced by Svayambhū's *Paumacariu*. Rājasekhara's *Chandaḥśekhara*, of which only the 5th chapter is at present available,⁵ also appears in many parts to be a close Sanskrit rendering of the corresponding portions from the *Svayambhūchandās*. Similarly, many of Hemacandra's illustrations of the Sanskrit metres given in his *Chandonuśāsana* appear to be closely modelled⁶ on those of Svayambhū, who has given them in Prākṛit.

4. The present edition is mainly based upon the paper ms. in the Oriental Institute, Baroda. This ms. is incomplete towards the beginning and consists of foll. 23-63 only. It is dated Samvat 1927 Aśvin Śuddha Pañcamī, Thursday and was copied by one Krishna Deva at Ramnagar. Fol. 33b is blank, but no matter is dropped. The handwriting is clear and in Devanāgarī characters. It is generally correctly copied out and contains brief explanations in Sanskrit, or more usually only a Sanskrit rendering of a few words written either in the margin or just above the word which is sought to be explained. I have given all these in the footnotes under the text. It would appear that the present ms. is only a copy of another, which was used by a careful student or reader, who had added these brief Sanskrit ṭippanīs. The copyist is generally careful in reproducing, but his oversight and ignorance are sometimes disclosed and show that he did not always understand the meaning of what he copied. He always writes both *ba* and *va* as *va*, whether as a single letter or in a conjunct and employs the Vargānunāsika almost always in the case of *n* and *ñ*, sometimes in that of *ṇ*, but rarely if at all in the case of *ṅ* and *m*. A more characteristic feature of his writing, however, is a recurring exchange of the letters *ra* and *va*; sometimes *pa* is read for *e* and vice versa. I have corrected these mistakes where they were obvious and have regularly employed an Anusvāra for all the Varga-Anunāsikas. Omissions of

2. *Jaina Sāhitya aur Itihāsa* (in Hindi), pp. 386-387.

3. P. C. Introduction, pp. 7-9; 31-36.

4. P. C. Introduction, pp. 36-37.

5. It was first published at *Journal BBRAS.*, 1946 and is again published in the present edition of the *Svayambhūchandās*, on pp. 129-139.

6. See P. C. Introduction, pp. 37-41.

letters are corrected by writing them immediately above the line or in the margin, by our scribe. In the Apabhramśa section, letters which are intended to be pronounced short for metre are sometimes shown by an Ardhaçandra mark above them by him and this is true also of the nasalised *i* or *hi* in the Prākṛit section, though such short letters are hardly used in the definitions and illustrations of the Varna Vṛttas.

5. The second ms. or rather the fragment of it, mentioned above, is written in old Bengali characters on small palm leaves, which appear to have been numbered, but it is difficult to decipher them. Its size is $9\frac{1}{2} \times 2$ inches ; it has 16 folios in all. It is without a beginning, but has the concluding portion of the work which ends on the last but one folio and neither of these is numbered. This obviously last folio contains some other matter, not connected with prosody, only on the obverse side, the reverse side being blank. There are on an average 6 lines in a page and each line contains about 45 letters. Fortunately in the first 12 folios we have portions of the earlier part of the work which is wanting in the Baroda ms. and these are sufficient to give us a rough idea of the complete picture of the *Svayambhūchandas* as regards its contents. It thus seems to contain 13 chapters in all, of which the first eight are devoted to the Prākṛit metres and the last five to the Apabhramśa metres. These chapters which are marked by a recurring stanza⁷ occurring at the end, have been generally given different titles signifying their contents. The author, however, nowhere mentions the number of a particular chapter or their total number in his work; this has to be guessed from the recurring stanza that refers to the subject matter discussed in the stanzas preceding it. This recurring stanza briefly describes the work as 'one which has five Amśas (namely, those that contain 2, 3, 4, 5 and 6 Mātrās in them) as its essential feature, which contains ample matter, and which is clear (for comprehension) owing to the definition as well as the illustration being given together in the same stanza or line'.

6. Svayambhū does not give any technical names to the five Amśas like Virahāṅka, but alludes to them by such terms as *da* or *daāra* for a Dvimātra, *ta*, *taāra*, *taṁsa* or *tagaṇa* for a Trimātra, *ca*, *caāra*, *caṁsa* or *cagaṇa* for a Caturmātra, *pa*, *paāra*, *paṁsa* or *pagana* for a Pañcamātra and *cha*, *chaāra*, *chaṁsa* or *chagaṇa* for a Ṣaṣṭmātra. At SbP. 1. 2 Svayambhū has primarily prescribed the first letters of the words (in Prākṛit) for the five Mātrā Gaṇas, namely, the Dukala, Tikala, Caukala, Pañcakala and Chakkala, thus *da*, *ta*, *ca*, *pa* and *cha* respectively (the first two for

७ पंचसंसारहृष्ट बहुलतये लक्षलक्षखणविरुद्धे । एतत् सव्यमुच्छंदे....

the sake of uniformity, in place of *du* and *ti*), as the names or symbols for expressing them while defining the constitution of the metres with their help. The other names are only those that are obtained by the addition of the affixes *kāra*, *aṁśa* or *gaṇa* to them as seen above. Hemacandra has closely followed Svayambhū in this respect, but has *ṣa* in place of *cha* to represent a Ṣaṇmātra in view of the Sanskrit name of that Gaṇa namely Ṣaṇmātra. *Kavidarpaṇa* employs the first letters of the five Vargas in the Sanskrit Alphabet, thus *ka*, *ca*, *ṭa*, *ta*, and *pa* respectively for a Dvi-mātra, a Trimātra, a Caturmātra, a Pañcamātra and a Ṣaṇmātra. This causes a good deal of confusion, since his *ta* and *pa* are respectively Pañcamātra and Ṣaṇmātra instead of the Trimātra and the Pañcamātra as understood by both Svayambhū and Hemacandra. In the case of the Varna Vṛttas and also in that of some of the Mātrā Vṛttas where the position of a short or a long letter is fixed, Svayambhū qualifies these terms by adjectives which indicate the position of these letters whether at the beginning, middle or end of that Gaṇa, meaning at the same time that all the remaining letters of that Gaṇa are of the opposite kind. Thus the words *āi*, *puvva*, *muha* or *purā* are used to signify the 'beginning'; *ura* *uaara*, *majjha* and *jaṭhara* are for the 'middle' and *anta*, *para*, *virāma*, *avasāṇa*, *nihāṇa* or *uttara* etc. for the 'end' of a Gaṇa. When all the letters of a Gaṇa are of the same kind, this is indicated by words like *savva*, *saala*, *aṅga*, *asesa*, etc., prefixed to the symbol *la* or *ga* as the case may be. These two again, i.e., the short and the long are respectively called *laghu* and *guru*, or *rju*—*avakra* and *vakra*, *ūrdhva* and *dirgha*, *lakāra* and *gakāra* etc. Of these, *rju*, *avakra* and *ūrdhva* refer to a short vertical line which is prescribed as a symbol of a short letter, while *vakra* refers to a short vertical line curved at both ends (resembling S) which stands for a long letter. These symbols are as old as Virahāṅka's *Vṛttajātisamuccaya*⁸ and the *Jānāśrayī*.

7. The contents of the 13 chapters are suggested by their titles given in the recurring stanza as said above. Chapter 1 is very likely called Skandhaka-jāti as suggested by *SbP*. 2. 4a and 6. 1a, even though we do not have the recurring stanza in the palm ms. Svayambhū defines in this chapter and also illustrates by the same stanza, the Gāthā with its three kinds, the Gīti, Upagīti, and the Udgīti, the Skandhaka and other metres derived by the addition of the pairs of Caturmātras to the first line of the Gāthā. Svayambhū, however, essentially differs from his predecessors

8. See *Vjs.*, 1.14 and *Jns.* 1.16-17; also compare *Jd.* 1.3-4; *Jk.* 1.3; *H.* 1.4-5; *Vr.* 1.9 and *Kd.* 1.4 with the note on the last passage.

like Virahāṅka and successors like Hemacandra in his treatment of these metres; he takes the Skandhaka as the basic metre and derives the Gāthā from it, while all others including Piṅgala consider Gāthā as the basic metre and the others as derived from it. Perhaps Svayambhū does this for the sake of convenience of his definitions; but it is also very likely that his treatment is historically more correct, since metres like the Gāthā which are obtained as a result of a fusion of two different metrical units must naturally be considered as later than metres like the Skandhaka, whose halves are equal and similar to each other. Svayambhū thus defines a Skandhaka as a metre which has two equal and similar halves, each containing 8 Caturmātras; from this he derives the Gīti whose halves contain 7 and a half Caturmātras each. This Gīti again, is changed to Upagīti when the 6th Caturmātra in each half is reduced to a single short letter, i.e., when each half contains only 27 Mātrās made up with 5 Caturmātras, a short letter, and 1 and a half Caturmātra more coming at the end of all. Svayambhū has thus established two different kinds of metrical units or halves, one containing 30 Mātrās and the other containing 27. By a fusion of these two we get two more varieties, viz., Gāthā which has 30 Mātrās in its first and 27 in its second half, and the Udgīti which has 27 in the first and 30 in the second half. It is I think correct to explain the origin of the Gāthā in this manner; in the beginning the Gāthā must have been considered as a metre of two Pādas only. It must have been rather late in its development that it came to be regarded as a Catuspadi, very probably owing to the Yati after the third Caturmātra in both the halves, which made their portions preceding the Yati look like equal Pādas. The unusualness of the so called fourth Pāda, when the Gāthā is considered as a Catuspadi becomes very striking owing to its new rhythm which is absent in its counterpart in the first half. But still the question of the origin of this new type of rhythm remains unanswered⁹ and I shall briefly try to tackle it in the next paragraph.

8. The Prākṛit Gāthā and its Sanskrit representative Āryā are admittedly pure Mātrā Vṛttas very largely employed for narrative poetry or even for the purposes of composing memorial stanzas on different scientific subjects owing to the great ease in handling them. They resemble the Sanskrit Anuṣṭubh Śloka very closely in both these respects. Svayambhū treats of this Śloka at Sb. 3.8-9, mentioning a few varieties of it. There he lays down three different principles of division as follows: If the 2nd part of a line consisting of 4 letters has 1 short letter followed

9. See *Apabhraṃśa Metres II*, para 44.

by 3 long ones it is valled Vaktra ; if it has alternating short and long letters it is Suvaktra and finally if it has 3 short letters followed by 1 long it is Capalā. Among the different combinations of these three elements, i.e., Vaktra, Suvaktra and Capalā, and the metres resulting from them there is one where the odd Pādas have the Capalā and the even ones have the Vaktra element in them. This is called Capalā-Pathyā by Svayambhū ; its odd Pādas have generally 12 Mātrās in them, while the even ones have 15 if all the first 4 letters are long as they are in Svayambhū's illustration. But at any rate, the rhythm of the latter part of these even Pādas, viz., the Vaktra rhythm, is exactly similar to the rhythm of the concluding part of the second half of the Gāthā and it is very likely that the idea of the substitution of a single short letter in place of a Caturmātra at the 6th place may have originated from the 5th short letter in this Vaktra rhythm of the Śloka.

9. At the beginning of the first chapter (SbP. 1) Svayambhū has explained the nature of short and long Akṣaras in the Prākritis, showing how *e* and *o* as also the letter *him* at the end of a word, and short letters which precede a conjunct containing either *h* or *r* or both are all to be considered as short so far as the Prākrit prosody is concerned. This stanza itself is missing in the ms., but the illustrations are available, for which see notes. The whole of the first chapter is taken up by the definitions and illustrations of the Skandhaka, Gīti, Gāthā and the derivative metres obtained from these. The second chapter (SbP. 2), which is called Galitakajāti, defines and illustrates the basic Galitaka and the metres derived from it ; of these the ms. contains only the Mugdha and the Ugra Galitakas. But evidently Svayambhū has defined and illustrated only a few of these Galitakas, whereas Hemacandra has defined not less than 24 of them at HPk. 4.17-40. The third chapter (SbP. 3) called Khañjakajāti defines and illustrates several Khañjakas like a Khaṇḍa, Dvipadī, Adhikākṣarā, Narkuṭaka and others as is clear from the illustrations of metres derived from these given by Svayambhū and preserved in the available portion of our ms. Though a large portion of this chapter is missing, yet its beginning and end are available, where the definition of Khañjaka and the name of the chapter are respectively given. Hemacandra at HPk. 4 41-75 seems to have closely followed Svayambhū in his treatment of the Khañjakas. It is, however, significant that Svayambhū has dropped the Madanāvatāra and its five kinds from the Khañjakas but has defined only the Madanāvatāra at Sb. 8.2 among the 'rest' of the Apabhramśa metres Ratnaśekhara at Ck. 32 agrees with Svayambhū in considering

Madanāvatara as an Apabhramśa metre ; but Hemacandra and the author of the Kavidarpaṇa both regard it and the metres derived from it as Prākṛit metres. The conclusion of the fourth chapter (SbP. 4) is missing, but its title seems to be Śīrṣakajāti and the available portion of the ms. contains a few Śīrṣakas, starting with the Dvipadī-khaṇḍa, which is illustrated from Śrīharṣa's *Ratnāvalī Naṭikā* and also by another composition of one Abhimānacinha. This is followed by the Dvibhaṅgikā which is said to consist of a Dvipadī and a Gītikā¹⁰. This arrangement is closely followed by Hemacandra at HPk. 4.76-79 and there is reason to believe that Svayambhū must have defined and illustrated even other kinds of Dvibhaṅgīs, and perhaps even the Tribhaṅgīs, all of which pass under the general name of Śīrṣakas. A folio of our ms. contains also a portion of the Sama-śīrṣaka and Viṣama-śīrṣaka which are the concluding metres discussed by Hemacandra in the 4th chapter of his *Chandonuśāsana*.

10. The next, i.e., the fifth, chapter of the Pūrvabhāga is called Māgadhajāti ; its commencement is missing, but its conclusion is available in the ms. Even here Svayambhū takes the Prākṛit Pādākulaka as the basic metre and has defined and illustrated it before the Mātrāsamaka and allied metres. Svayambhū treats the Apabhramśa Pādākulaka, along with the Saṅkulaka and the Paddhatikā, under the Apabhramśa metres at Sb. 6. 129. In this chapter he seems to have defined only the Pādākulaka employed in the Sanskrit and the Prākṛit languages. As a matter of fact these six metres of which Mātrāsamaka and Pādākulaka are representative, are generally considered as a separate group of Sanskrit Mātrā Vṛttas¹¹ by Piṅgala and Jayadeva, whom later writers like Hemacandra and Kedāra have followed, though Virahāṅka has completely neglected them. It is again noteworthy that all these six metres are regarded as those that belong to the Māgadhajāti, and it is evident that Svayambhū started his treatment of these metres with the Māgadhiḥikā, deriving the Vaitāliya group from it. See the introductory note to this chapter on page 169 below. This is against the plan of Hemacandra and other earlier writers who consider the Vaitāliya to be the chief metre of this group and Māgadhiḥikā to be only a derivative of it.

11. This chapter is then followed by another, i.e., the sixth, which treats of the Sanskrit Varṇa Vṛttas belonging to the 26 Jātis, beginning

10. This Gītikā, slightly different from the Gīti, agrees with that of Vjs., 2.2-3 ; see note on this last passage.

11. See *Jayadāman*, Introduction, para 22; also cf. P. 4.42-47; Jd. 4.24-29; H. 3.65-70; Vr. 2.32-37.

with the Ukta and ending with the Utkṛti, together with the Daṇḍakas and the Śeṣajāti Vṛttas. The available portion of the ms. runs upto Sālīni which belongs to the Triṣṭubh Jāti and whose Pādas contain 11 letters each and the Baroda ms. commences from the Rucirā of the Atijagati Jāti whose Pādas contain 13 letters each among the 26 broad Jātis of the Varṇa Vṛttas. Thus the gap in this chapter, which is called Uktādividhi, is not very large and only a few metres of the Triṣṭubh and the Atijagati Jātis, together with all of those that belong to the Jagati Jāti are missing.

12. There are some points which deserve to be noted in the treatment of the Varṇa Vṛttas in this chapter by Svayambhū. *Firstly*, Svayambhū does not employ the Varṇa Gaṇas in the definitions of these metres, but always uses the five Mātrā Gaṇas, the five Amśas as he calls them. We are naturally reminded of Virahāṅka, who does not employ any Varṇa Gaṇas for his definitions, but mentions in detail the order in which short and long letters ought to follow, using now and then the Caturmātra and the Pañcamātra Gaṇas which he has enunciated and named at the commencement of his work. Bharata in his Nāṭyaśāstra follows the same method, but avoids the mention of any Gaṇas of any kind whatsoever. Both Bharata and Virahāṅka followed this rather crude method as they aimed at giving their definitions through the medium of a whole stanza, instead of a single line or a Sūtra. Bharata used one stanza in the Anuṣṭubh metre, while Virahāṅka employed a whole stanza in the same metre which is being defined in the stanza. The practice of defining a metre in a single line or Pāda of that same metre is comparatively of a late origin and the first author who is at present known to have employed it is Jayadeva, the author of the *Jayadevachandas*. *Secondly*, in many cases, Svayambhū indicates in his definitions how by the addition or removal of a letter or a Gaṇa from one metre, another is produced. This is very interesting and important for the study of the growth of different Varṇa Vṛttas from one another. I have shown elsewhere¹², how certain groups of letters containing a particular type of Varṇa Sangīta came to be popular in course of time and therefore more widely employed than the others. I have stated there that very often two or more of these groups, which by the way I have called the Ghaṭakas, came to be joined together for the production of a new metre. This contention is strongly supported by the manner in which Svayambhū defines some of his metres¹³ like Citrā (v. 19), Citralekhā (v. 36),

12. See my article on the Vṛtta-Ghaṭakas at *Journal BBRAS.*, 1951, p. 150 ff.

13. The references that follow are to the stanzas in Sb. ch. 1; for further elaboration of this point see below paras 24 and 25.

Bhramarapada (v. 38), Lalita (v. 41), Harinīpada (v. 42), Kesara (v. 44), Candrabimba (v. 49), Chāyā (v. 51), Makarandikā (v. 52); Lalitā (v. 60), Mattākrīdā (v. 61) and Krauñcapadā (v. 63). *Thirdly*, Svayambhū does not mention a Yati in the middle of a line of the Varṇa Vṛttas and to justify this he states in v. 71, that Jayadeva and Piṅgala alone admit a Yati in the case of the Sanskrit Varṇa Vṛttas, while Bharata, Māṇḍavya, Kāśyapa and Saitava do not admit of it. No Yati is generally admitted in the Prākṛit and the Apabhraṁśa metres, which are mostly Mātrā and Tāla Vṛttas, except in the longer Dvipadīs and the lone Rāsaka at Sb. 8.25. But even here the Yati tends to be a longer pause which occurs at the end of a Pāda (Pādānta Yati), rather than a shorter one occurring in the middle of a line. It is as a matter of fact owing to these Yatis in the lines of the longer Dvipadīs that these latter were turned into Catuspadīs or Ṣaṭpadīs, merely when a rhyme was introduced at the place of the Yati or Yatis, or even without such a rhyme at times. Svayambhū simply extends this principle of no Yati to the Varṇa Vṛttas. *Fourthly*, Svayambhū quotes his illustrations from a large number of authors who appear to have been genuine Prakrit poets making use of these Varṇa Vṛttas and writing their stray lyrics of love or devotion in them. In this section on the Varṇa Vṛttas including the Daṇḍakas, Svayambhū quotes from about 30 poets, taking usually only one or two stanzas from each. There are, however, three among them from whose compositions more than 10 stanzas each are reproduced; these three are Aṅgāragana (13), Śuddhasvabhāva (19) and Śuddhaśīla (16). We shall discuss the nature of their compositions in a later paragraph¹⁴ below. For the present it is enough to say that these stanzas do not leave an impression that they formed part of a single poem, composed on a particular topic. *Fifthly*, among the 60 and odd metres excluding the Daṇḍakas which are found in this chapter, at least 16 are such as are peculiar to Svayambhū, but later mentioned only by Hemacandra, thus showing that they were known only to the Jain tradition. *Sixthly*, Svayambhū mentions 11 special Daṇḍakas which he calls by the name Mālā and which contain an indefinite number of Mātrika Gaṇas of the same kind used at will, provided always that the same number is employed in all the four Pādas. Four of these 11 Mālā Daṇḍakas start with an initial group of 5 or 6 short letters, which are then followed, any number of times, by the same particular kind of Pañcamātra Gaṇa, throughout the Pāda. Two are made of the same kind of Caturmātra Gaṇa, repeated any number of

14. See paras 21 and 22 below.

times, throughout the Pāda. Three more have their Pādas constituted with any number of the same kind of a Pañcamātra Gaṇa in a Pāda. These last five are without any initial short letters preceding the Caturmātra or the Pañcamātra Gaṇas. Lastly, two more are made up with the two kinds of a Trimātra, one having the short letter first and the other having the long letter first, occurring uniformly throughout the Pāda¹⁵.

13. The next chapter which I have marked as the second of the *Svayambhūchandās*, i.e., of the Uttara Bhāga of the work, is called *Ardhasamam*. It treats of 14 *Ardhasama Varṇa Vṛttas*, whose equal and similar halves are made up of unequal and dissimilar lines. Both here and in the next chapter *Svayambhū* employs only the five *Mātrā Gaṇas* for defining these *Varṇa Vṛttas* of the *Ardhasama* and the *Viṣama* types, as he does in the case of the *Sama Varṇa Vṛttas*. Of the 14 *Ardhasamas* all are known to Piṅgala, except the *Ṣaṭpadāvalī*, which is mentioned only by Hemacandra besides our author. It is really an inverted *Yavamatī*. The title of the next chapter, i.e., the third of the *Uttarabhāga* (the 7th of the work as a whole), should have been *Viṣamam*; but this is not mentioned in the concluding stanza of that chapter. This stanza refers to the conclusion of the *Prākṛtasāra*, i.e., the essential metres of the *Prākṛit* language, as against the metres of the *Apabhraṃśa* language which are dealt with in the following chapters of the work. This means that all the previous chapters of the work comprise the first part of the work dealing with the *Prākṛit* metres, while the last five chapters form its second treating of the *Apabhraṃśa* metres. It is characteristic of *Svayambhū* that he does not take any notice of the fact that the *Varṇa Vṛttas* are properly the *Sanskrit* metres derived from their *Vedic*¹⁶ ancestors. He claims them all for *Prākṛit* poetry; he, however, gives *Sanskrit* illustrations for *Prākṛit* metres at least in two places (i.e., *Sb.* 5.5.1 and 8.20.2). His terms for a metre are *Jāti* for a class and *Rūpaka* for an individual, *Chandas* being reserved to convey the *Chandas Śāstra* or *Prosody* as well as an individual metre. He does not use even the terms *Varṇa Vṛtta* and *Mātrā Vṛtta* and this is quite in keeping with his employing only the *Mātrā Gaṇas* in his definitions of even these metres which are generally known as the *Varṇa Vṛttas*.

14. Among the *Viṣama Vṛttas* *Svayambhū* defines all the four¹⁷ groups mentioned by Piṅgala in his *Chandas Sūtra* 5.1-30 and followed

15. For the different kinds of the *Daṇḍakas* see *Jayadāman*, pp. 147-148.

16. See *Jayadāman*, Introduction, paras 7-9.

17. See *Jayadāman*, Introduction, paras 12-15.

by his successors in the field of the Varṇa Vṛttas. He, however, differs from them in some details. Thus he seems to make a distinction between Suddhvirāḍikā and Āvṛṣabha (Sb. 3.6.1 and 2). He regards Śloka as the basic metre from which he derives Vaktra, Suvaktra, Pathyā, Pathyāvakra and Capalāpathyā (vv. 8-9) and considers Vipulā has having only 4 varieties¹⁸ instead of the eight of Piṅgala (v. 10).

15. As said above, Svayambhū defines the Apabhraṁśa metres in the last five chapters of his work. He broadly divides them into Ṣaṭpadīs, Catuṣpadīs and Dvipadīs; of these the Ṣaṭpadīs are all of them used as Dhruvakas and are subdivided into three classes, viz., Ṣaṭpada Jāti, Upajāti and Avajāti, according as they contain seven, eight and nine Mātrās respectively, in all their Pādas, except the 3rd and 6th which may have from 10 to 17 in them. The Catuṣpadīs are of three kinds, namely, Sarvasamā, Ardhasamā and Antarasamā Catuṣpadīs. All these three kinds are called Dhruvakas when they are longer ones, i.e., when they contain not less than 10 and not more than 17 Mātrās in any of their four Pādas (vv. 60, 122-130). Shorter Catuṣpadīs having less than 10 Mātrās in any of their Pādas are called Vastukas as said in vv. 59-60. Thus out of the 110 Antarasamā Catuṣpadīs 54 are Vastukas and 56 are Dhruvakas (v. 120). This same distinction has to be understood in the case of the Ardhasamā Catuṣpadīs and the Dvipadīs, so that the Dvipadīs having not less than 28 Mātrās in each of their halves are called Dhruvakas or Duvaas while the shorter ones are known as mere Dvipadīs (Sb. 7.1). Any Dvipadī which has more than 40 Mātrās in each of its halves is called Mālā Dhruvaka (Sb. 6.172). It would appear that Svayambhū intended to define and illustrate the three kinds of the Dhruvakas in chs. 5 and 6, as can be seen from the introductory stanza in chapter 5 of the Uttarabhāga, namely, the Ṣaṭpadī, the Catuṣpadī and the Dvipadī Dhruvakas only; but before defining the Antarasamā Catuṣpadī Dhruvakas in vv. 61-120 and Sarvasamā Catuṣpadī Dhruvakas in vv. 123-130 of the 6th chapter of the Uttarabhāga, he defines and illustrates incidentally also the Antarasamā Catuṣpadī Vastukas (the definition of which is suggested in v. 59) in vv. 2-59 of the same chapter for the sake of completeness in respect of the Antarasamā Catuṣpadī. That Svayambhū had chiefly the Dhruvakas of the Catuṣpadī and the Dvipadī type in his mind in this chapter is also clear from his definition of a Dhruvaka Catuṣpadī in v. 60, his mention of an Ardhasamā Dhruvaka in v. 122, i.e., at the end of the Ardhasamā Catuṣpadī section and before beginning the few

18. See note on Kd. 4.121 (on pp. 150-151).

Sarvasamā Catuspadī, his repetition of the word Dhruvaka in connection with the last but one Sarvasamā Catuspadī, namely, the Paddhatikā, as well as the last of the longer Dvipadīs, viz., the Mālā (cf. also the names Tārādhruvaka and Pavanadhruvaka in v. 155), all go to show the signification of the word Dhruvaka as intended by Svayambhū. It is also significant that the Sarvasamā Catuspadīs which Svayambhū defines in this chapter, i.e., the 6th, begin with the Śaśivadanā which contains 10 Mātrās in each Pāda and this accords well with the definition of a Catuspadī Dhruvaka given in v. 60. He does not define any Sarvasamā Catuspadīs which are shorter than this in this chapter, the only one Catuspadī which contains 9 Mātrās in a Pāda and is called Dhruvaka itself, being relegated to the last chapter (Sb. 8.3) of the work. It also deserves to be noted that the Dvipadī Dhruvakas, i.e., the longer Dvipadīs defined in ch. 6, which are prescribed for certain occasions and purposes at Sb. 7.1 are called Duvaas (cf. Sb. 5.1d ; 6.131c), as against the Duvaīs defined in ch. 7, vv. 1-2. From Sb. 7.2 again, it would seem that shorter Dvipadīs having from 4 to 30 Mātrās in each of their halves, were known as Duvaīs (mark how two of them nos. 5 and 6, retain the name Dvipadī with a prefix), the exception being the five which are defined at Sb. 6. 132-136, like the exception of the Sarvasamā Catuspadīs in the case of the Dhruvaka at Sb. 8.3.

16. This distinction between a Dhruvaka and a Vastuka is peculiar to Svayambhū. According to Virahāṅka (Vjs. 2.1ab), Vastuka seems to be another name of a Dvipadī of four Pādas¹⁹ of any length. Virahāṅka's commentator also means the same thing, when he introduces the third Niyama with the remark *idānīm dvipadīvastukānām sodāharaṇam lakṣaṇam yathopadeśam ucyate*. On the other hand, Hemacandra says (HPk. 6.1-2) that a Dhruvā is a name given to a metre because it stands invariably (*dhruvam*) at the beginning of a Sandhi or at the end of a Kaḍavaka and is extended to any Ṣaṭpadī, Catuspadī or Dvipadī, which is so employed. He seems to be inclined to extend this name even to shorter Catuspadīs whose Pādas contain 7 to 9 Mātrās in them, as his remarks on HPk. 6.3 show : *ṣaṭpadī-catuspadī-dhruvayośca saptakalādyāḥ saptadaśakalāntāḥ pādā bhavanti*. Similarly at HPk. 6.18, he uses the word Vastuka as a synonym for a Catuspadī and in the commentary on this Sūtra he actually says so in so many words : *vastukam iti catuspadyā eva nāmāntaram*. This is definitely against Svayambhū's words and directions at Sb. 6.59-60, 120 and 7.1-2 as shown above. Rājaśekhara,

19. See Vjs. Introduction, para 5 for the name Dvipadī given to a metre of four lines.

however, very closely follows Svayambhū in mentioning this distinction. Thus he calls the 24 kinds of the Ṣaṭpadī as the 24 kinds of the Dhruvā (R. 32). Similarly, at the end of the first 54 Antarasamās he remarks at R. 95 *evam catuḥ pañcāśad vastukānyāhuḥ*: 'These they say are the 54 Vastukas'. In R. 159 he calls the two varieties of an Antarasamā, which have 16 and 17 Mātrās in each of their Pādas by the name Dhruvā. Finally at the end of the longer Dvipadīs he remarks (after v. 224) *dvipadī-dhruvāṇām ṣaṣṭiḥ*.

17. But before defining the Dhruvakas which constitute an important and predominant feature of Apabhramśa poetry (and incidentally also the Vastukas) in chs. 5-7, of the Uttarārdha of his work, Svayambhū takes up in the fourth chapter of the Uttarārdha the most important among the metres of the Apabhramś language and defines them, and before doing so he mentions a few phonetic peculiarities of the language observed in poetic compositions. Thus he prescribes that if and when necessary nasalised *i, u, hi, ha* and *hu*, the last three affixes being peculiar to the Apabhramśa language, may be pronounced short, though usually they should be long. Similarly *e* and *o*, whether single or coupled with a consonant, whether at the end of a word or at any other position of it, may be pronounced short or long as intended by the poet, i.e., as needed by the metre. We may here take note of another metrical rule of the same kind, but stated at the beginning of the next chapter. It prescribes that the final letter in a line should have its metrical value, i.e., whether it should be counted as short or long, decided in view of the needs of that particular metre. If only a single Mātrā is needed to make up the required number, this letter should be counted as short and yielding only one Mātrā, even when it is actually long. On the other hand, if two more Mātrās are needed, this final letter must be regarded as long and yielding two Mātrās even if it is actually short. Svayambhū has unscrupulously followed this rule of option giving different values to the last letter in the different lines of the same stanza.²⁰

18. After these few remarks about the phonetic value of some letters, Svayambhū defines and illustrates the following metres: Utsāha, Dvipathaka or Dohā with its varieties Upadohaka and Avadohaka, Mātrā with all its varieties, the strophic couplet called Raddā, Vadana and Upavadana, together with Maḍila and Aḍla which names are given to the Vadana in view of the nature of its rhyme. All these metres are the special favourites of the Apabhramśa poets; but the Mātrā and the Dohā

20. See note on Sb. 5.2 and Bhayani, P.C., Introduction, pp. 79-83.

together with their combination, the Raddā, seem to be the oldest among them. At the end of this chapter some general terms applied to any metres in view of the nature of their contents or the occasion for which they are employed or composed, are stated. Prominent among these are the Dhavala and the Maṅgala. In the former a hero is the central figure of the description under the image of a bull, particularly a trained bull, while the latter signifies an auspicious occasion for which the poem was composed in any one of the popular metres. There are, however, some metres which are given the proper name Dhavala as against the common name which is applied to any metre owing to its contents. These special Dhavalas are said to be of three kinds, viz., Aṣṭapadī, Ṣaṭpadī and Catuspadī. The constitution of each of these is given by Svayambhū, who also defines one single variety of the special Maṅgala. In the case of the common names Maṅgala and Dhavala, Svayambhū prescribes that these are affixed to the ordinary names of the metres when these latter are employed for the specific purposes. Thus we may have an Utsāha-Maṅgala, a Dohā-Maṅgala, an Utsāha-Dhavala, Dohā-Dhavala and so on. In this same connection Svayambhū also mentions three other terms nameiy, Vadanaka, Prahelikā and Hṛdayālikā. The first of these is a common name for any Apabhraṁśa metre which may be used for composing a poem to rouse strong passions and sentiments (*utsāha*) of the audience. The last two are riddle-like compositions; the first called Prahelikā corresponds to what is generally known as Antaḥ-Prahelikā among the Subhāṣitas, while the second called Hṛdayālikā seems to be the same as what may be called Bahiḥ-Prahelikā. Svayambhū mentions that the metre of the former should be Dohā, but he is silent about that of the second. Rājaśekhara, who closely follows Svayambhū in this section and almost gives a Sanskrit rendering of his stanzas, defines Prahelikā as a composition in the metres like the Dohā, where the meaning is an inferred one (*unmānaka*?), while he defines Hṛdayālikā as a poem or stanza containing words or letters which have no apparent meaning (*sūnyaiḥ*) but which are intended to convey a meaning which the poet has in his mind.

19. In the last chapter of the work, Svayambhū appears to have discussed and defined a few miscellaneous metres as well as the constitution of the two main forms of Apabhraṁśa poetry, viz., the *Sandhi-bandha* and the *Rāsā-bandha*. The latter alone was evidently known to Virahāṅka as seen from *Vjs.* 4.37-38, but not the former, which therefore must be regarded as comparatively modern, though even the *Rāsā-bandha* seems to

have held the field for long. Very likely Rāsā-bandha was employed for Lyric poetry and the Sandhi-bandha for Narrative poetry involving long and artistic descriptions in the manner of the Sanskrit Mahā Kāvya. Having himself written two long narrative poems, *Paumacariu* and *Ritthanemicariu*, of the Sandhi-bandha type, Svayambhū allots a little more space in this chapter to the treatment of this type and particularly to that of the introductory stanza called Dhruvā which prominently figures in it and is also known as Ghattā or Chaḍḍanikā. This introductory stanza is used at the commencement of a Sandhi, and also at the beginning and end of a Kaḍavaka. But when he says that a Chaḍḍanikā is of 7 kinds, Ghattā of three, while Paddhatikās and Gītis are of various kinds, we have probably to understand that these seven and three varieties were more generally employed by the poets than the others. He further states in v. 20, that at the beginning of a Sandhi, a Dvipadī, a Gāthā, or an Aḍillā may be given as a Ghattā, while Mātrā along with the Paddhatikā may come last as the Chaḍḍanikā. In v. 24 a Rāsā-bandha is defined; it is said to have been done with the Ghattās, the Chaḍḍanikās and the Paddhatikās containing pleasing akṣaras in them. He means to say that these metres are used even for the main body of the poem in the Rāsā-bandha, and not merely at its beginning or end as in the case of a poem in the Sandhi-bandha. This clearly means that the Rāsā-bandha²¹ is a Lyric poem and not a Mahā Kāvya like the Sandhi-bandha. A metre called Rāsābandha, really Rāsaka, containing 21 Mātrās in each of its four Pādas is defined in v. 25. It may have been the favourite metre employed for the composition of a poem in the Rāsā-bandha, though the name Rāsaka or Rāsābandha may be given to any suitable metre used for such a poem according to v. 26. This stanza is quoted by Hemacandra at HPk. 5.3 which Sūtra defines a Rāsaka exactly like Svayambhū. Another metre called Rāsā, but which is an Antarāsamā Catuspadī having 7 and 13 Mātrās in its odd and even Pādas, is then defined in v. 27. This metre is the same as the Rāvaṇahastaka²² defined at its proper place at Sb. 6.13. Hemacandra too, defines the metre in two places, once among the Rāsakas at HPk. 5.16 and then among the Antarāsamās at HPk. 6.19.9.

20. In this chapter Svayambhū mentions a few unusual terms like Sapta-tāla, Pañca-tāla, Tri-tāla in vv. 21-22 and Sama-tāla, Vidārī and Ekkalīa²³ in v. 28. In v. 21 he defines Tāla as (a composition) accom-

21. See pp. 76-77 of the *Sandeśa-Rāsaka* of Abdur Rehman, edited by Dr. H. C. Bhayani and published in the Singhi Jain Series, Bombay, 1945. This poem very much agrees with Svayambhū's definition of a Rāsaka Kāvya. See also Vjs. 4.38 and note.

22. Rājasekhara calls it Rāvaṇa-mastaka at R. 47.

23. Compare the Ekaka of Vjs. 2.5.

panied by Saṅgīta (vocal music), Vādyā (instrumental music), and Abhinaya (acting). Sapta-tāla, Pañca-tāla and Tri-tāla are respectively groups of 7, 5 and 3 such units, while groups of 2 and 4 are respectively called Yugala and Catuṣkala, the other groups getting the common name Kulaka (v. 23). Svayambhū's remarks about Sama-tāla and Vidārī are unintelligible to me. Vidārī is indeed mentioned by Virahāṅka at Vjs. 2.5 and also in the Jānāśrayī 5.66 (Trivandrum ed., 1949). In the latter place it is defined as a metre of 4 Pādas each containing 14 Mātrās with the Sagaṇa at the end and the 4th Mātrā being combined into a long letter either with the 3rd or the 5th Mātrā. On the other hand, Virahāṅka merely states that Vidārī should be shorter than the Vastuka, (i.e., the particular Vastuka employed by the poet), but from the latter half of the stanza containing this definition, it would seem that Vidārī is a metre of three Pādas only. In v. 29 Svayambhū mentions one more common name Phullaḍaka, which he says is given to any Mātrā or Varṇa Vṛtta defined so far, when it is employed for praising the deities, while vv. 30-31 further elaborate his remarks about the metre Maṅgala (defined at Sb. 4.20) and records a convention that in Maṅgalas, Phullaḍakas and similar other popular songs no rules about rhyme or metre should be insisted upon as long as these songs are liked by the people.²⁴

21. Having thus examined the contents of the work, we shall now proceed to discuss the nature of the large number of illustrations quoted by Svayambhū in the first eight chapters (i.e., chs. 1-5 of the Pūrvabhāga and chs. 1—together with 6 of the Pūrvabhāga —, 2 and 3 of the Uttara-bhāga) of his work. Here, i.e., in Prākṛit poetry, we find a variety of themes, especially in the field of village life. Descriptions of the different seasons and the calamitous effects which they have upon the lovers who have to be away on long journeys for the purposes of trade or business, figure largely along with frank descriptions of love in union, in this part. Fine Rūpakas and Utpreksās based on some natural phenomenon are not also wanting. The number of poets from whom a single stanza is quoted by Svayambhū in this section is very large and many among them are non-Jain. On the other hand, in the Apabhraṁśa section (chs. 4 to 8 of the Uttara-bhāga) only two poets are quoted with some frequency; they are: Govinda and Caturmukha. Seven others are also quoted, but six of them only once each and the seventh only twice. These six are: (1)

24. This is a very important and pertinent remark of Svayambhū. It shows how the Apabhraṁśa poets often took great liberties with their metres and language; nevertheless they enjoyed great popularity among the appreciative listeners (Nipuṇas) of their days, owing to the great merit of their composition.

Chailla; (2) Jinadāsa; (3) Dhanadeva; (4) Dhūrta; (5) Mātrdeva; and (6) Vidagdha, while the seventh is Śuddhaśīla²⁵. But in addition to these stanzas which are quoted under particular names, there is a large number, about 60, of those that are quoted without any name attached to them²⁶. Out of these 60 stanzas as many as 16 refer to the story of the Rāmāyana and 7 to that of the Mahābhārata or the Harivaṃśa. 12 out of the 16 Rāmāyana passages are, strangely enough, traced to Svayambhū's own *Paumacariu*, which is a poem²⁷ on the Jain version of the story of the Rāmāyana. One more again, i.e., 6.54.1, is found in Svayambhū's *Paumacariu*, 71.1, though in our ms. it is ascribed to Caturmukha. In addition to these 23 unnamed stanzas, which refer either to the Rāmāyana or to the Mahābhārata story, there are a few which refer to morality in general (4.9.4; 4.29.1; 4.31.1; 6.15.1; 6.100.1; 8.6.1), or contain religious advice according to Jainism (8.7.1; 8.8.1; 8.20.1-10; 8.25.1; 8.11.3). One contains a reference to the Vāmana Incarnation of Viṣṇu (8.14.1) and another a practical advice to her daughter by a professional prostitute (4.3.1), while a third is a description of a hunting expedition²⁸ (6.90.1). We have also four fine *Utprekṣās* (6.21.1; 6.37.1; 6.39.1; 6.42.1) and one or two *Anyoktis* (4.5.1; 6.31.1) among these stray verses. Similarly, an elephant and a Cakravāka bird, both separated from their mates, are described in a stanza each, while an incongruence between an old lover and a young delicate beauty is the subject-matter of an illustration of the Adilā metre (4.12.3). Consuming power of the fire of separation is mentioned in another stanza (6.10.1). In all these cases, where no names are attached to the stanzas, it is possible to presume that Svayambhū himself had composed them for the sake of the illustration.

22. As regards the quotations from Govinda and Caturmukha, all the six which are ascribed to the former evidently belong to the story of the Harivaṃśa, while those that pass under the name of the latter (except 6.54.1) seem to be from his two poems, one on the story of the Harivaṃśa and the other on that of the Rāmāyana. That Caturmukha had composed a poem on the story of the Harivaṃśa is quite certain as seen from 4.2.1 and 6.87.1; even 6.65.1 may be from the same poem. But 6.63.1 is a little doubtful; I think it must be from a poem on the theme of the Rāmāyana and accordingly I have suggested an emendation,

25. See Index of Authors on pp. 156-157.

26. In the Prākṛit section of the work, as against this, there is hardly any stanza which is quoted without the author's name being prefixed to it.

27. This is edited by Dr. H. C. Bhayani in the Singhi Jain Series, Part I—Vidyādhara Kāṇḍa; Part II—Ayodhyā and Sundara Kāṇḍas, Bombay, 1953.

28. See note on the passage, which is quoted in the *Sarasvatikanṭhābharana*, 2.332.

which looks to me most natural²⁹. Any way, it does not fit in with any incident in the Mahābhārata story, and should belong to the Rāmāyana story, if at all.

23. We saw above how Svayambhū does not make use of the Varṇa Gaṇas in the construction of his definition of the Varṇa Vṛttas. As a matter of principle he regards all metres as Mātrā Vṛttas and so he employs only the five Mātrā Gaṇas, called the Amśas, in the definitions of both the Prākṛit and the Apabhraṃśa metres. He does not recognize any Sanskrit or Varṇa Vṛttas as such, as for example is done by his successor, the great Hemacandra. Actually, the five Amśas include all the eight Akṣara Gaṇas of Piṅgala and Svayambhū ordinarily does not permit the violation of the order of short and long letters, thus maintaining their basic music, namely, the Varṇa Saṃgīta. According to him the metres are to be grouped under two heads only, according as they are composed in the Prākṛit or the Apabhraṃśa language, though all of them are to be considered as Mātrā Vṛttas only. It is, however, remarkable that Svayambhū has often described the inter-relationship among the metres which are generally known as Varṇa Vṛttas and whose basic unit is a Varṇa or a letter, since their lines must contain a given number of Akṣaras or letters according as they belong to any of the 26 classes beginning with Uktā and ending with Utkṛti. Thus he often shows how one metre develops out of another by the mere substitution of one or more Gaṇas of a different type, or by a mere addition of a short or long letter or letters at a particular place in a line, or finally by the coupling together of two shorter metrical lines. Yet on a closer study of all such cases, one is unable to discover any definite principle on the basis of which he had intended to explain the growth and development of new metres from the old ones. His observation of these inter-relationships has been used by him only for the convenience and brevity of his definitions of metres. In a few cases he seems to have caught a glimpse of the possibility of certain fossilized portions of metrical lines, which formed the nucleus of some new metres growing out of the old ones. But he has more neglected this glimpse than used it for his definitions, and the reason for this seems to be his non-recognition of a Yati in the middle of a line.

24. Thus in the case of Rambhā³⁰ (v. 50), Chāyā (v. 51) and Makarandikā (v. 52), Svayambhū explains how after the first block of 12 letters

29. See note on the passage; Bhayani, however, thinks otherwise at P.C., Introduction, p. 17 foot-note. Yet also compare his remarks at Introduction, pp. 79-83 and my note on Sb. 5.2.

30. References to the stanzas within the brackets are to those in chapter 1 of the Svayambhūchandas proper, i. e. Sb.

which are common to all the three, they have three different cadences (or Antya Ghatakas as I have called them elsewhere³¹), namely, *ra-ra-ga*, *ta-ta-ga*, and *ja-ja-ga* respectively, which distinguish them from one another. Similarly, in the case of Upamālinī (v. 14) and Candroddyota (v. 15), he explains how they differ from each other only in their latter part, which in the first is *ja-ja-ga*, while in the second it is *ta-ta-ga* (without, however, clearly mentioning this their otherwise close relationship in the earlier part). The same is true of Puṣpadāma (v. 48) and Candrabimba (v. 49), which differ from one another only in their cadence, the first having *ra-ra-ga*, the second *ta-ta-ga*. Here, too, Svayambhū does not refer to their having the first 12 letters in common, but on the other hand, frames his definition so as to ignore the separateness of the first 12 letters from the remaining portion of the line, caused by the presence of the Yati at that place³². Acala (v. 43) and Kēsara (v. 44) similarly differ from one another in respect of their cadence, which is separated from the earlier portion of the line by means of the Yati³³; in the former it is *ja-ja-ga* and in the latter *ta-ta-ga*. In the first 11 letters of their lines they are identical, so far as the sequence of short and long letters is concerned; but Svayambhū has not noticed this in clear words, since he does not recognize the separateness of the cadence from the earlier part in Acala. A similar neglect of the cadence is noticed even in the following instances: Cadence *ja-ja-ga* in the metres defined in vv. 6, 12, 35, 40 and 42; cadence *ta-ta-ga* in those defined in vv. 8, 11, 29 and 33; cadence *ra-ra-ga* in those defined in vv. 5, 10, 13, 28, 32 and 48. In all these, owing to his construction of the definitions by means of the Mātrā Gaṇas Svayambhū does not take any notice of the separateness of the cadence from the earlier part of the line, though in the following instances he may be said to have done it: Cadence *ja-ja-ga* in metres defined in vv. 14, 34, 43 and 52; cadence *ta-ta-ga* in metres defined in vv. 15, 44, 47, 49 and 51; and cadence *ra-ra-ga* in metres defined in vv. 19, 37, 46 and 50. All these lapses in the recognition of the underlying principle of the growth of the metres of this type are due to the non-recognition of a Yati in the body of a line on the part of Svayambhū.

25. Svayambhū has noted the development of one metre from another by addition or substitution of letters in the following cases:

31. See Vṛtta-Ghatakas at Journal BBRAS., 1951, pp. 150 ff.

32. This Yati is recognized even by Vr. 3.96.5-6 and H. 2.327-328.

33. Even here the Yati is recognized by both Kedāra and Hemacandra; but the separateness of the structure of the cadence is not clearly felt in their definitions, since the preceding portion consisting of eleven Akṣaras is not divisible into complete Akṣara Gaṇas. See H. 2.305-306; Vr. 3.94.7-8.

Rohiṇī (v. 33) from Padma (v. 32); Lalita and Harinīpada (vv. 41-42) from Rohiṇī (v. 33); Bhramarapada (v. 38) from Gajavaravilasita (v. 23); Citralekhā (v. 36) from Mandākrāntā (v. 28); Lalita (v. 60) from Madraka (v. 59); Mattākṛīḍā (v. 61) from Vidyunnālā (v. missing in SbP.); Krauñcapadā (v. 63) from Rukmavati (SbP. 6.15) and Maṇigūṇanikara (v. 18) both put together. In chapter 2 of the Uttarabhāga, i.e., Sb. 2, where the Ardhasamas are defined, Svayambhū is even more explicit; thus he points out that the even lines of the Vegavati (v. 1) are the same as the lines of a Dodhaka (SbP. 6.18); that the odd lines of the Harināpluta (v. 4) are the same as those of the Upacitraka (v. 2) and the even ones are the same as those of the Drutavilambita (lost in SbP.); that the odd lines of Ākhyānikī are the same as those of Indravajrā (lost in SbP.) and the even ones are those of the Upendravajrā (lost in SbP.); that the odd lines of the Khañjā (v. 13) are the same as those of a Giti (SbP. 1.3) and the even ones are the same as those of a Skandhaka (SbP. 1.3). Similarly, if an Anta-guru Trimātra is substituted for the final Caturmātra in the odd lines of the Vegavati (v. 1), we get an Upacitraka (v. 2); Dodhaka itself becomes Calamadhyā (v. 3) when the initial Caturmātra in its even lines is made to consist of four short letters; Puṣpitāgrā (v. 9) is turned into Bhadravirāt (v. 10) when the 1st and the 3rd short letters in all its Pādas are combined with the 2nd and the 4th into a long one, i.e., when the first 2 letters in all its Pādas are long; and Aparavaktra (v. 8) is changed into a Puṣpitāgrā (v. 9) when a long letter is added at the end of all its Pādas. All these directions clearly suggest that Svayambhū was conscious of an important cause³⁴ of the growth of the Varṇa Vṛttas, though he has not enunciated it in clear words.

II

(For Rājasekhara's *Chandaśśekhara*, see pp. 129-139).

26. Rājasekhara's *Chandaśśekhara* is a work on Sanskrit, Prākṛit and Apabhraṃśa metres as he himself tells us in v. 7 of ch. 5, which alone is available at present. This work is written in Sanskrit, but seems as if it were a very close Sanskrit rendering of Svayambhū's corresponding Prākṛit stanzas, so that after reading this chapter of the work an impression is left on the mind of the reader that Rājasekhara has merely given in Sanskrit what Svayambhū wrote in Prākṛit. There is, however, this difference between the two writers that while Svayambhū regards the metres to be only of two kinds, Prākṛit and Apabhraṃśa, Rājasekhara

³⁴. See Vṛtta-Ghatakas at *Journal BBRAS*, 1951.

considers them to be of three kinds, Sanskrit, Prākṛit and Apabhraṃśa ones. This evidently means that Rājasekhara considered the Varna Vṛttas as Sanskrit metres and the Mātrā Vṛttas (with the exception of the Vaitāliya and the Mātrāsamaka groups, as well as the Gāthā with a few of its derivatives) as the Prākṛit metres. It is, therefore, possible to imagine that the first three chapters of Rājasekhara's work treated of the Sama, Ardhasama and Viṣama Varna Vṛttas while the fourth treated of the Mātrā Vṛttas including the Prākṛit ones. The 5th chapter which we are publishing here contains, however, a few of the Prākṛit metres, namely, the Śīrṣakas, and then proceeds to define the Apabhraṃśa metres. This is also the order which Hemacandra has followed in his Chandonuśāsana, where he concludes his treatment of the Prākṛit metres with the Śīrṣakas in ch. 4 and begins with Apabhraṃśa metres such as Utsāha and others in ch. 5. It is, therefore, quite likely that Hemacandra has followed Rājasekhara in his classification as well as order of the treatment of the metres.

27. As regards the relationship between Rājasekhara and Svayambhū, it will be seen that owing to a different order of treatment, vv. 1-6 of ch. 5 of Rājasekhara's work correspond to the whole of the 4th chapter of the Svayambhūchandās-Pūrvabhāga, while the remaining stanzas of the chapter seem to summarize chs. 4 to 7 of the Svayambhūchandās proper (Sb. 4-7). In Appendix I, I have given a concordance of the two works, which might easily prove how closely the one has followed the other. - It is said above that Hemacandra has very likely followed Rājasekhara both in his classification and order of treatment of the metres; this is also suggested by the agreement in respect of the names of certain metres between Hemacandra and Rājasekhara as against Svayambhū. See for example notes on Sb. ch. 6, vv. 26, 37, 39, 40, 43, 46, 49, 55, 107, 112 etc. It is, however, striking that Hemacandra does not mention Rājasekhara anywhere in his work.

28. I had published this chapter in the *Journal BBRAS.*, in 1946. I am publishing it again here on pp. 129-139, as it sometimes materially helps in understanding Svayambhū's words and also because it sometimes throws some light on Hemacandra's nomenclature of some metres in ch. 6 of his Chandonuśāsana. The only ms. of this chapter written on palm leaves exists at the Bada Bhandar of Jesalmir in Bundle No. 238, though Dalal's Catalogue does not mention it as existing in that bundle. This ms. consists of pp. 44 to 51 only, the first 43 pages containing chs. 1 to 4 of the work being untraced for the present, though a ms. of the Chandaśekhara of Rājasekhara is said to exist at Jesalmir at Jaina Granthāvali, p. 318, on the basis of a list prepared by Shri Hiralal Hansaraj for the Jain Śvetāmbar Conference, Bombay, in

1909. Our ms. is $12\frac{1}{2} \times 11\frac{1}{2}$ inches in size, each page containing about 6 lines, each line having about 60 letters in it, as described by Prof. K. K. Shastri, who prepared a copy of it in 1943 for Muni Shri Jinavijayaji, at present Director, Rajasthan Puratattva Mandir, Jaipur. It is dated Samvat 1179 and is said to have been written at Citrakūṭa Durga.

29. Rājasekhara describes himself as an Ārhata and a Kavi in the last stanza of the chapter. He was a layman; his father, grand-father and great-grand-father were respectively called Duddaka, Lāhata and Yaśa, and belonged to the Thakkura family. His mother's name was Nāgadevī; but nothing about his literary activities is at present known to us. He only tells us that this manual of his was very much liked by one Bhojadeva, who is very likely to be identified with the great king Bhoja of Dhārā. The date of our ms. very well confirms this identification³⁵ and it will not be far from truth if we assign Rājasekhara and his literary activities to the middle of the 11th century A. D.

30. I feel deeply obliged to Muni Shri Jinavijayaji, Director, Rajasthan Puratattva Mandir, who asked me to reedit this important work on Prakrit prosody for the Rajasthan Puratattva Series. I thank the Authorities of the the Asiatic Society of Bombay and the University of Bombay for permitting me to publish it as an independent book, and the Director of the Oriental Institute, Baroda, for lending me the only ms. of the work in their possession. But I specially mention my indebtedness to Pandit Rahula Sankrityayana of Massuri, who gave me the palm-leaf ms. containing the fragments of the first part of the work, which is missing in the Baroda ms. Finally I gratefully acknowledge the substantial help in various ways which I have continuously received from my friend and colleague Dr. H. C. Bhayani of the Bharatiya Vidya Bhavan, Bombay.

35. Chandasekhara, which is quoted by Trivikrama in his commentary on the *Vṛttaratnākara* is very probably identical with the work of our Rājasekhara. I have published this commentary at JBBRAS Vol. 33 (1958), pp. 25-68; I have discussed this question briefly on p. 37

IMPORTANT NOTE

A portion of the earlier part of this work was made available to me by Pandit Rāhūla Saṃkrtyāyana at a very late stage of printing. I am, therefore, printing it here, immediately after the conclusion of the work, though it ought to have appeared at its commencement. Its chapters and verses are also separately numbered.—H. D. V.

१ Ms. reads तिचआरा पगाआ. २ Ms. reads मज्झलोवरा.

* Hereafter we have four stray folios which contain portions of the remaining part of the work. I have given the variant readings from these on p. 128.

VARIANT READINGS FROM THE PALM LEAF MS.

(in chs. 1, 2, 4 and 8 of स्वयंभूच्छन्दः)

ch. 1

v. 68 b पदमा गुरुलुहणिरंतरा तत्थ; c तद्धिउणा उण सेसा०; 69 b हवंति for हुवंति; c एवं तद्दुउणणे च; 70 a छ्वीसा for सव्वीसा; b एआरह for सत्तारह; c वाआलीसह लक्खअ; 71 a जअएव; b जइ for जई; d सेअवपमुहा णमिच्छंति; 72 a लहुतगणजुअ० चंडविट्ठी परेक्कवट्ठीए अण्णणअव्वा-लजीमूत०; 72 चंडविट्ठी चंदअस्स; 73 a इअ चंडविट्ठिपमुहां; 74 a पआरोपरा for पआरा परा; ज [त्थ] इच्छाए० चंडवालोत्ति०; 75 a पआरोपरा for पआरा परा; पुव्वला पा जदिच्छाए० सीहसकंतणामो; 76 a पुव्वला जत्थ इच्छाए for पुव्वला पा जहिच्छाइ; 77 a छआराहि for छआराहि; इच्छाए for इच्छाइ; चंडवेआहिहाणो; for ०हिहाणो; 78 a अद्वपा for सव्वपा; इच्छाए for इच्छाइ; लीतअरो for लीलाअरो; 79 a हवंति for हुवंति; 80 a जहीं हवंति for जहिं हुवंति; सो अ [सोअ] for सा इमा असोअ; मंजरत्ति for मंजरित्ति; 81 a सत्तचआर for सव्वचआर; 82 a तगुरु for दुगुरु; 83 a मुहुज्जू for मुहज्जू; जहिच्छाए for जहिच्छाइ; 84a सव्वत्थ for सव्वत्त; त्ति in कामवाणोत्ति is dropped; 85 We have only उत्ताइविही परिसमत्तो for the stanza.

Ch. 2

v. 1 c इह वेअवईए पअद्वे; d दोहअअ जुह वीअचउत्थो; 2 b उअ for उव; 4 b दुअवि-संविअअं इ जइ सेसए; c सीजुअं for संजुअं; d कइअणे अणिअं हरिणुद्वअं.

Ch. 3

v. 6 b पउविअ for पचुविअ; cd आ मुद्वविराडिआ तहिं; पदमगणविरइमिणमावसहं तं; 7 a अंगआ for अंसआ; c लहुवण्णाइवण्णाओ; 8 a वंतं for वत्तं; 9 b सअरा for सागरा; c चवला होइ वत्तं च; 10 a वहुमेआ for चउमेआ; 11 b सोहलं for सोरहं; d चउरद्वं for चउरुद्वं; 12 b जस्स for जत्थ; c पच्छावीलू; d आवीलू जत्थ णिहणमि; 13 b पलट्टइ अ जत्थ मंजरी एसा; c तइअएण for तइएण; d धारत्ति for धारेत्ति; for v. 14 we have only प्राकृतसारः समाप्तः.

Ch. 4

v. 1 पाअअस्स for पाउअस्स; b लक्ख is dropped; c एत्तावअन्से; 2 b हवंति for हुवंति; d काअव्वओ अआरा वि; ३ वेणि for विणि; b हवंति; for हुवंति; 5 a चोदइ पदमतइअचलणे; c दुइअउ for दुवह[अ]; एत्तअउ for एत्तलउ; d होइ अवअंसत्थे; 6 a तेरह पदमे तइअए; c उवदुइअलक्खणं [इणं]; d होइ अवअंसत्थे; 7 b सेसेसु चोदहा हंति; c जाणिज्जह for जाणिज्जुह; d अवदुइअलक्खणअत्ति; 8 d ण मुदंतसमत्तगुरु; e अवरिमाण for अपुरिमाण; 9 a पाए वीए मुहचउत्थमि; b पदमंचअ for पदमं चिअ; गण for गणु; d तइअए तिअलंसए; e जिर for किर; 10 b गण for गणु; e ता for तं; करिणी for करिणि; 11 a जा अ for जा वि.

Ch. 8

v. 20 b दुअई for दुवई; d छड्डिणिआ वि पडिल्ला; 21 a सीजुत्तं for संहुत्तं; b मुणसु for मुणसु; d सत्तालं हवे कव्वं; 22 b कव्वंच for कव्वमि; c तहिं रुवेहिं अ रइअं; d तितालं तं मुणेजासु; 23 a छंदोरुवेहिं वेहिं जुअलं; b अ for च; c भवे for हुवे; d चक्कसमं तीअ जेहिं तु; 24 b पद्वडि-आहिं च अण्णरुवेहिं; cd रड्डावंधउ कव्व जाण मणअहिरामउ होइ; 25 a एकविसमत्ताणिहाणु उदामगिर; b चोदसा विस्साम थाउ मणविरइ थिरु; c समिद्व एउं for समिदु एउ; d तिकल for तिअल; अइमहुरअरु for अ[इ]महुरअरु.

राजशेखरकृतः छन्दःशेखरः ।

[In the following pages I am publishing again only the fifth chapter of Rājasekhara's Chandaśśekhara because this alone is at present available. The only MS. of this chapter written on palm leaves, exists at the Bada Bhandar of Jesalmir in Bundle No. 238. A copy of this was procured and presented to me by Muni Sri Jinavijayaji of the Bharatiya Vidya Bhavan with his usual kindness and generosity. The MS. consists of pp. 44 to 51 only, the first 43 pages which contained the earlier chapters being untraced at least for the present. Dalal's Catalogue does not mention this MS. among the other MSS. on Prosody in Bundle No. 238 and it is very likely that it was not there originally. Our MS. is $12\frac{1}{2} \times 1\frac{1}{8}$ inches in size; each page contains 6 lines, and each line contains on an average 60 letters. One or more letters put within the brackets in the following edition represent the correct form of the corresponding number of letter or letters immediately preceding the brackets. Like Hemacandra and Svayambhū, our author uses the terms ष, प, च, त, (always written as ट in my copy but corrected to त by me) and द in his definitions to represent groups of 6, 5, 4, 3 and 2 Mātrās, respectively. The copy, evidently following the MS., always writes तु for त्र and sometimes drops an obvious Visarga. I have corrected both mistakes, but otherwise I have tried to follow my copy faithfully. Letters in rectangular brackets are suggested additions.]

I. INDEX OF MĀTRĀ VṚTTAS

[N. B. The figures refer to the chapters and stanzas in the main text of the Svayambhūcchandas. Those preceded by P. refer to the chapters and stanzas in the Pūrvabhāga of the work printed on pp. 103-127. Those preceded by R. refer to the stanzas of Rājasekhara's Chandaśekhara printed at the end of the Pūrvabhāga, on p. 129, and the following. The figures within the brackets indicate the number of Mātrās in each Pāda in the case of the Sama Vṛttas; two figures show the Mātrās in the odd and the even Pādas respectively in the case of Viṣama Dvipadīs and Ardhasama Catuṣpadīs. Three figures within the brackets show the Mātrās in the three lines of each of the two halves of a Ṣaṭpadi. Four or more figures similarly show the Mātrās in the four or more Pādas in the Viṣama Vṛttas. Y. indicates a Yati after the Mātrā or Mātrās given immediately after it. द्वि=द्विपदी; च=चतुष्पदी; प=पञ्चपदी; ष=षट्पदी; अ=अष्टपदी.]

IV. INDEX OF AUTHORS

[The figures refer to the chapters and stanzas in the main text of the Svayambhūchandas; those preceded by P refer to the chapters and stanzas in the Pūrvabhāga of the work printed on pp. 103-127. The figures in bold type indicates the chapter, the next two refer to the stanza containing the definition and the illustration under it respectively. The probable Sanskrit equivalent of the name is given within the brackets.]

BRIEF NOTES

SVAYAMBHÜCCHANDAS: PŪRVABHĀGA, pp. 103-127

As my note on p. 102 explains I could not publish the Pūrvabhāga of the Svayambhūcchandas in its proper place. But while adding my notes I thought it proper to begin at the beginning of the work. I am therefore starting with the notes to the Pūrvabhāga. In the definitions of the metres which Svayambhū gives he mentions the constitution of a Pāda with the help of the Mātrā Gaṇas and not with the Akṣara Gaṇas even once. While indicating the nature of the Gaṇas, he generally mentions the position of either the short or the long letter in them and in all such cases, it is always to be understood that all the other letters in that particular Gaṇa are of the opposite nature. Thus when he speaks of a Caturmātra or a Pañcamātra with a short or a long letter at the beginning, middle, or the end, it is to be assumed that the other letters in that particular Gaṇa are long or short as the case may be. In the case of the Varṇa Vṛttas I have given also the constitution in the terms of Akṣara Gaṇas for easy comprehension.

I. SKANDHAKA-JĀTĪ

This is the first chapter of the work; it was obviously called Skandhaka-jāti by the author himself as he begins his treatment of the metres of the Gāthā class with Skandhaka instead of Gāthā as the others do. See also ch. 2.4 and 6.1 below; so correct the heading of the chapter accordingly.

1.1: This is an illustration for the rule that in Prakrit the letter *im* at the end of a word is optionally short. The first half of the illustration as also the rule itself are lost on the first folio of the manuscript. The stanza is identical with *Gāthāsaptasatī* I.70, where in the first half the word *davaggi-masi-maliāim* occurs with the short *im* at its end.

1.2: The stanza illustrates a short *him* at the end of a word; here it is short in the first, the second and the sixth words, but not in the third and the seventh.

‘Upendra is lying in his bed with his eyes from which sleep has departed, which are white at the sides, dark (at the centre, i.e., at the pupils) without collyrium, and very much contracted at the extremities (owing to their contact with the light).’

1.3: This stanza is quoted by Hemacandra under *H.* 1.10; but in its first half he reads *paccūsaguyavarummūliāe*.

'The white flowers, viz., the stars, of the creeper namely, the Night, when trampled upon by the elephant in the form of the Dawn, are falling down, while the bird, i.e., the Moon, has flown away.'

In this stanza (*im* in *dhavalāim* and) *e* in *nisālaāṇ* are short.

1.4: This too is from the *Gāthāsapaśatī* I.75; here *o* in *nahaalāo* is short. The ms. wrongly reads *nahaalāhi*, as the introductory words clearly show. 'Look how a flock of parrots descends from the skies, as if it were a necklace made of rubies and emeralds fallen off from the neck of the Lady of the Skies.'

1.5: *vodrahi* is a young girl; Hemacandra, *Prakrit Grammar* 2.80, quotes the portion *vodrahadrahammi paḍiā* to illustrate the *deśya* word *vodraha-hi*. I think he refers to our stanza and the proper reading seems to be *vodrahidrahammi* as the context shows. It is true that Hemacandra quotes *sikkhanti vodrahio* for the feminine form; yet when can a *vodraha*, i.e., a young man, be called a *draha*? 'They alone are fortunate, they alone good men; they live (truly) in this world, who alone easily rise up when fallen in the deep bed (of a river) in the form of a young woman'.

Here *hi* in the word *vodrahi* remains short even before the conjunct *dra*, since it has the consonant *r* in it.

1.6: The stanza illustrates how the letter *vi* remains short before the conjunct *ṇha* in *ṇhavaṇamisenam*, since it has *h* in it. Thus the rule which prescribes that 'the letters, which are normally long in Sanskrit and also in Prākṛit, may be short in Prākṛit' may be reconstructed to mean: The letters *im*, *him*, *e* and *o* at the end of a word, so also the letters which precede a conjunct having the consonant *h* or *r* in them remain optionally short in Prākṛit. We may compare for this *Kd.I.5-6*; *N. v.54*; *Ck. v.3*; *H. I.5-6*.

The stanza is an attack on the Liṅga worship of the Hindus; but it borders on obscenity.

2: 'In a Pāda there are five Gaṇas called *cha*, *pa*, *ca*, *ta* and *da* which respectively contain 6, 5, 4, 3 and 2 Mātrās (Kalā) in them. Thus indeed is being described whatever metre there is in this work on Prosody'. See *H. I.2*; also *Kd. I.2*. In the latter place, however, the names of the Gaṇas are different; they are the first letters of the five Vargas namely, *ka*, *ca*, *ṭa*, *ta* and *pa*. On the other hand, the names of Hemacandra and Svayambhū are the first letters of the words

Ṣaṇmātra (*Chammatto*), *Pañcamātra*, *Caturmātra*, *Trimātra* (*Timatto*) and *Dvimātra* (*Dumatto*) respectively. *eham* is *evam* rather than *etad*.

2.1: This is an illustration of a metre called *Aravinda*, whose *Pāda* contains all these *Gaṇas* in succession (6, 5, 4, 3, 2), thus 20 *Mātrās* in all. See *HPk.* 4.62 for the metre. *Svayambhū*, too, must have defined this metre under the *Khañjakas* in ch. 3 below; but that portion of the manuscript is missing. The name of the metre is introduced in the last line as in *Hemacandra's* illustration. In ours the face is identified with a lotus, the lips with its red petals, the teeth with its white pollen, the rays of the teeth with its filaments and the pupils of the eyes with the black bees. The same *Rūpaka* is used again in the third chapter (2.1). There is an obvious pun on the word *mitra* and *nidrā* in the third line.

3: 'In the hemistich of a *Skandhaka* there are eight *Caturmātras*; at the sixth place they must have a *Dvimātra* at the middle (i.e., they must be either a *Madhya-guru* or a *Sarvalaghu*). But a *Madhya-guru* shall not be employed at the odd places (i.e., at the 1st, 3rd, 5th and the 7th). There are seven (*Caturmātras*) and a half in the half of a *Gīti*; know that to be a *Samkīrṇaka* when both (i.e., the half of a *Skandhaka* and that of a *Gīti*) are (simultaneously) used.'

It is remarkable that *Svayambhū* defines the *Skandhaka* as the basic metre of the *Gāthā* group and not the *Gāthā* as almost all the other prosodists do. This is why he calls the metres of the *Gāthā* group by the name *Khandhaa-jāi* at ch. 2.4 and 6.1 below. The definitions of *Svayambhū* serve also as illustrations as a general rule; here the first half is that of a *Skandhaka* with which he has begun and the second is that of a *Gīti*. The two together form a *Samkīrṇaka*.

3.1: This is from the *Setubandha* of *Pravarasena*.

3.2-3: These two stanzas are from *Nanditāḍhya's Gāthālakṣaṇa* vv. 26 and 29, but here ascribed to *Bhīru* and *Kṛṣṇadatta* respectively.

4: 'Gīti itself is an *Upagīti* when the sixth (*Amśa*) consists of a single short letter (in both the halves); it is an *Udgīti* with only the first half (of this kind) and becomes a *Gāthā* with (only) the latter half (of this kind).' The stanza as a whole illustrates the *Udgīti*.

4.1-2: These two stanzas are similarly from *Nanditāḍhya's Gāthālakṣaṇa* vv. 28 and 27, but here they are ascribed to *Nipuṇa* and *Hāla* respectively.

4.3: 'On seeing the heavy load of the breasts and the slenderness of her waist, the line of hair (on the abdomen) is offered by the creator as a pillar (for support), through fear that (the waist) might break.' See 6.10-1 below for a similar idea.

5: 'Pathyā is (that Gāthā) where the pause (*virāma*) occurs after the third Gaṇa i.e., Caturmātra (in each half); that which is such only in the first half is Pūrva-pathyā. It is Para-pathyā when it is so only in the latter half; it is called Vipulā when there is no such pause in either half.' The stanza as a whole is an illustration of Pathyā. It deserves to be noted that this two-fold division of the Pathyā is peculiar to Svayambhū; others call the Pūrvapathyā as Jaghanavipulā and the Parapathyā as the Mukhavipulā. Svayambhū does not naturally mention, therefore, the divisions of the Vipulā into Sarva, Mukha and Jaghana as the others do. Perhaps he also intended that the Pathyā should be called Sarvapathyā, as is seen from the name Sarvacapalā used by him in v. 6 below.

5.1: The stanza is the same as *Gāthāsaptasatī* 2.97; but here it is ascribed to Bhogin.

5.2: The trembling heart of a love-lorn lady is here said to be shattered to pieces like a little water (in a small ditch on the ground) going up in a spray, when pressed down by the foot of an elephant.

5.3: 'The heart (*jīvam*) of the Lake with its crowds of fish, restlessly moving to and fro owing to the rising mass of mud (from the bottom) caused by the onrush of wild buffalos, becomes frightened as it were by the impending drought (of the summer).'

5.4: 'In the clear lake of the sky, the pollen of moon-light sparkles on the expanded lotus of the moon which is opened by the bee in the form of the deer, i.e., the black spot.'

6: 'It becomes a Sarvacapalā with Gurumadhya (Caturmātras) at the second and the fourth (places), when they are surrounded by long letters.' The word *gurumajjhagoarehiṃ* is to be understood as equivalent to *gurumajjhagoarehiṃ gurumajjhehiṃ*, i.e., with the Gurumadhyas found between the two Gurus, one on either side of them. The first word of the second half of the stanza indicates that the two divisions of Capalā, i.e., Pūrvacapalā and Paracapalā were defined in it. Thus in a Capalā we must have a long letter before the second Caturmātra and also after the fourth one, both of which must be Jagaṇas, while the third must consist of two long letters. Com-

pare *Kd.* 2.7; *N.* 19; *Ck.* 64-66. Here the defining stanza does not serve as an illustration unless we read *bīāutthesu* or something like that.

7.1: This is an illustration of the Avaskandhaka where the first half is that of a Skandhaka (with eight full Caturmātras in it), while in the second half the 6th Amśa contains only a single short letter instead of a full Caturmātra, (as in the fourth line of a Gāthā; but at the eighth Amśa here we have a full Caturmātra instead of a single long letter in it). See *HPk.* 4.8: *Kd.* 2.9 com. On the missing folios namely Nos. 4 and 5 we probably had the illustrations of the three Capalās, the definitions and illustrations of the three kinds of Gītis, Ripucchandās, Lalitā and Bhadrīkā, and the definitions of the three kinds of the Skandhaka together with the illustrations of the first two of them. The variety that is illustrated in 7.1 is Avaskandhaka. For the other two varieties Upaskandhaka and Utskandhaka see *HPk.* 4.6-7; *Kd.* 2.9 com.

8: 'If in the first half of a Gāthā, a pair of Caturmātras is added successively (before the final long letter), it is respectively called by the name Gāthā, and the same (word) preceded by *ud*, *vi*, *ava*, *sam* and *upa*. If additional pairs of Caturmātras are used, it is called Mālāgāthā.'

Thus a Gāthā has 9 Caturmātras, Udgāthā has 11, Vigāthā has 13, Avagāthā has 15, Saṁgāthā has 17 and Upagāthā has 19 Caturmātras in their first half before the final long letter. The second half in each case is that of a Gāthā. See *HPk.* 4. 11-12 and *Kd.* 2. 12-13. Jātiphalā which has only 8 Caturmātras at the same place (together with its derivatives like the Dāma etc.) and Gāthini which has 21 are mentioned by both Hemacandra and the commentator of the *Kavidarpaṇa*; but they are ignored by Svayambhū. On the missing folio No. 7 we have very likely the definitions and illustrations of a few main Galitakas, for which see *HPk.* 4.17-25.

II. GALITAKAJĀTĪ

1.1: The stanza containing the praise of Jina is an illustration of Mālāgalitaka; the manuscript contains only the last two lines. A stanza in this metre contains in each of its four Pādas a Ṣaṇmātra followed by ten Caturmātras, of which those in the odd places shall not be Madhyaguru or Sarvalaghu. See *HPk.* 4.25. The Pādas must of course be rhymed.

2: 'That same (Mālāgalitaka) they call Mugdhagalitaka when it has two

Caturmātras less and has a long letter at the end (of each Pāda). Thus the Mugdhagalitaka has only eight Caturmātras following the initial Ṣaṇmātra and has a long letter at the end of each Pāda. This long letter, however, is not in addition to the Caturmātras, but is a part of the last Caturmātra which must end in a long letter. See *HPk.* 4.26.

2.1: The illustration contains a praiseful description of the feet of the Jina.

3: 'It is an Ugragalitaka when two more Caturmātras are removed from the Pāda and when there is a long letter at the end (of the last Caturmātra).' Thus Ugragalitaka has only six Caturmātras after the initial Ṣaṇmātra. In this as also in the Mugdhagalitaka the general rule, that the Caturmātras at the odd places shall not be Madhyaguru and those at the even places must be either Madhyaguru or Sarvalaghu, has to be observed as in the Mālāgalitaka. See *HPk.* 4.27. The illustration is unintelligible.

4: 'All the other metres leaving aside the Daṇḍakas and the metres of the Skandhaka class are called Galitakas when they are rhymed.' Metres of the Skandhaka class are the Gāthā and its derivatives. Svayambhū calls them metres of the Skandhaka class because he has taken the Skandhaka as the basic metre as seen at ch. 1.3 above. See also *HPk.* 4.40 com. Hemachandra, however, calls this as the view of 'Some'. The commentator of the *Kavidarpaṇa* merely repeats what Hemacandra has said about the Galitakas, the Khañjakas and the Śīrṣakas; cf. *Kd.* 2.23 com.

The other Galitakas like Sundarā, Bhūṣaṇā and others defined at *HPk.* 4.28-40 are neglected by Svayambhū.

III. KHAÑJAKAJĀTI

1: 'Devoid of the Yamaka, faultless as regards their Pādas and having an even number of Pādas—thus are the Galitaka-Khañjas described by clever men.'

Khañjakas are Galitakas themselves, but they are said to have no Yamaka. Hemacandra's directions are also similar at *HPk.* 4.41. But the commentator of the *Kavidarpaṇa* on *Kd.* 2.23 lays down that both the Anuprāsa and the Yamaka must be present in the Khañjakas. As a matter of fact all the illustrations of the Khañjakas given by Hemacandra have the Pādānta Yamaka as a rule and this is true even of the illustrations given by Svayambhū in this chapter. It is, therefore, difficult to see what exactly is meant by the direction about

the Yamaka. *Sarisacaranāim* means that the Khañjaka shall ordinarily be a Sama Catuspadī and it corresponds to the word *samāṅghri* in Hemacandra's definition at *HPk.* 4.41. The significance of the word *pāavisuddhāim* in Svayambhū's definition is, however, not clear. It will be noticed that both the words Galitaka and Khañjaka are expressive of a class as well as of individual metres.

- 2: 'In a Khañjaka there is a pair of Trimātras, three Caturmātras, one Trimātra and a long letter in succession.' Here the word is used as the name of an individual metre as at *HPk.* 4.42 and *Kd.* 2.23.
- 2.1: For the Rūpaka in the stanza see above ch. I.2.1. Here, however, there is nothing corresponding to *rasanāraoḥam* in that passage.
- 3: 'A Khaṇḍa is made with two Caturmātras and a Pañcamātra.' Since Svayambhū's definitions are also illustrative of the defined metre, we must read *kkaam* for *kaam*. See *HPk.* 4.45 and *Kd.* 2.22.
- 3.1: The illustration is from Śrīharṣa's *Ratnāvalī* and is a part of the Dvipadī-Khaṇḍa which is wholly quoted by Svayambhū under the Śiṣakas at ch. 4.1 below.

On folios 9 and 10 which are lost, a few Khañjakas including the Aravindaka which is illustrated at ch. I. 2.1 above and the well-known Dvipadī of four Pādas which is referred to in the next stanza seem to have been defined and illustrated. For these refer to *HPk.* 4.46-58.

- 4: 'Dvipadī itself becomes Kāmalekhā when it is devoid of the single short letter immediately preceding the last long letter in its Pādas'. See *HPk.* 4.59 and *Kd.* 2.24.2 com. For the name Dvipadī as applied to a metre of four Pādas see *Vjs.* Introduction para 5.

4.1: The meaning of the illustration is not at all clear to me.

- 5: 'In a Māgadha Narkuṭī, whose seventh and tenth Mātrās consist of short letters and which has three long letters at the end (of its Pādas), there are four Caturmātras immediately following an initial Ṣanmātra.' This means that the first of the four Caturmātras is either a Madhyaguru or a Sarvalaghu, the second is any one of the five kinds, the third is either a Sarvaguru or an Antyaguru, while the last is necessarily a Saryaguru. In the second line of the definition, we have probably to read *sattamadahamalahuae*, if it is to serve as an illustration as it is very likely intended to be. See *HPk.* 4.63. This metre is virtually the Narkuṭaka of Virahāṅka at *Vjs.* 4.25, though the latter's definition is differently worded. Virahāṅka, however, seems to consider Narkuṭaka as a common name, since at *Vjs.* 4.34 he illustrates

Adilā in the form of a Narkuṭaka, which seems to contain 21 Mātrās in its Pādas, as against our 22. It is curious to note that both the definition and the illustration of Svayambhū observe the conventional rule mentioned by Virahāṅka's commentator of *Vjs.* 4.25, namely, that the letters *āe* ought to occur at the end of every Pāda. Hemacandra does not either mention or observe this rule in his work.

5. 1: The illustration is beyond comprehension.

6: 'If there are two short letters immediately before the last (long letter), it is Narkuṭaka.' The Māgadha Narkuṭi itself is called simple Narkuṭaka when the last Caturmātra is Antyaguru. *Upanidhana* is *upāntya*. For the metre see *HPk.* 4. 64.

6.1: The stanza describes the love-lorn state of a woman immediately after the departure of her lover. It is ascribed to Udbhaṭa.

7: 'If both the final and the penultimate Caturmātras are Antyaguru, (the same metre) is called Sama Narkuṭaka.' *HPk.* 4. 65 directs that the last three Caturmātras shall all be Antyaguru; Svayambhū's illustration conforms to this rule and so very likely the definition is to be understood a little differently. Thus the word *be* is to be construed only with *uanta* and not with *nihāṇa* and *uanta* both: Thus *nihāṇa*, *uanta be*, *ca*, i.e., the final and the two penultimate Caturmātras should be *paragā*, i.e., Antyaguru.

In all the three Narkuṭakas the first Caturmātra which immediately comes after the initial Ṣaṇmātra, is generally a Madhyaguru as seen from Svayambhū's illustrations and definitions as also from Hemacandra's illustrations. In the case of the last, i.e., the Sama Narkuṭaka, Hemacandra actually prescribes a Jagāṇa.

7.1: The stanza gives a beautiful description of the person of the Tīrthankara Puradeva.

8: 'All the three kinds (of the Narkuṭaka) become Taraṅgaka, if a Trimātra (i.e., a Laghu and a Guru) is substituted for the last Caturmātra. See *HPk.* 4.66. Virahāṅka's Taraṅgaka is much different. It is virtually a Varṇa Vṛtta with 14 Akṣaras in a Pāda (four Bha Gaṇas and two Gurus). See *Vjs.* 4.22.

8.1: The stanza is unintelligible.

The line which follows very likely defined Pavanoddhuta which is the same as Taraṅgaka, but with a long letter added at the end of its Pādas. See *HPk.* 4.67. On the missing folio No. 12, we had

probably the illustration of the Pavanoddhuta and the definitions and illustrations of the Nirdhyāyikā of three kinds as also of the Adhikākṣarā and its derivative Mugdhikā; for all these see *HPk.* 4.68-70.

- 9: 'That Adhikākṣarā itself becomes Citralekhā when a Pañcamātra stands at the first place (instead of the Caturmātra).' The ms. reads *Candalehiā* both in the definition and in the introductory words; but according to *HPk.* 4.71 (and Hemacandra closely follows Svayambhū in this matter) it is Citralekhā. An Adhikākṣarā has five Caturmātras followed by a Pañcamātra at the end; of the Caturmātras those at the even places must not be Madhyaguru. See *HPk.* 4.69 and *Vjs* 4.24. Curiously enough, Virahāṅka prescribes a Yati after the 12th Mātrā and this is practically the only place where a Yati is mentioned by him. Virahāṅka also lays down that the Caturmātra in the third place must be a Madhyaguru or a Sarvalaghu; the illustrations of both Svayambhū and Hemacandra observe this direction, which is, however, not actually mentioned by them. It should be noted that in Svayambhū's definition the fourth Caturmatrā (*kharācci*) is a Madhyaguru against rule; yet in the illustration it is not so.

- 9.1: The illustration contains a request and an address of a love-lorn girl to the moon; but the exact meaning is not clear.

- 10: 'Adhikākṣarā itself becomes Mallikā when there are two Pañcamātras at the commencement (instead of the two Caturmātras of the Adhikākṣarā).' See *HPk.* 4.72. Even here the fourth Caturmātra (*kkharaccè*) is a Madhyaguru as in v. 9 above, though the illustration observes the rule about the Madhyaguru Caturmātra correctly.

- 10.1: In the second line the letters *āṇṇa* are not rightly reproduced in the ms.; we rather expect a word of three letters with a long letter in the middle (i.e., a Jagāṇa) and meaning 'pollen' or the like. The stanza is a description of the advent of the autumn when the village borders are filled with ripe corns and fully grown grass, while the paths of the intending travellers (*honta pahia*) become covered with flowers wafted by the wind and crowded with the bees which keep hovering around, being attracted by the fragrance. The simile in the first line is based on a Śleṣa on the word *dīhasāsīā* (*dīrghasasyakā* and *dīrghaśvāsikā*).

- 1: 'They call it (i.e., the Adhikākṣarā) a Dīpikā when it is possessed

of Pañcamātras (in place of the Caturmātras) at the first, the second and the fourth places.' See HPk. 4.73.

11.1: The idea seems to be: The moon went to the crown of the hair of Lord Śiva, being dejected at the defeat which he suffered at the hands of the Lady's face. But there too he could not find rest and remembering his glory in the sky when he was formerly there, he returned to the sky even when he was compelled to fall at her feet (as suggested by his reflection in the nails), thus acknowledging defeat. In the last line perhaps read *paanahappadimā* for *pañhiappa-dimā* or *pañhiappadimā*.

12: 'If all the above ones are found (promiscuously employed), they call it (i.e., the Adhikākṣarā) Lakṣmī.' This means that in Lakṣmī Caturmātras or Pañcamātras may be used at the poet's option at the first, the second and the fourth places, whereas a Caturmātra alone must be used at the third and the fifth places and a Pañcamātra alone at the sixth or the last place. See HPk. 4.74.

12.1: The illustration is quite unintelligible. Madanāvatāra and its derivatives given after this by HPk. 4.75 are not given here by Svayambhū, who, however, defines only the first, i.e., Madanāvatāra under the Apabhraṁśa metres in Ch. 8 (p. 93).

IV. ŚIRŚAKĀṆI

1: 'If a double Avalambaka is composed with a Gīti at its end, wise men call it itself a Dvipadīkhaṇḍa.' According to the usual practice of Svayambhū the definition itself must serve as an illustration and so the third line of the stanza should have been the latter half of a Gīti; but it would appear that a whole stanza in the Avalambaka metre alone is here used by him. (Avalambaka is a Khaṇḍa as HPk. 4.48 lays down and as Svayambhū too must have said on the missing folios Nos. 9 and 10).

1.1: This is from Śrīharṣa's *Ratnāvalī* Nāṭikā, the first part of which was quoted by Svayambhū on Khaṇḍa in ch. 3, v. 3 above.

1.2: This is a beautiful description of the approaching rainy season and of how the pride and displeasure fast disappears from the hearts of unreconciled ladies during love sports. The word *āarannamthāvio* in the last line makes no sense; perhaps read *āara natthāvio a*.

2: This stanza defines a Dvibhaṅgī consisting of a Dvipadī and a Gītikā. But the metre of the defining stanza is very uncertain. Very likely the

first line is intended to be that of a Dvipadī with 28 (6, 4 x 5, 2) Mātrās in it and the second that of a Gītikā with 32 (4, 4, 5; 4, 4, 4, 5, 2) Mātrās in its half. We may correct the second by reading *jahicchiehim rūaehim*; while the first requires two more short letters (one after *puno* and another after *bajjhai*) to make it a Pāda of the Dvipadī. So perhaps read *punovi* and *bajjhai a*. The Gītikā meant here in the definition is clearly the Bhadrīkā Gīti, in which the 3rd and the 7th Caturmātras are substituted by Pañcamātras in both the halves. Virahāṅka called this variety by the name Gītikā in order to distinguish it from the usual Gīti at Vjs., 2.2-3. Very likely even Svayambhū might have followed him, though Hemacandra does not seem to have noticed this distinction, since a Gītikā is mentioned as a Gīti by him at HPk. 4.73 while defining a Dvibhaṅgikā. His illustration here contains a Bhadrīkā, but he calls it a Gīti. The Pañcamātras thus used are either the Madhyalaghu (SIS) or the Caturthaguru (IIS) ones according to the directions of Virahāṅka at Vjs. 1.30 and the diminutive termination with the feminine ending (*kā*) is clearly suggestive of the delicacy which is lent to the metre by these. Even the Dvipadīkhaṇḍa of Śrīharṣa may have contained a Gītikā and not a Gīti (cf. v. 94 under HPk. 4.77), though Svayambhū's illustrations above do not suggest this. In the case of the present metre, namely the Dvibhaṅgikā, however, Svayambhū clearly wants a Gītikā (i.e., the Bhadrīkā of Hemacandra) as the words *duhaṅgiā* and *rūaehim* in the definition show (Pañcamātras of the Madhyalaghu type being used at the 3rd and the 7th places in the line which is intended to be a Gītikā—second half—according to his usual practice).

- 2.1: The description seems to be of the Spring and its effects on the lovers, as suggested by the fourth line. But the readings of the ms. are very defective. The same is true of the next stanza.
- 3.1: This is an illustration—merely the last or the fourth Pāda of it—of the Samaśīrṣaka, which takes place when an even number of Caturmātras is added in the first half of a Gātha before the final long letter, the second half being that of a usual Gāthā. For the Gātha see above ch. 1.8 and for the Samaśīrṣaka see HPk. 4.82.
- 4: We must suppose that on the missing folios Nos. 15-17, Svayambhū must have defined and illustrated the other kinds of the Dvibhaṅgis, and also the Tribhaṅgis, if we are right in our surmise that Hemacandra has generally followed the order of metres adopted by Svayambhū.

- 4: That indeed is a Viṣamaśīrṣaka when at the end of a Pāda of the Mālāgalitaka pairs of Caturmātras in uneven numbers are added.

For the Mālāgalitaka—only its illustration—see above ch. 2.1.1: It contains in its Pāda a Ṣaṇmātra followed by 10 Caturmātras, of which those in the odd places shall not be Madhyaguru and those in the even places shall be either Madhyaguru or Sarvalaghu; see HPk. 4.25. For the Viṣamaśīrṣaka see HPk. 4.83. Our defining stanza is not correctly reproduced in the ms. It should have read *mālāgaliaassa pāāvasāṇaammi a caārā* etc. In the defining stanza we have three pairs of Caturmātras added at the end of the Pāda of the Mālāgalitaka; i.e., we have a Ṣaṇmātra followed by 16 Caturmātras in a Pāda. But in the illustration, seven pairs of Caturmātras are added, so that we have in each Pāda, a Ṣaṇmātra followed by 24 Caturmātras. The stanza is incomplete, about seven Caturmātras in the last Pāda being lost. It contains a description of some mountain, but it is unintelligible in many places.

After this a large number of folios of the ms. is lost; it is very difficult to say what they contained. Evidently they contained only what could be called Prākṛit metres, since Swayambhū himself says at the end of Ch. III in the main work above (p. 51) and at the beginning of Ch. IV (p. 52) that the Prākṛit metres were dealt so far. So from a reference to Hemacandra's *Chandonuśāsana*, Chs. I to IV, we find that the only group of metres besides the Māgadha Jāti which forms the subject matter of the next chapter, that could have been defined and illustrated on these missing folios is that of the Vaitāliya and its derivatives. But this in itself could not occupy so many folios. Perhaps the figures showing the serial number of the folios are misread by me.

V. MĀGADHAJĀTI

It is worth noting that Swayambhū defines and illustrates the Pādākulaka, which is nothing but a mixture of the different metres that are defined in this chapter, at the beginning instead of at the end of the chapter. Another thing that deserves notice is that Mātrāsamaka and other metres of the class are considered as belonging to the Māgadha Jāti, i.e., the Class or Group of metres to which the Māgadhikā belongs and this latter is certainly a derivative of the Vaitāliya. Virahāṅka says that Vaitāliya itself is called Māgadhikā when it is composed in the Māgadhi language, i.e., when the main characteristics of that language, namely the substitution of *la* and *śa* for *ra* and *sa* are present in it; see Vjs. 4.28.

Hemacandra defines Māgadhi among the derivatives of the Vaitāliya and considers it along with the latter as a Sanskrit Mātrā Vṛtta. The only difference between the two is that in the Māgadhi two short letters may be substituted for any of the two long letters of the Ragaṇa that is necessary in a Vaitāliya; see *Kd.* 2.28 and note on it. It is, therefore, quite likely that Svayambhū began the present chapter with the definition of the free Māgadhi (i.e., the one which is without any restrictions about the Akṣara Gaṇa or Gaṇas that may be used in it), which is defined at *H.* 3.62 and *Kd.* 2.28, or with the nominal Māgadhi of Virahāṅka which is concerned only with the language rather than with the constitution of the metre. This view of Svayambhū, namely that the Mātrāsamaka and its derivatives belong to the Māgadhi or the Vaitāliya Jāti, may be said to lend support to my contention that most of the Mātrā Vṛttas and among them those of the Mātrāsamaka (the name is significant) class, were originally cultivated and developed among the Prākṛit bards and then later adopted among the Sanskrit metres. But in the process of adoption, they were totally shorn of their original element of Tāla which must be supposed to have been an essential characteristic of ancient bardic poetry, as it was sung and not merely recited. See *Jayadāman*, Introduction para 17 (p. 24) and *Apabhraṃśa Metres* III in *Bhāratakaumudī*, Allahabad 1947, p. 1075, para 10.

- 1.1: The stanza is an illustration of Pādākulaka which is also found at Hemacandra's *Chandonuśāsana* (NSP. ed) p. 26, 11.17-18 and *Kd.* 2.20.4. At the latter place the author of the stanza is said to be unknown.
- 2: 'When the 9th (out of the 16 Mātrās in a Pāda of the Pādākulaka) is represented by a short letter, it is called Mātrāsamaka.' In the definition of the Pādākulaka Svayambhū must have mentioned the general condition of the metres of this group, namely, that out of the four Caturmātras of which the Pāda is made up, the first shall never be a Madhyaguru or Jagāṇa. See *H.* 3.65; *Kd.* 2.19: P. 4.42.
- 2.1: The white mango blossoms and the red Aśoka flowers are here conceived as the white and red flaglets on the palace of Madana.
- 3: 'In Vānavāsikā the third Caturmātra is a Madhyaguru (or a Sarvalaghu).' The correct reading seems to be *urado* and not *urago*. Others define it as one where the 9th and the 12th Mātrās are represented by short letters. *urado* means a Caturmātra which has a Dvimātra in the middle, i.e., either a single long letter or two short ones. See *H.* 3.69; *Kd.* 2.20; P. 4.43.

- 3.1 : A love-lorn lady is here compared with the young crescent moon, who is lovely yet thin and slender.
- 4 : 'In Viśloka the 5th and the 8th (Mātrās) are represented by short letters.' This means that the second Caturmātra is a Madhyaguru or a Sarvalaghu. See H. 3.67; Kd. 2.19; P. 4.44.
- 4.1 : The meaning is not sufficiently clear.
- 5 : The definition of Citrā is not correctly reproduced in our ms. Perhaps we may read *pañcatṭhaṇamama lahu ṇam cittā* : 'Citrā has the 5th, the 8th and the 9th Mātrās represented by short letters.' See H. 3.68; Kd. 2.20; P. 4.45.
- 5.1 : The heart of a love-lorn lady is said to be evaporated like the water lying in the small impression on the ground made by a cow's hoof. See above ch. I.5.2. for a similar idea.
- 6 : 'If the 9th (Mātrā, together with the 10th) is represented by a long letter, it is Upacitrā.' See H. 3.66; Kd. 2.20; P. 4.46.
- 6.1 : The dark clouds, the rain-bows, the flashes of lightning and white cranes all appear as if they are the art-drawings drawn with different gems by Madana, the god of love. What is *marīa* ?

VI. UKTĀDIVIDHI

- 1 : So far the Skandhakajāti (i.e., the Gāthā and others), the Galitakajāti, the Khañjakajāti, the Śiṛsakas and the Māgadhajāti are defined and illustrated. Hereafter Svayambhū proposes to define and illustrate Uktā and the others. It is noteworthy that Svayambhū treats the metres of the 26 classes like Uktā, Atyuktā, etc., as Prākṛit metres, and what is more, defines them with the help of the five Mātrā Gaṇas mentioned above in ch. I. v. 2 above and not with the Akṣara Gaṇas as is done by others by whom they are regarded as Varṇa Vṛttas. I shall explain the definitions according to Svayambhū's way, but shall also give the formula in the terms of the Akṣara Gaṇas for easy comprehension.
- 2 : 'The metres like the Ukta, which begin with a single letter in their Pāda and end with 26 letters in a Pāda, are made with all short and long letters, have 4 Pādas as a rule, and have a pause after the first half.' The expression *saalalahūguruāim* means that in these metres the letters whether short or long must be employed according to directions, and that a long letter cannot be substituted by two short ones and vice versa, as was permitted in the case of the earlier metres. In short, these are Varṇa Vṛttas and shall be defined with the help of

certain definite types of Mātrā Gaṇas and not with that of the Mātrā Gaṇas in general. So in each case Svayambhū will mention the Caturmātras and other Gaṇas of a particular type and will not merely say Caturmātras or Pañcamātras or so.

3: 'The Ukta is formed with a single letter (in its Pāda); the Atyukta with two letters, the Madhyama with three, the Pratiṣṭhā with four and the Supratiṣṭhā has five letters (in its Pāda).'

3.1-5: These are the illustrations of the varieties defined in v. 3. Hemacandra, Jayakīrti and Prākṛta Piṅgala define all the four varieties of Atyuktā and all the eight of the Madhyamā Jāti. Svayambhū defines only one (containing both long letters) of the Atyuktā and only three of the Madhyamā Jāti. The latter are those that contain a Sagaṇa, a Ragaṇa and a Yagaṇa respectively. He does not give any specific names to these three as is done by Hemacandra and others. It is true, however, that there is no agreement about their names among them.

4: 'Two long letters and three Trimātras each ending in a long letter—these are the Amśas of the Nārācaka.' (*ta-ra-la-ga*). See H. 2.78; Jk. 2.70.

4.1: 'A few elephants move about with their temples pierced by shafts, attacking the unassailable enemy, etc.'

5: 'If the order (mentioned in the last metre) is reversed it is called Samānikā.' This is a peculiar definition of Samānikā. Usually Samānikā is said to be the opposite of the Pramānikā in respect of the order of short and long letters and its last letter is short; but Svayambhū thinks that Samānikā is the opposite of the Nārācaka, which means that the last letter in Samānikā is not short but a long one. Thus in the Samānikā we have three pairs of long and short letters and two long letters at the end (i.e., *ra-ja-ga-ga* instead of *ra-ja-ga-la*). For an almost identical wording, but with a different signification see Kd. 4.18. Also see H. 2.83; Jd. 5.3 etc.

5.1: 'Look at these lotuses, visited by swarms of fish, awakened by the rays of the sun and covered with impassioned bees.'

6: 'Citrapadā has three Caturmātras, of which the first two have a long letter at the commencement, while the last one consists of all long letters.' *aṅga-gaūra* is one whose 'body' consists of long letters (*bha-bha-ga-ga*); cf. H. 2.75; P. 6.5. Virahāṅka at Vjs. 5.11 and Jayakīrti at Jk. 2.67 call this metre by the name Vitāna.

6.1: 'In the grove of the heated mountain a branch of the Kimśuka tree

moves to and fro and looks as if it were the lolling tongue of the thirsty mountain.' The word *kuñjare* in the first line is wrong; it ought to be *kuñje*.

7: 'The four Trimātras which contain their short letter respectively at the end, at the beginning, at the end and at the beginning, make a Mānavaka.' (*bha-ta-la-ga*). See H. 2.77; P. 6.4; it is called Mānavaka-kṛīḍitaka at Vjs. 5.12 by Virahāṅka.

7.1: 'Look at this mass of clouds; or is it the dark jaw of Kāla with its fangs in the form of the moving cranes, eager to devour a multitude of travellers.'

8: The definition of Br̥hatī is missing; it is *na-ra-ra*. See H. 2.89.

8.1: 'The lovely Kadamba trees have blossomed; the black bees are humming. Being struck with the fragrance (of the Kadambas), the travellers have fainted and fallen on the ground.'

9: '(Four) Trimātras, the first two with a short letter at their end, the third with all short letters and the fourth with a short letter at the beginning make a Halamukhī.' (*ra-na-sa*). See H. 2.90; P. 6.8 and Kd. 2.20.

9.1: 'Your breasts are heavy and firm; you are slender in your waist. Oh daughter go gently; (otherwise), you will only be broken in no time.'

10: 'Bhujagaśiśusṛtā is said to consist of two Ṣaṇmātras, the first containing all short and the second, all long letters.' (*na-na-ma*). See H. 2.91; P. 6.7. It is called Bhujagaśiśubhṛtā by Kedāra at Vr. 3.21 and Madhukarikā by Bharata at Bh. 16.18.

10.1: 'You wander, oh noble one, being slim; how indeed you sustain with effort your heavy breasts on your (slender) waist, owing to the pride of the support which you claim from your three wrinkles (on the abdomen).'

11: The definition of Pañktikā is missing; (*ra-ya-ja-ga*); see H. 2.108. It is known as Mauktika to Jayakīrti at Jk. 2.93.

11.1: 'That person who always develops affection, who is desired, whose name and body are good, who is dear, clever and long-lived, is not to be found in every man's house.' See *Uttararāmacarita* I.39.

12: 'This again is Mattā in prosody, which ends in two long letters and has four long and four short letters in succession (at the commencement).' *gaddhī* is *gā abdhayah*, and *laddhī* is *lā abdhayah*; *abdhi* is four. (*ma-bha-sa-ga*); see H. 2.107; P. 6.13.

- 12.1 : 'I fancy that the flashing circlet of lightning in the centre of a cloud on the opening night of the rainy season is as it were the heart of that cloud trembling through fear of the sharp winds of the summer heat.' Perhaps read *gimhumha* in the last line and cf. ch. I. 5.3 above for a similar idea.
- 13 : 'Four Trimātras, each ending in a short letter and two long letters (after them) (make a Pāda) of Mayūrasāriṇī.' (*ra-ja-ra-ga*); see H. 2.111; P. 6.12; Kd. 4.23.
- 13.1 : "Look, oh shy one, at the peaks of the Vindhya mountain, inhabited by intoxicated elephants, rubbed against by a mass of clouds and (looking) eager to reach the sun and the moon.'
- 14 : The wording of the definition is not clear; it probably means that Upasthitā contains three Caturmātras, the first having all long letters and the next two having a long letter at their end, followed by a Trimātra which has a short letter at its commencement. So perhaps read *cā* for *gā* in the first line and *to* for *tā* in the second. (*ta-ja-ja-gā*); see H. 2.120; P. 6.14.
- 14.1 : 'The sky is seen overcast with clouds; (so are seen) the flashes of lightning and the rain-bow. The lovely days bring eagerness even to (the minds of) those who have their beloved one by their side.' See *Meghadūta* v. 4.
- 15 : 'That is Rūpavatī or Rukmavatī which has three Caturmātras, the first having a long letter at the beginning, the second having two long letters and the third having a long letter at the beginning, followed by two long letters at the end.' (*bha-ma-sa-ga*); see H. 2.113; P. 6.11; *Virahāṅka* at Vjs. 5.18 calls it Campakamālā, but it is known as Puṣpasamṛddhi to Bharata at Bh. 32.227 and as Subhāvā to Hemacandra, who mentions it as an alternative name in his commentary on H. 2.113.
- 15.1 : 'Sandal-paste, moon-light, wine, notes of the cuckoo, camphor, lotus and the lute, all these give pleasure to men (when they are at home; but) they give pain to them when they are on a journey.'
- 16 : 'There are four Caturmātras in the Pāda of a Paṇava, which respectively have the long letter at both the places, at the commencement, at the end and in both places.' (*ma-na-ya-ga*); see H. 2.110; P. 6.10; Bharata calls this Kuvalayamālā at Bh. 16.20.
- 16.1 : The description is of the Mākanda trees covered with fresh blossoms and crowded with the warbling cuckoos; but the last two lines which contain some Rūpaka are not very clear.

- 17: 'That is Śuddhvirāṭikā in which there are five Amśas, namely, four Trimātras and a Caturmātra which precedes them and contains all long letters, while of the Trimātras the first has a long letter at the beginning, and the last three have it at the end. In prosody, it is pleasing to all people.' (*ma-sa-ja-ga*); see H. 2.109; P. 6.9; Kd. 4.24.
- 17.1: 'It seems as if the cloudy sky is falling down crying, being pierced with a fierce lance of lightning by the wrathful king viz., Rainy Season, armed with a bow, namely, the rain-bow.'
- 18: 'Dohaka (Pāda) is formed with four Caturmātras, the first three of which have the long letter at the beginning, while the last one has all long letters.' *tiṭṭhihiā vāavvā* 'Now Triṣṭubh is to be defined.' Such introductory sentences regularly occur in the portion of the chapter that is given earlier; but it occurs only here, that is, in the Pūrvabhāga. (*bha-bha-bha-ga*); see H. 2.130; P. 6.18; Kd. 4.29.
- 18.1: 'Look, how Grīṣma (Summer), who is ambitious (to rule), is killed with volleys of arrows in the form of streams of shower, by the Rain-god, who is a good friend of Mahendra (Lord of the gods) and mounted upon the elephant of the cloud.'
- 19: 'Five Trimātras, each with a short letter at its end, followed by a long letter at the end:—Such are the Amśas of Niśśrenikā.' (*ra-ja-ra-la-ga*); see H. 2.144; P. 6.25; Kd. 4.31. In all these places the metre is called Śyenī or Śyenikā; but the name Niśśrenikā is mentioned by Hemacandra in his commentary on H. 2.144 and ascribed merely to *Anye*. Jayakīrti at Jk. 2.102 calls it merely Śreni which is nearer to Svayambhū's Niśśrenikā.
- 19.1: 'Look, oh shy one, this flashing lightning, which is cutting short the life of travellers, shattering the peaks of mountains and lolling its tongue like a Siñcana (bird).'
- 20: 'Bhramaravilasitā has two Ṣaṇmātras, the first having all long letters and the second having the long letter at the commencement, followed by a Caturmātra at the end in which the long letter is the last of all.' (*ma-bha-na-la-ga*); see H. 2.138; P. 6.21; Vjs. 5.23.
- 20.1: 'In the rainy season a circular mass of clouds is gracefully moving with water spread out all over it; who indeed has held this clay-pan with its mouth turned upwards and filled with black ink?'
- 21: 'In Svāgatā there is a pair of Trimātras and a pair of Caturmātras, each of the former ending in a short and each of the latter in a long letter, followed by a long letter at the end of all.' *e* in the first half is short;

it is difficult to interpret the second line properly, though the meaning is clear. (*ra-na-bha-ga-ga*); see H. 2.141; P. 6.29; Kd. 28. At Vjs. 4.19 this metre is called Parinandita.

21.1 : 'Look; the flash of lightning moving about the dark cloud appears as if it were a streak of flaming fire, now visible and now invisible, on the summit of a mountain which is almost burnt out.'

22 : 'Rathoddhatā has (in its Pāda) three Trimātras, the first two having a short letter at their end, followed at the third place by a Caturmātra which, and also the last Trimātra, have a long letter at their end.' (*ra-na-ra-la-ga*); see H. 2.141; P. 6.22; Kd. 4.27.

22.1 : The sky is conceived as a house full of darkness due to clouds; but the idea in the second half is not intelligible.

23 : 'In Subhadrikā there are three Trimātras, each having the short letter at the beginning, which come after a Pañcamātra which has all short letters.' (*na-na-ra-la-ga*); see H. 2.143; Kd. 4.30. In both these places the metre is called Bhadrīkā.

23.1 : "See how the crescent moon resting on the edge of a fresh cloud looks attractive as if it were the fang of the great Hog in the form of the sky, at the end of the world, having the colour of a white lotus stalk.'

24 : 'They call it Ekarūpa when there are a Ṣaṣmātra with all long letters, two Caturmātras, the first with a long letter at the end and the second having it in the middle, and a pair of long letters (in a Pāda) in succession.' (*ma-sa-ja-ga-ga*); see H. 2.146; Jk. 2.113 (where, however, a Yati is mentioned after the 6th letter). It is also called Maṇi at Jk. 2.96 (when no Yati is mentioned).

24.1 : The fresh foliage of the red Aśoka is here fancied to beacon to the other trees that they should give up lamenting since the Spring shall enliven them also. The wording, however, is not clear.

25 : 'In Vātormi there are three Caturmātras, the first two having all long letters and the third having it at the end, then a Pañcamātra with a long letter in the middle and a long letter following it, in succession.' (*ma-bha-ta-ga-ga*); see H. 2.136; P. 6.20; Kd. 4.37.

25.1 : The stanza is unintelligible.

26 : 'Two Caturmātras each containing all long letters and two Pañcamātras, each having a short letter in the middle, followed by a long letter at the end (of the Pāda) make a Śālīnī.' The wording of the second line is doubtful. (*ma-ta-ta-ga-ga*); see H. 2.135; P. 6.19; Kd. 4.36. Also Vjs. 5.22.

SVAYAMBHÜCCHANDAS

I. UKTĀDIVIDHI

This chapter is the continuation of Ch. VI of the Pūrvabhāga. In the ms. of the Pūrvabhāga we have nine metres of the Triṣṭubh Jāti and there the ms. ends abruptly; and the present ms., the first 22 folios of which are missing, begins with Vidyunmālikā. We have only the illustration; for the definition (*na-sa-ta-ta-ga*) cf. H. 2.209.

- 1: 'The (six) Trimātras, the first two of which end in a short letter each, the last three begin with it, while the middle one contains all short letters, make a (Pāda of a) Rucirā.' (*ja-bha-sa-ja-ga*); cf. H. 2.198; P. 7.2; Kd. 4.60.
- 1.1: 'The unfortunate lovely woman in the form of the sword, bedecked with pearls and having her limbs smeared with elephant's rut, is crying as it were, (after rolling) on the ground, freely raising her voice owing to the humming of the bees that had gathered there (owing to the rut), when her good master had fallen (in the battle).' The words *latṭhiā* (a stick and a lovely woman) and *abhaggiā* (unbroken and unfortunate) are intended to be *śliṣṭa*.
- 2: 'If in (each of) the Pādas, there are employed four Caturmātras, the first and the third of which have their long letter at their end, while the second and the fourth have it in their middle, and are followed by a long letter at the end, the metre is called Nandinī.' (*sa-ja-sa-ja-ga*); cf. H. 2.210 and P. 8.7, who call it Kanakaprabhā, while Vr. (3.69) knows it as Mañjubhāṣiṇī. In his commentary Hemacandra mentions three other names for it, viz., Jayā (cf. also Jk. 2.159), Manovatī and Sumaṅgalī; but Bharata, 32.151, knows it as Vilambitā.
- 2.1: 'When I look at you, my mind does not arrive at a decision as it entertains a doubt: Could this be the moon?; but he does not shine by day; could he be Aṅga? But his bow is made of flowers.' This is an example of the Sandeha Alamkāra. Vv. 3-12 describe 10 metres of the Śakvarī Jāti which have 14 Akṣaras in each of their Pādas.
- 3: 'In the Vasantatilaka metre there are four Caturmātras followed by a Pañcamātra; of the Caturmātras, the first has all long letters, the second has it in the middle, while the third and the fourth have it at the end. The last, i.e., the Pañcamātra, has its short letter at its commencement.' (*ta-bha-ja-ja-ga-ga*); cf. H. 2.231; P. 7.8; Kd. 4.62. Vjs. 5.31 knows it only as Simbhonnatā, but Kedāra Vr. 3.75 knows

this name and two others namely, Uddharṣiṇī and Madhumādhavī also. Karnotpalā and Śobhāvati are two more of this same metre which are found at Vr. 3.75.2-4.

- 3.1: The author of the illustration is doubtful; the name Vijjā is later changed into Divākara in the added footnote. 'Your hand, having the beauty of the delicate interior of an erect lotus and possessed of a fore-arm covered with the hair standing on their end owing to the touch of the breasts of the beloved, brings honour, gifts, terror and enjoyments respectively to friends, Brahmins, enemies and sporting damsels.'
- 3.2: The blue lotus placed on the ear, when tinged with the red colour of saffron on the cheek as it repeatedly touches it, and affected by the whiteness of eyes of the girl, is fancied to be the knob of Cupid's arrow made with the three gems, namely, the blue sapphire, the pearl and the red ruby.
- 4: 'Two Pañcamātras, the first with a short letter at the end and the second with all short letters, placed between two Ṣaṇmātras, both of which have all long letters, make a (Pāda of) Asambādhā.' (*ma-ta-na-sa-ga-ga*); cf. H. 2.230; P. 7.5; Kd. 4.64.
- 4.1-2: Both the illustrations are vulgar descriptions of a girl's sexual enjoyment.
- 5: 'That is Nandimukhī, in whose (Pāda) there are (in succession) two Trimātras both containing all short letters, two Pañcamātraḥ both having a short letter at their end, and two long letters.' (*na-na-ta-ta-ga-ga*); H. 2.224 and Jk. 2.170 know this metre as Vasanta though Hemacandra mentions the name Nandimukhī also in the commentary. Piṅgala and others do not notice it at all.
- 5.1: 'The hair stand on their ends; drops of perspiration trickle down, the lower lip throbs, talkativeness decreases, the mind becomes shaky and the eye becomes fixed. Thus do various sweet emotions take place when the lover is sighted.'
- 6: 'That is Aparajitā where (in a Pāda) there occur (in succession) a Ṣaṇmātra with all short letters, a Pañcamātra with a short in the middle, a Caturmātra and a Trimātra both having a long letter at their end.' (*na-na-ra-sa-la-ga*); cf. H. 2.220; P. 7.6; Kd. 4.65.
- 6.1: This is a Rūpaka where the body of the beloved is conceived as a lotus-pond, having hands and face as its lotuses which are endowed

with stalks namely the arms and the neck, where the eyes are the blue lotuses, the breasts are the swans, the black hair are the black bees and (the loveliness of) the Nīṭambas is the water.

- 7: 'Praharaṇakalikā has two (groups of) seven (letters), each having its long letter at the end. (*na-na-bha-na-la-ga*); cf. *H.* 2.222; *P.* 7.7; *Kd.* 4.66; *Vr.* 3.73. All these works call the metre by the name Praharaṇakalitā, while *Jk.* 2.173 alone calls it Praharaṇakalikā. It is difficult to say what Svayambhū intended.

7.1: 'Avoid journey in this rainy season, oh Lover; enjoy my beauty which resembles the lovely sands of the Ganges. My heart is unable to bear separation even for a moment like a drop of water placed on the edge of a blade of grass.'

- 8: 'It is called Karimakarabhujā in Prosody, when there are (in succession) a pair of Ṣaṇmātras, the first having all short and the second all long letters in them, then a Pañcamātra and a Trimātra, both having their short letter at their commencement.' (*na-na-ma-ya-la-ga*); cf. *H.* 2.223. Karimakarabhujā is also the name of a Mātrā Vṛtta which has a pair of Caturmātras in each of its four Pādas; see below 7.9.

8.1: Here as in 6.1 above we have a Rūpaka; but here it is the battlefield that is considered as a lotus-pond where her brave lover is supposed by a girl to be sporting. Its water is the blood of the enemies; the elephants are its sharks, horses and banners the birds, the mass of umbrellas the foam, the severed heads of warriors the lotuses and long lines of swords the fish.'

- 9: 'A pair of long letters coming after twelve short ones makes (the Pāda of) Upacitra.' (*na-na-na-na-ga-ga*); cf. *H.* 2.234; *Jk.* 2.177. No other author notices this metre, though we find it at *Vr.* 3.77.5 under the name Supavitra, with a Yati at the 8th. The feminine name Upacitrā is that of a Mātrā Vṛtta which belongs to the class of the Mātrāsamaka and others. See below *SbP.* 5.6 (p. 118). Svayambhū's illustration is quite unintelligible.

10: 'Lakṣmī is that metre where, the 5th, the 9th and the 12th places are filled with short letters (all others being long)!' (*ma-ra-ta-ta-ga-ga*) cf. *H.* 2.225; at *Jk.* 2.166 it is called Candrasālā. It is not mentioned by others.

10.1: The vast sky is conceived as a forest, which is burnt by the wild fire namely, the sun, in which there are flaming sparks namely, the

twilight, and small heaps of ashes in the form of the constellations, which is hard to extinguish and where there is a small piece of burning wood emitting smoke, namely the comet.

- 11: 'When short letters are used to fill up the 5th, the 10th and the 13th places (in a Pāda), it is Jyotsnika.' (*ma-ra-ma-ya-la-ga*); cf. H. 2.227, where a Yati is mentioned after the seventh letter.
- 11.1: The sky is here conceived as a large tree, whose branches are the quarters, flowers the stars, the ripe fruit the rising sun, the resting bird the moon, and the slowly departing bees are the patches of (retiring) darkness.
- 12: 'A Ṣaṇmātra with all long letters, two Pañcamātras each with its short letter in the middle, a Caturmātra and a Trimātra, both having their long letter at the end (make the Pāda of) Jayā.' (*ma-ra-ra-sa-la-ga*); cf. H. 2.226; where a Yati is mentioned after the seventh letter.
- 12.1: On seeing the white reflection of the approaching Kṛṣṇa in her pearl necklace, Rādhā thought that Balarāma was coming and so felt shy; Kṛṣṇa saw the source of the error and was amused. The complexion of Kṛṣṇa was dark, but in the pearls it appeared white. On the other hand Balarāma was white in complexion.
- 13-19: These stanzas define seven metres of the Atiśakvarī class which have 15 letters in their Pādas.
- 13: 'There are (in a Pāda) two Pañcamātras both having a short letter at their commencement, coming after a pair of Ṣaṇmātras, the first of which contains all short and the second all long letters in it; such indeed is Mālinī whose Pādas are attractive to the minds of the people.' (*na-na-ma-ya-ya*); cf. H. 2.246; P. 7.14; Kd. 4.72. Bharata (*Bh.* 16.70) calls it Nāndīmukhī and this is noticed by Hemacandra in his commentary.
- 13.1: The orb of the rising moon is imagined as if it were the sandal smeared white cheek of the damsel namely the Eastern Direction, or her crest consisting in a leaf of the Ketaka flower or her ear-ring made of ivory.
- 14: 'When there are two Pañcamātras, the first having all short letters and the second having it at the commencement, then two Caturmātras each having a long letter in its middle, and finally a long letter (in a Pāda), it is called Upamālinī by good poets.' (*na-na-ta-bha-ra*); cf. H. 2.248, where a Yati is mentioned after the eighth letter, as in the Mālinī.

- 14.1 : The stanza contains a request from a crest-fallen lady to her lover, conveyed through the Dūtī.
- 15 : 'But if there are four Pañcamātras, the first having all short letters, the second having it at the beginning and the last two having it at the end, followed by a long letter at the end (of the Pāda), it is called 'Candroddyota.' (*na-na-ma-ra-ra*); cf. *H.* 2.247, where a Yati is mentioned after the eighth letter.
- 15.1 : 'Look how the digit of the young moon slightly reddened by the evening twilight and resting on (the edge of) the dark cloud, (occasionally) brightened up by the flashes of lightning, appears as if it were the blood-moistened fang, eager to devour the world, in the dark mouth of Death with its tongue lolling out.' The flash of lightning is the lolling tongue.
- 16 : 'It is Tonaka, when there are seven Trimātras, each having a short letter at its end, and then a long letter, (in a Pāda).' (*ra-ja-ra-ja-ra*); cf. *H.* 2.254. It is called Mahotsava at *Jk.* 2.190.
- 16.1 : The stanza describes the attack of Rāvaṇa's army of Rākṣases against the monkeys (of Rāmā) and seems to be from a poem on the theme of the Jaina Rāmāyaṇa, whose author is said to be Nāgaha.
- 17 : Śaśikalā has (in its Pāda) 14 short letters followed by a long one. (*na-na-na-na-sa*); cf. *H.* 2.243; *P.* 7.11; *Kd.* 4.68. Piṅgala calls it Candrāvartā and this is noticed by Hemacandra in his commentary.
- 17.1 : 'Whom indeed does the beauty of the autumnal days not attract, when there are a number of lakes having open day and night lotuses surrounded by a hovering swarm of bees attracted by their fragrance and when the surface of the earth is white-washed with the moon's rays.'
- 18 : '(The same Śaśikalā becomes) Maṇigūṇanikara, when a Yati is observed at the end of the eighth letter.' This is one of the few places where a Yati is mentioned by Svayambhū. See *H.* 2.245; *P.* 7.13; *Vr.* 3.80.
- 19 : 'When at the end of Vidyunmālā two Pañcamātras each having a short letter in the middle and a long letter are added, it is (called) Citrā.' (*ma-ma-ma-ya-ya*); cf. *H.* 2.249; *Jk.* 2.193 gives Maṇḍūkī as its alternative name. Hemacandra notices this as well as the other name Cañcalā in his commentary.
- 19.1 : This is a description of the Rainy season; the speaker shows concern

about the safety of the travellers who are away from their dear ones, in the fashion of the conventional ideas of the Sanskrit poets.

20 : Hereafter Svayambhū defines six metres of the Aṣṭi class which have 16 letters in their Pādas. The first is Pañcacāmara; its Pāda has eight pairs of a short and a long letter. *Jk.* 2.203 defines this metre among the Sanskrit metres; but mentions it also under the name of Mahotsava at *Jk.* 6.31.

20.1 : The stanza contains a description of the forest grounds, which emit a fragrance when moistened with the first drops of rain, which are covered with a large mass of sprouts rising from the bulbous roots, which are darkened with swarms of black bees greedily hovering around the Śilindhra flowers, being maddened with their fragrance and which thus cause pain to the travellers (separated from their beloved ones).

21 : 'It is Cītraśobha when there are eight Trimātras (in a Pāda), each having a short letter at its end.' (*ra-ja-ra-ja-ra-la*); Hemacandra does not mention this metre. The only other author who defines is that of the Prākṛta Paṅgala at 2.172 under the name Cañcala.

21.1 : The stanza describes a warrior who is capable of as it were sport-
ing on a battlefield where a fierce battle is raging.

22 : 'Seven Trimātras, each with a short letter at its end, followed by two long letters at the end, (make the Pāda) of Citra.' (*ra-ja-ra-ja-ra-ga*); cf. *H.* 2.279. This is identical with the last except that we have here a long letter at the end instead of a short one.

22.1 : 'The Rākṣasas in the form of the Rain clouds fiercely frowning owing to the rainbows, showing their uneven rows of teeth, namely the departing swans, possessed of lolling tongues of the lightning flashes, are running at the poor travellers (separated from their beloved mates).'

23 : Six 'Trimātras, the first having its short letter at the end, the second and the third having it at the commencement, and the last three having all short letters in them, with a long letter (at the end) (make the Pāda of the) Gajavaravilasita.' (*bha-ra-na-na-na-ga*); cf. *H.* 2.271; *P.* 7.15; *Vr.* 3.85. All the three give the name as Ṛṣabhagajavilasita, while Hemacandra mentions Maṭṭagajavilasita as another name of it in his commentary.

23.1 : 'The skies are as it were crying aloud through the thunder of the cloud, shedding tears of big rain-drops and saying : Where have you

gone, oh Grīṣma (Summer), dear friend of the Spring, who had caused the lotuses to open in the lakes and had allowed a free play to the bright rays of the sun and the moon ?

23.2: The description seems to be of the ocean at the time of its being churned with the churning staff of the Mandara mountain.

24: 'Two Ṣaṇmātras, the first with all long letters and the second having a long letter at its commencement, two Pañcamātras, the first with a short letter and the second with a long one at their beginning, and a long letter (at the end) make (the Pāda of) the Madanalalita, in Prakrit prosody.' (*ma-bha-na-ma-na-ga*); cf. H. 2.275, where, however, a Yati after the 4th and the 10th letters is prescribed.

24.1: A traveller is here described as having fainted on seeing the amorous behaviour of a loving couple on a swing and remembering similar sports of his beloved.

25: 'He calls that Acaladhṛti when it has all short letters in its Pāda.' (*na-na-na-na-na-la*); cf. H. 2.269; Kd. 4.79. Piṅgala 4.48, calls it Gītyāryā.

25.1: The stanza describes the sporting dalliance of the beloved.

26: 'Pṛthvī is that metre in which there occur (in succession), four Caturmātras, the first and the third of which have a long letter in their middle, while the other two have it at the end, a Pañcamātra and a Trīmātra, both having a short letter at the commencement.' (*ja-sa-ja-sa-ya-la-ga*); cf. H. 2.287; P. 7.17; Kd. 4.83. It is called Vilam-bitagati by Bharata at Bh. 16.84; Even Utpala mentions this latter name in his commentary on *Bṛhatsaṃhitā* 103.16.

26.1: This is a Rūpaka where a young lady is conceived as a river in the autumn, with her palms as the red lotuses, with her face as the bright moon, eyes as the blue lilies, tresses as the black bees hovering around, breasts as the Cakravāka birds and the deep navel as the deep parts of the river-bed.

27: 'It is Śikharinī when it has (in its Pāda) a Pañcamātra with its short letter at the beginning, a Ṣaṇmātra with all long letters, two Pañcamātras, the first with all short letters and the second with a short letter at its end, and a Caturmātra which has a long letter at its end (in succession).' (*ya-ma-na-sa-bha-la-ga*); cf. H. 2.286; P. 7.20; Kd. 4.82.

27.1: '(Even) imprisonment in the midst of wise men, or a long sojourn in a mountain cave, or even a sport with a venomous serpent is to be preferred, but not even rulership in the company of wicked followers.'

- 28: 'Mandākrāntā (has in her Pāda) two Saṁmātras of which the first contains all long letters while the second has its long letter in the beginning, (followed by) three Pañcamātras, each having a short letter at its commencement.' (*ma-bha-na-ta-ta-ga*); cf. H. 2.290; P. 7.19; Kd. 4.80.
- 28.1: 'The wife of the heartless traveller having decided to die at the sight of a rain-cloud, places a string of lovely Punnāga flowers with bees hovering around it on her (pearl) necklace, a Mālatī flower in her hair, and a single Kadamba blossom on her ear.' The idea is that the sight of these flowers is most painful to a separated lover; cf. Mālatī-Mādhava III.12 for a similar idea.
- 29: This (Mandākrāntā itself) is Hāriṇī when it has at its end two Pañcamātras, each with a short letter in its middle (in place of the last two Pañcamātras of the Mandākrāntā). (*ma-bha-na-ma-ya-la-ga*); cf. H. 2.292; the metre is not noticed by other writers.
- 29.1: 'The day-lotus awoke on seeing the rising sun in the early morning and having an opportunity at it were laughed at the moon who had grown gray. How can there be any glory for him who is fault-finding (or shining at night), who has not got all the arts or (digits), who has an empty purse (or who lives in the sky), who is consumptive (or who wanes) and feeble, and is always crooked towards his friends (or towards the sun). The words in the last two lines are double meaning, one applicable to a man and the other to the moon. The day lotus opened up all its grand beauty for the rising sun, but merely scoffed at the presumptuous moon who was losing all his lustre in the morning.
- 30: 'In a Varṇśadala there are all (i.e., six) Trīmātras with a single Ca-turmātra at the end of all; of the Trīmātras, the 1st and the 5th have a short letter at their end, the 2nd and the 3rd have it at their beginning, while the 4th and the 6th have all short letters in them. The Ca-turmātra has the long letter at its end.' (*bha-ra-na-bha-na-la-ga*); cf. H. 2.288; P. 7.18; Kd. 4.84. All these works know it by the name Varṇśapatrapatita, though Hemacandra notes the name Varṇśadala in his commentary.
- 30.1: 'In the spring the southern breeze, having come in contact with fragrant flowering trees, laughs and challenges as it were, all youthful persons, (saying :) let us bet keeping Mountain Malaya as our umpire, as to whose lovely fragrance is more acceptable (to young damsels).'

- 31 : 'Some call this metre by the name *Vamśapatralalita*.' The correct name seems to be *Vamśapatrapatita*, the Prakrit form being *Vamśa-vattapaliam-pāḍiam* as seen from the last line in the illustration.
- 31.1 : 'A *Cātaka* bird does not care to have the ample water in the lakes and lotusponds, though it is sweet, cool, clear and filled with blue lotuses as also with the sweet notes of water-birds; but he is very happy to lick even a single drop of water sent by the lord of gods (i.e., of the rains), though it has fallen on the blade of a bamboo-leaf.'
- 32 : 'Two *Ṣaṇmātras* both containing all long letters, preceded by a *Pañcamātra* which is full (i.e., is the longest and so containing all short letters), and followed by two *Pañcamātras*, both having a short letter at their commencement, make (the *Pāda* of) *Padma*.' *Paguna* 'excellent' is used both in the sense of 'the longest' of all the *Pañcamātras*, and also in the sense of 'leading'. Solve *pragunaḥ prathamam vartamānaḥ pagaṇo yayoh tau davu ṣaṇmātrau*. (*na-sa-ma-ta-ta-ga*); cf. H. 2.294, where Hemacandra mentions a *Yati* after the 6th and then after the 10th letter.
- 32.1 : This is a vulgar description of a girl's dalliance.
- 33 : 'That (*Padma*) itself is *Rohiṇī* when each of the last two *Pañcamātras* in it has a short letter in its middle (instead of at the beginning).' (*na-sa-ma-ma-ya-la-ga*); cf. H. 2.295 where a *Yati* is mentioned after the 6th and the 10th letters.
- 33.1 The meaning of the stanza is not very clear.
- 34 : 'In the *Pāda* of *Harīṇī* there occur (in succession) a *Pañcamātra* with all short letters, a *Ṣaṇmātra* with all long letters, three *Caturmātras*, the first having all long letters, the second and the third having a long letter in their middle, and finally a long letter.' (*na-sa-ma-ra-sa-la-ga*); cf. H. 2.293; P. 7.16; Kd. 4.81. *Bharata* at Bh. 16.78 calls it *Vṛṣabhalalita*, while *Utpala* on *Bṛhatsaṃhitā*, 103. 10 calls it *Vṛṣa-bhacarita*. All except our author and *Bharata* mention the *Yati* after the 6th and the 10th letters.
- 34.1 : A lady explains to her friend how all external factors like southern breezes, moonlight, spring, cuckoo's notes, music and sugar-cane juice, even when combined, do not please one as much as a lover with affectionate talk does.
- 35 : '*Bhāvākrāntā* is that which has four long followed by four short letters, two *Caturmātras*, the first with a long letter in the middle and the second having it at the commencement, and a *Pañcamātra* with a

short letter in the middle of it.' The word *viṣamajagaṇā* is not rightly understood. Perhaps the correct reading is *viṣama-cagaṇā* 'having an uneven number of Caturmātras, i.e., five', the first three covered by the four long and four short letters, the fourth and the fifth being *udara-guru* and *ādiguru* respectively. (*ma-bha-na-ra-sa-la-ga*); cf. H. 2. 291. The real name appears to be *Bhārākrāntā* and our ms. often reads *va* for *ra*.

35.1: A young girl compares her lover with the moon, the sun, the ocean, the fire, Indra, Śiva and Viṣṇu; but finds some fault with each of them and so declares her lover to be incomparable owing to his possession of many good qualities. The moon is crooked and has a dark heart (owing to the black spot); the sun's hands (rays) are fierce; the ocean is by nature a fool (*jaḍadhī-jaladhī*); the fire is without proper training (unrestricted in its march); Śakra is an outcaste (owing to his having a curse of Gautama); Hara has odd eyes (i.e. fierce and uneven i.e. three) and Hari is *Sagada* (having a *Gadā* and having a disease).

36: 'When *Mandākrāntā* has six short letters in its middle (instead of the usual five), it becomes *Citrālekhā*.' For *Mandākrāntā* see above v. 28. (*ma-bha-na-ya-ya-ya*); cf. H. 2.304, where it is called *Candralekhā*. Beginning with this *Svayambhū* defines 11 metres of the *Dhṛti* class, which have 18 letters in their *Pādas*.

36.1: The slightly reddish digit of the moon on the second day of the first half of the month is imagined here as a fresh nail-mark left on the breasts, namely the while autumnal could, of the Lady of the evening twilight, by the sun, her lover, who had departed after sporting with her on the bed of the sky.

37: '*Candramālā* is that where there occur (in succession) six short letters, six long letters and two *Pañcamātras*, each having its short letter at the commencement.' (*na-na-ma-ma-ya-ya*); cf. H. 2.307.

37.1: 'Look how a swarm of bees has left the garden and alighted on the lotus-like sole of a lovely girl; on hearing its humming, the anklet, however, murmured saying to bees, at it were, that they should not stay there which was its exclusive property, being greedy for the same.' A swarm of black bees settled on the sole of a girl; she moved her feet to ward it off. As a result of the movement the anklet ginged; the poet's fancy is based on this.

38: 'If two short letters are added at the end of the six *Trimātras* in the

Gajavaravilasita, it is called Bhramarapada.' For the former see above v. 23. (*bha-ra-na-na-na-sa*); cf. H. 2.309.

38.1: 'Whom would an autumnal night not please, when the dust (on the ground) is made to settle by water sprinkled by the clouds, when the lotus-ponds are full of sweet music owing to the humming of the hovering bees and when all quarters are whitewashed with the rays of the rising full moon?'

39: 'A Ṣaṇmātra with all long letters, four Caturmātras of which the first and the third have their long letter at the end, the second has it in the middle and the fourth has all long letters, followed by a Pañcamātra which has its long letter at the end, make (the Pāda of) Śārdulalalita.' (*ma-sa-ja-sa-ta-sa*); cf. H. 2.310.

39.1: 'Young brides who have eyebrows resembling the crescent moon, who have long eyes, whose soles resemble a fresh foliage of the red Aśoka, whose lower lips are like the Bimba fruit, whose faces are broad and pleasing to the people like the moon and who have a full bosom, are not obtained by all without merit.'

40: 'They call it Kuraṅgikā when there are (five) Caturmātras, with a Pañcamātra in the middle and a long letter at the end (of a Pāda). Thus we have first three Caturmātras, the first two having all long letters and the third having it at the beginning, then a Pañcamātra which has its long letter at its end, followed by a pair of Caturmātras both having their long letter in their middle, and finally a long letter at the end of all. *madhya* is with reference to the whole line (Pāda) which has 7 Amśas in all, so that the Pañcamātra occupies the fourth Amśa. (*ma-ta-na-ja-bha-ra*); cf. H. 2.311. Yati is mentioned by Hemacandra after the 5th and the 12th letters.

40.1: This is a description of a trunkless head with its head-gear, moving about on the battlefield and resembling a lump of clay placed on the wheel of a potter.

41: 'If a single short letter is added at the beginning of Hariṇī it becomes Lalita.' (*na-na-ma-ta-bha-ra*); cf. H. 2.308.

41.1: The idea is somewhat like this: The sky is the sword; it was darkened with the rust in the form of the rain clouds. It was then whetted on the stone, namely, the sun's orb, by the iron-smith's wife, namely, the glorious autumnal day; the result of this was that the sword began to emit its rays as before.

42: 'If a Ṣaṇmātra is placed (instead of the usual Caturmātra), in the

middle of a *Harinī*, it becomes *Harinīpada*.' The *Ṣaṇmātra*, of course, contains all long letters, like the *Caturmātra* in *Harinī*. (*na-sa-ma-ta-bha-ra*); cf. *H.* 2.318.

42.1: A lover meets his beloved after his return from a long journey; on seeing her very emaciated he asks her why it was so and she replies that it was her very nature. He again asks her why she looks very gloomy and depressed to which she says that that was because of her constant household work. She is thus trying to conceal her pain due to her separation from him; but when he finally asks her if she remembered him during his absence, she bursts into tears as she is unable to conceal her feeling any more and made no reply. This was, however, more than a reply to the lover, who then embraces and kisses her.

43: 'Long and short letters, which are respectively four and six, followed by two *Caturmātras* each having its long letter in its middle and placed between two long letters make a (*Pāda* of the) *Acala*.' *makaragr̥ha* is *samudra*, i.e., 4 and *rasa* is 6. *gamadhya* is to be taken twice, thus *gamadhya gamadhya due cā* (two *gamadhya* 'ca's between two 'ga's). (*ma-bha-na-ja-bha-ra*); cf. *Vr.* 3.94.8 where the metre is called *Cala* by *Kedāra*. *Hemacandra* also calls it *Cala* at *H.* 2.305.

43.1: A trunkless head (not completely severed and hence) hanging in the air for long is fancied to be doing so as it would not descend to the battle ground which was filled with streams of blood nor could it rise up to the heaven since it was quite empty at that time, all the gods having come down to witness the battle!

44: 'It is *Kesara* if after the (first) 11 letters (of the *Acala*), two *Pañcamātras* each having a short letter at its end and (finally) a long letter are employed.' (*ma-bha-na-ya-ra-ra*); cf. *H.* 2.306.

44.1: 'A headless trunk has stood up on the battlefield (motionless) as if with satisfaction that hereafter it has not to look at the faces of bad masters, not to hear villain's words hard like bolt, and not to speak degrading words like 'give me' to misers.' It had no eyes, nor ears nor the tongue as the head was severed!

45: 'That is called *Kusumitalatāvellitā* in prosody when there are in it (in succession) five long followed by five short letters, then a pair of *Pañcamātras* each ending in a short letter and finally, two long letters.' (*ma-ta-na-ya-ya-ya*); cf. *H.* 2.302; *P.* 7.21; the metre is called *Candralekhā* at *Vjs.* 5.39 and *Citralekhā* at *Bh.* 16.86.

- 45.1 : I am unable to understand the meaning of the stanza clearly but it seems to be an attempt of a wanton woman to represent her mischievous deeds as though they were pious ones.
- 46 : 'Five short and six long letters (in succession) followed by two Pañcamātras each having its short letter in the middle and a long letter at the end of all make (a Pāda of) Anaṅgalekha.' (*na-sa-ma-ma-ya-ya*) cf. H. 2.312.
- 46.1 : 'We belong to the same class namely gold; so we are (both) equally great. Why then has this ear-ring got to her lotus-like soft cheeks ? And look how I have been touched by her foot ! The wretched girl has no discrimination : Thus indeed does the anklet cry out in grief to the people when it makes a glingling sound.'
- 47 : 'That is the Sārdūlavikrīḍita where there are (in succession), a Ṣaṇmātra with all long letters, three Caturmātras the first and the third of which have their long letter at the end while the second one has it in the middle, two Pañcamātras both having their short letter at the end and lastly a Dvimātra consisting of a single long letter.' (*ma-sa-ja-sa-ta-ta-ga*); cf. H. 2.321; P. 7.22; Kd. 4.88.
- 47.1 : The stanza contains a description of the large heap of the white bones of the demon Dundubhi lying on the Malaya mountain which is darkish in colour. The poet fancies that the celestials always thought that it was a peak of the white mountain, i.e., Kailāsa, brought there for the sake of building the great dam across the ocean by some powerful Monkey, when Rāghava had been in those regions for killing the ten-headed demon Rāvaṇa.
- 47.2 : The stanza attempts to give a reason why the young damsels do not become angry even when they have heard about the killing of the god of Love by the three-eyed god Śiva. It is given in the latter half, but is not very clear.
- 48 : 'That is Puṣpadāman where there occur (in succession) five long and five short letters, and three Pañcamātras each of which has its short letter at the commencement.' (*ma-ta-na-sa-ra-ra-ga*); cf. H. 2.327. Read *muhaḥalatipagaṇā*; the ms. has dropped the letter *la*. Hemacandra mentions the Yati after the 5th and the 12th letter.
- 48.1 : 'Kāma has resorted to young damsels, bringing with him the sweet notes of the cuckoo mixed with the humming (of the bees), the lovely Sīnduvāra flowers, the blossoms of Punnāga and Aśoka, and lakes adorned with blooming lotuses and swans; that is why during separa-

tion from her there take place exhaustion, burning sensation, and want of appetite.' Not very clear.

49: 'It is Candrabimba, if after the 12th letter (in the Puspādāman) there occur two Pañcamātras, each of which has its short letter at its end, and a long letter.' (*ma-ta-na-sa-ta-ta-ga*); it is known as Vañcita to H. 2.328, where in the commentary even Vicita is mentioned as an alternative name. At Vr. 3.96.5 its name is given as Bimba. In both these places a Yati after the 5th and the 12th letter is mentioned. *sūra* is the sun, i.e., 12.

49.1: 'The Lady of the Sky, having put on a charming scarlet garment, namely, the slightly risen moonlight tinged with the twilight and studded with (the pearls of) planets and stars, has approached the refreshing Moon, leaving the sun who had grown old and shaky.'

50: 'Two groups of six letters, the first commencing with a short letter (the others being long) and the second ending with a long one (the others being all short), occur in the Rambhā and are then followed by two Pañcamātras each having its short letter in the middle, and a long letter (at the end of all).' (*ya-ma-na-sa-ra-ra-ga*); the metre is known as Meghavisphūrjitā to H. 2.323; Jd. 7.20; Jk. 2.227; Vr. 3.95. Virahāṅka at Vjs. 5.41 knows it as Candrakānta, Utpala as Suvṛttā (on *Bṛhatsamhitā* 103.7) and Piṅgala at P. 8.18 as Vismitā. In his commentary on H. 2.323 Hemacandra says that the metre is called Rambhā by Svayambhū, while Jayakīrti mentions both the names, Rambhā and Meghavisphūrjitā.

50.1: 'A Cakravāka bird being distressed by separation (from his mate) at the moon-lit night, does not get rest in the beds of lotuses wafting sweet fragrance, as his mind is stricken with grief. Thus separated from his beloved and crying piteously, he goes from one bank to the other, now diving, now rising up, in the waters (of the lake), where his own reflection had fallen.' He often mistakes his own reflection in the waters for his beloved and so dives to meet her; but being disappointed, he rises up again.

51: 'This same becomes Chāyā if the two Pañcamātras associated with the (same) two groups of six letters (as in Rambhā) have their short letter at their end and are followed by a long letter.' (*ya-ma-na-sa-ta-ta-ga*); cf. H. 2.325. Kedāra calls it Chāyā when we have a Bha Gaṇa instead of the first Ta Gaṇa, at Vr. 3.96.9.

51.1: The poet describes the influence of the Spring on even an old creeper

which is incapable of fruit-bearing and says how it amorously approaches the Āśādhā tree which too is old. The words *kohālī* and *Āśādhā* are double meaning as explained in the foot-note.

52: 'Here again, if after the same twelve letters (i.e., the two groups of six letters in *Rāmbhā* and *Chāyā*), there occur two *Caturmātras* each of which has its long letter in the middle, and a long letter (at the end), it is called *Makarandikā*.' (*ya-ma-na-sa-ja-ja-ga*); cf. *H.* 2.324; also *Vr.* 3.96.8.

52.1: An elephant is described here as fainting after remembering how he had sported with his mate in a lovely forest in the autumnal season, while she was with him.

53: 'There are in *Śobhā*, six (letters) having a short as their first (the others being long), followed by seven which have a long letter as their last (the others being short), then two *Pañcamātras* each having its short letter in the middle, and a long letter (at the end).' (*ya-ma-na-na-ta-ta-ga-ga*); cf. *H.* 2.338.

53.1: The stanza contains a vulgar description of love-making by a young maiden.

54: 'It is *Citramālā* when there occur (in succession) four long letters, four *Pañcamātras*, the first having its short letter at the commencement, the second having all short letters and the last two having a short letter at their end, and two long letters (at the end). (*ma-ra-bha-na-ta-ta-ga-ga*); cf. *H.* 2.339. It is called *Suprabhā* at *Vjs.* 5.42, which name even Hemacandra mentions in his commentary.

54.1: 'Now hereafter, travellers will find it difficult to halt in this our village; because, just now, a young traveller sleeping at the temple of the goddess has begun to sing such a piteous song on remembering his beloved at the thunder of the clouds, that all the people in the village have their hearts moved to pity.' He is thus a source of sleeplessness and will no more be tolerated.

55: 'That is *Suvadānā* in which there occur (in succession) two *Caturmātras* both containing all long letters, four *Pañcamātras*, the first and the third of which have their short letter at the commencement, the second has all short letters, while the last *Pañcamātra* has its long letter at its beginning, and finally a long letter.' (*ma-ra-bha-na-ya-bha-la-ga*); cf. *H.* 2.334; *P.* 7.23; *Kd.* 4.90, Also *Vjs.* 5.43.

55.1: 'Very few indeed are those that carry on their activities upto the end of their life in an unrestricted manner (whether they are appre-

ciated or not); the stream of the river Revā goes on constantly filling the ocean and the precincts of the Vindhya mountain even when the former, where it rests, is measureless and changeless showing the same amount of water though it is constantly filled.'

56: 'They call it Siddhi when there are nine Trimātras having in their midst a Caturmātra at the seventh place. Of the Trimātras, the first and the fourth contain all short letters; the second, the third and the sixth have their short letter at their beginning; the fifth has it at its end, while the last three (which come after the Caturmātra), have their long letter at their end.' (*na-ja-bha-ja-ja-ja-ra*); cf. H. 2.350; Jk. 2.239 knows it as Citralatā or Campakamālikā, while Hemacandra in his commentary, also calls it Rucirā.

56.1: The stanza contains a description of the autumnal nights.

57: 'In Sragdharā there are two Caturmātras both containing all long letters and five Pañcamātras of which all except the second have their short letter at the commencement, while the second has all short letters.' (*ma-ra-bha-na-ya-ya-ya*); cf. H. 2.345; P. 7.25; Kd. 4.92; Vjs. 5.45; Vr. 3.99.

57.1: This is a description of an elephant in rut going to a lake in summer for his bath.

57.2: The god of love is supposed to move in front of the young ladies, ready to carry out the orders of their glances. Compare Mammaṭa, *Kāvyaprakāśa* X. (under Anumāna Alankara).

58: 'If there are seven Caturmātras each with its long letter at the commencement, followed by a long letter at the end, it is called Madirā.' (*bha-bha-bha-bha-bha-bha-bha-ga*); cf. H. 2.355; it is called Latākusuma at Jk. 2.246 and Kd. 4.93 and Sangatā at Vjs., 3.34. Hemacandra mentions the name Latākusuma also in his commentary.

58.1: 'The swarm of the black bees darkened by the rut of the intoxicated elephants, impassioned, carried by the breezes from the south, looking dusky owing to the pollen of the Kēṭaka flowers and spreading their humming sound everywhere looks as if it were a volley of arrows discharged at the lovers by the God of Love.'

59: 'Where a Ṣaṇmātra with its (two) short letters in the middle and six Caturmātras of which the first, the third and the fifth have their long letter in the middle, while the other three have it at their end, occur (in succession), (it is Mardaka); indeed the Pādas of a Mardaka

are composed in this particular manner.' (*bha-ra-na-ra-na-ra-na-ga*); cf. *H.* 2.353; *Vr.* 3.100; *P.* 7.26. It is called *Viśuddhacarita* at *Vjs.* 5.46.

59.1: 'The fact that the ocean has entertained perpetual enmity with *Vaḍavānala*, that it has stayed for a long time happily with the *Mṛgalāñchana* (the moon) and has given poison to *Hara* and nectar to other gods, can give pleasure only to the impudent, low-born and untrained persons.' *lāñchana* means both spot and blot (on character). The narrow mind, fondness for low characters and partiality thus displayed by the ocean does not please good men.

60: 'If, on the other hand, the *Ṣaṇmātra* in the *Madraka* has a long letter at its end (the others being short), it is *Lalita*.' (*na-ja-bha-ja-bha-ja-bha-la-ga*); cf. *H.* 2.358; it is called *Aśvalalita* at *P.* 7.27 and also at *Vr.* 3.101; *Jd.* 7.26 and *Jk.* 2.248. *Hemacandra* in his commentary says that sometimes a *Ja Gaṇa* is substituted for the last *Bha Gaṇa* in this metre; but in that case *Vjs.* 5.47, calls it *Hayalīlāgati*.

60.1: Seeing the face smeared with sandal paste placed in the cup of her palms by a love-lorn lady and her blue eyes on the face, the swarm of bees did not rest on it and went elsewhere, knowing for certain that blue lotuses resting on a white one and that again on a red one is an impossibility.

61: 'If a *Maṇigūṇanikara* is placed at the end of a *Vidyunmālā*, it is called *Mattākriḍā*.' (*ma-ma-ta-na-na-na-na-la-ga*); cf. *H.* 2.359; *P.* 7.28; *Kd.* 4.96. For *Maṇigūṇanikara* see above 1.18. *Vidyunmālā* was defined in the lost portion of the manuscript.

61.1: The stanza contains a description of the spring season and its glory of blossoming trees and creepers.

62: 'Eight *Caturmātras* make (the *Pāda* of a) *Tanvī*; of the eight, the first, the fifth and the sixth have their long letter at the beginning, the second and the eighth contain all long letters, the third and the seventh have all short, while the fourth has its long letter at the end.' (*bha-ta-na-sa-bha-bha-na-ya*); cf. *H.* 2.365; *P.* 7.29; *Vjs.* 5.48.

62.1: It is a sort of *Anyokti* on a *Bāṇa* (arrow), which though it is associated with a *Gūṇa* (merit; string) suffers many indignities, when it comes in contact with the bent bow (resembling a crooked person).

63: 'It is *Krauñcapadā* when a (*Pāda* of the) *Maṇigūṇanikara* is placed at the end of (a *Pāda* of the *Rukmavati*.' For *Maṇigūṇanikara* and *Rukmavati* see above 1.18 and *P.* 6.15 below (*bha-ma-sa-bha-na-na-na-na-ga*); cf. *H.* 2.372; *P.* 7.30; *Kd.* 4.99; *Vjs.* 5.49.

- 63.1 : This also is the description of the spring and its lovely cool breezes.
- 64 : 'That is Apavāha when it is made with the first three and the last three long letters, with all the intervening Caturmātras containing short letters.' The intervening Caturmātras are five so that the short letters are twenty. (*ma-na-na-na-na-na-na-sa-ga-ga*); see H. 2.377; P. 7.32; Kd. 4.102.
- 64.1 : This is a description of a peak of the Malaya mountain in the spring season.
- 65 : 'Eight long letters, ten short ones, a Pañcamātra with its short letter in the middle, a Caturmātra and a Trimātra, both having their long letter at the end, (coming in succession) make a Bhujaṅgaviṛmbhita.' (*ma-ma-ta-na-na-na-ra-sa-la-ga*); cf. H. 2.376; P. 7.31; Kd. 4.101.
- 65.1 : Again we have a description of the spring with all its glory and how it affects the lovers in separation.
- 66 : 'In Pipīdikā there are four more short letters (in the middle, than those in the Bhujaṅgaviṛmbhita); in Karabha there are nine more; in Paṇava fourteen more and in Mālāvṛtta five more than the last.' Thus we have 14 short letters at the centre in the Pipīdikā, 19 in Karabha, 24 in Paṇava and 29 in the Mālāvṛtta. Otherwise the metres are identical with the Bhujaṅgaviṛmbhita. See H. 2.385; the metres are not mentioned by any one else.
- 66.1 and 4 : Both the illustrations contain the description of the approaching winter (Hemanta) and a consequent request by the beloved to her lover to postpone his journey to distant countries.
- 66.2 : Svayambhū's illustration is defective as regards the number of short letters occurring in a Pāda; in the first we have 23 in place of 19 and this has led the author of the footnote on p. 28 to remark *asyām* i.e., *pipīdikāyām*, *nava-laghu-vṛddhu*, thus making the number of short letters in Karabha $10 + 4 + 9 = 23$. But as a matter of fact we have only 19 short letters in the 3rd and the 4th lines while in the 2nd line there are only 16 instead of the required 19. Perhaps read *thana-juam* in the first line and removing the word *kaḍhina* from it, put it before *kanira* in the second.
- 66.3 : In the second line the letter *la* from *saalabhuṇa-ala* is dropped in the ms. So also the letter *ha* in *kahalaala* in the third line has to be restored; the footnote on *kalaala* which explains the word as *kaṭāha* shows that the mistake is of the scribe of our ms. The stanza is a

- hyperbolic description of the spread of the fame of the poet's patron throughout the length and breadth of the universe.
- 67: 'Any other metre which contains more than 26 letters in a Pāda is called Daṇḍaka, leaving aside the Pipīdikā and the others (mentioned above)'.
- 68: The stanza describes the Patākā Prastāra of the Varṇa Vṛttas, for which see *Vṛttajāṭisamuccaya*, Introduction, para 9 (p. xi).
- 69: Here we are taught how to get the total number of the permutations or the different kinds of structure of a given metre. Thus a metre of the Ukta class has 2; that of the Atiukta has 4. In this manner, the Bhedas of each succeeding class of metre are to be got by doubling the Bhedas of the metre of the earlier class. See *Vṛttajāṭisamuccaya*, Introduction, para 17 (p. xix).
- 70: The stanza gives the total number of the Bhedas of all the classes from Ukta to Utkṛti.
- 71: This is the well known stanza which tells us that in Sanskrit metres only, Jayadeva and Piṅgala prescribe a Yati; the others do not admit of a compulsory Yati in the middle of a line.
- 72: 'A pair of Trimātras both containing all short letters and a number of Pañcamātras each having a short letter in its middle, make a Daṇḍaka; Caṇḍavṛṣṭi is done with seven of them; and by adding one more each time we respectively get Arṇa, Arṇava, Vyāla, Jimūta, Līlākara, Uddāma and Śaṅkha.'
- 721: The stanza describes the beginning of a battle. 72. 2, 3 and 4 are respectively descriptions of the Autumn, the Summer and the Spring, of course, in relation to the lovers. 72.5 is again the description of the advent of the rains and its effects on a traveller. 72.6 describes the condition of a love-lorn girl and 72.8 is in praise of God Śiva; this and 72.7, which seems to give a picture of a commonplace duel between two travellers trying to occupy the same place in a public Dharma-śālā, are ascribed to one Aṅgapati, who is clearly a non-Jain as seen from v. 8.
- 73: These eight are called mere Daṇḍakas; but those that now follow are called Mālādaṇḍakas. The peculiarity of the Mālādaṇḍakas seems to be that the Caturmātras or the Pañcamātras or even the Trimātras which are employed after the initial short letters, which are not necessarily six in number, is unlimited. The Gaṇas are, of course, all of the same kind.

- 74: 'That Daṇḍaka is called Caṇḍapāla where after an odd number of short letters any number of Pañcamātras each of which has its short letter in the middle, is employed at will.' Here in the defining stanza we have 11 such Pañcamātras coming after 5 short letters.
74. 1, 2: In the first illustration which describes the celebration of some festival, there are only 8 Pañcamātras of the abovementioned type, while in the second, where we have a description of a harem, there are only 10. In both the initial short letters are five.
- 75: 'That Daṇḍaka is called Simhavikrānta where after the initial five short letters any number of Pañcamātras each of which has a short letter at its commencement, are employed at will.' Here both in the definition and the illustration there are 9 such Pañcamātras. This Daṇḍaka should be compared with Simhakrīḍa in v. 83 below; both have the common prefix *simha* which corresponds with the Pañcamātras that are common to them. In the Simhakrīḍa the initial short letters are absent; otherwise the two are identical.
- 75.1: Śrīkṛṣṇa was enjoying some sport with the Gopīs in which he had to be taken blind-folded with a heap of dust in his hands for dropping it at a particular place. Rādhā has her turn to take him so and when at the end of the sport she allows him to open his eyes, they enjoy their fun.
- 76: 'That Daṇḍaka is called Meghamālā when after two Ṣaṇmātras, of which the first contains all short and the second all long letters, any number of Pañcamātras each of which has its short letter at the beginning are employed at will.' In the definition there are eight such Pañcamātras, while in the illustration (in which a black bee is said to be feeling uneasy in the absence of the Mālatī flower and not being able to enjoy the juice of the other flowers in the spring), there are only seven.
- 77: 'That Daṇḍaka is called Caṇḍavega where after a Ṣaṇmātra which contains all short letters any number of Pañcamātras each of which has its short letter at the beginning are employed at will.' In the definition there are ten, but in the illustration only nine such Pañcamātras. The meaning of the verse is not very clear.
- 78: 'That Daṇḍaka is Mattamātaṅgalīlākara where all Pañcamātras each of which has its short letter in the middle, are employed at will.' Here there are no initial short letters at all. Both the definition and the illustration contain nine such Pañcamātras each.

- 78.1 : Lord Śiva residing on the cremation ground is praised here as dancing in the appropriate surroundings.
- 79 : 'That Daṇḍaka is called Anaṅgaśekhara where short and long letters follow each other in succession any number of times at will.' In the definition as in the illustration we have fourteen pairs of this type. The illustration contains a Rūpaka in which the face of his beloved is fancied by the lover to be a lotus.
- 80 : 'That (Daṇḍaka) is called Aśokapuṣpamañjarī where all Trimātras each having its short letter at the end, are employed at will.' Both the definition and the illustration contain fourteen such Trimātras. In the illustration an army of the enemy which is imagined to be a deep river infested with sharks and crocodiles, is said by a girl to be crossed by her lover with only a sword in hand.
- 81 : 'That (Daṇḍaka) is called Kusumāstarāṇa where all Caturmātras each having its long letter at the end are employed (at will).' Here as in the last two cases, there are no initial short letters. But there is an essential difference between this and the next Daṇḍaka on the one hand and all the rest on the other and it is that of the Tāla in which they are to be sung. For the Tāla for the Daṇḍakas which contain Pañcamātras is one of five Mātrās (or ten); but that for those which contain Caturmātras must be of four or eight Mātrās only. Here both in the definition and the illustration there are nine Caturmātras only. The illustration describes the Autumnal season with all its grandeur.
- 82 : 'That (Daṇḍaka) they call Bhujāṅgavilāsa which has all Caturmātras only, each of which has its long letter at the beginning, and a pair of long letters at the end of all.'
- 82.1 : 'Meritorious indeed is that man who enjoys sleep as much as he likes in a lovely palace full of fragrance of the burning incense, on a bed covered with a charming bed-sheet, in the company of a bride who is deeply in love with him.'
- 83 : 'That Daṇḍaka is called Simhakraṭa where any number of Pañcamātras each of which begins with a short letter are employed at will.' See above v. 75 and note. In the definition we have nine such Pañcamātras; but in the illustration, we have eight in the first two lines and ten in the last two. The illustration contains a high-flowing praise of Jina with adjectives which deny all short-comings and defects.
- 84 : 'That Daṇḍaka is called Kāmabāṇa where all Pañcamātras each of which has its short letter at the end, are employed (at will), except

the last one (which has to be Ṣaṇmātra with all long letters owing to the rule that the letter at the end of a Pāda must be metrically considered as a long one even when it is short).'

II. ARDHASAMAM

In this small chapter, Svayambhū defines what are known as the Ardhasama Varṇa Vṛttas in Sanskrit prosody. For a discussion of their nature and origin see Jayadāman, Introduction para 16; for the different metres of this type see also the same pp. 149-156. As in the case of the other Varṇa Vṛttas here too, Svayambhū forms his definitions with the help of the Mātrā Gaṇas only.

- 1: 'In the odd Pādas, there are three Caturmātras, each with a long letter at the end, and a long letter in Vegavatī; there is a Dodhaka in the second and the fourth Pādas.' For Dodhaka see *SbPb*. 6.18 (*sa-sa-sa-ga; bha-bha-bha-ga-ga*); see *H*. 3.4; *P*. 5.34; *Kd*. 4.111.
- 1.1: 'Having seen in a clear lake a lotus enjoyed by the hovering black bees, the traveller remembered the face of his beloved on which the black tresses were playing.'
- 2: 'If in that same metre (i.e., Vegavatī) a Trimātra with a long letter at its end is substituted (for the two long letters) as the fourth, it becomes Upacitraka.' (*sa-sa-sa-la-ga; bha-bha-bha-ga-ga*) see *H*. 3.3; *P*. 5.32; *Kd*. 4.110.
- 2.1: 'Oh dear-eyed beloved with your lower lip resembling a ripe banian fruit, see how a pair of black bees is hovering over a lotus which is free from dirt and has straight stalk and looks like the tremulous eyes on your face.'
- 3: 'If the first Caturmātra in the even Pādas of a Dodhaka were to consist of all short letters, it (i.e., the Dodhaka itself) is called Calamadyā.' (*bha-bha-bha-ga-ga; na-ja-ya*); the metre is called Drutamadyā by Hemacandra and others. Cf. *H*. 3.5; *P*. 5.33; *Kd*. 4.115.
- 3.1: 'Look, oh beloved, how the (black) foot-mark of the deer appears particularly lovely on the white orb of the moon, like the single black nipple on your breast smeared with sandal paste.'
- 4: 'If it is an Upacitraka in the odd Pādas and a Drutavilambita in the other two, the poets have regarded it as Hariṇapada which has these characteristics.' (*sa-sa-sa-la-ga; na-bha-bha-ra*); The metre is called Hariṇapluta by Hemacandra and perhaps our *hariṇappaam* is to be rendered as *Hariṇaplutam*; cf. *H*. 3.2; *P*. 5.39.

- 4.1: 'A black bee, when it attempted to settle on another which was rendered white owing to the pollen of a fresh Ketaka flower and was resting in another flower, was laughed at and reprimanded (by its humming) as it were (saying) : Do not, oh fool, make a mistake in respect of a bee itself.' The black bee rendered white by the pollen was mistaken for a white flower, and hence the poetic fancy.
- 5: 'That metre is called Ketumatī by the poets, whose Pādas contain three Caturmātras, of which the first and the third have their long letter at their end, while the second has it in the middle, and a long letter (in succession) and where the even Pādas have an additional long letter at their commencement.' (*sa-ja-sa-ga; bha-ra-na-ga-ga*); cf. H. 3.7; P. 5.36; Kd. 4.112.
- 5.1: 'Those fortunate people (alone), whose form imitates that of the god of love and whom you see with your restless and black bright glances, really live in this world of the living creatures.'
- 6: 'That is called Ākhyānikī among the Upajātis, where there is Indra-vajrā in the first and the third, and Upendravajrā in the second and the fourth Pādas.' (*ta-ta-ja-ga-ga; ja-ta-ja-ga-ga*); cf. H. 3.8; P. 5.37; Vr. 4.6.
- 6.1: 'More welcome it is if a forest infested with tigers is to be entered, or if the poison of a venomous cobra is to be taken, or if a disease, a torturous death or a battle is to be suffered, but not a residence in the midst of villains.'
- 7: 'That is called Ākhyānikī itself (but) preceded by the word '*viparīta*', when the opposite takes place.' (*ja-ta-ja-ga-ga; ta-ta-ja-ga-ga*); cf. H. 3.9; P. 5.38; Vr. 4.7.
- 7.1: 'The white breasts smeared with sandal, endowed with the black nipples and resounding with the humming of the bees blinded with the sweet fragrance, of the young girl appear as if they are the conches which are being blown on the occasion of the entrance of King Cupid.'
- 8: 'That is Aparavaktra where there are (in the odd Pādas), four Tri-mātras, the first two containing all short letters and the other two having their short at their end, and a long letter (in succession); in the even ones there are two Caturmātras (in place of the two Tri-mātras), the first having all short and the second having a short letter at its commencement, and then the same (as in the odd Pādas).' (*na-na-ra-la-ga; na-ja-ja-ra*); cf. H. 3.15; P. 5.40; Kd. 4.117.

- 8.1 : 'Do not remember now, how lotus stalks and water were put by you in the mouth of your beloved mate at the lake; say what person is happy at all times, oh good elephant.'
- 9 : 'It is Puṣpītāgrā when only a single long letter is added at the end of each of the Pādas of the Aparavaktra.' (*na-na-ra-ya; na-ja-ja-ra-ga*); cf. H. 3.16; P. 5.41; Kd. 4.116.
- 9.1 : 'A Palāśa tree growing on the bank of the river and having a branch of it bending down (upto the water-level), has a single leaf (of this branch) moving forward and backward owing to the breeze; it appears that he is offering funeral water as it were to the (other) trees whose lives had departed in the recent wild fire (thus to his deceased relatives).' This is a beautiful poetical fancy ascribed to Kālidāsa by Svayambhū, but actually found in Bhāsa's *Pañcarātra* I. 17, of course, in its Sanskrit garb.
- 10 : (Puṣpītāgrā itself) is called Bhadravirāṭikā, if in its Pādas the first and the third short letters are combined with their successors (so as to form a long letter each).' This means that if there are two long letters (in place of the four short ones) at the commencement of the Pādas of the Puṣpītāgrā, it is called Bhadravirāṭikā. (*ta-ja-ra-ga; ma-sa-ja-ga-ga*); cf. H. 3.6; P. 5.35; Vr. 4.4.
- 10.1 : 'May that Rudra, who bears with a smile the (left) half of Gaurī's body which has closed its eyes (through jealousy at the sight of Gaṅgā) and has its lower lip throbbing, when he bends down for offering the Sandhya worship, bring you auspiciousness.' The idea is somewhat like this : Śiva is Ardhanārī-ṇaṭeśvara, having his left side occupied by Gaurī's left half. At the time of Sandhyā worship Śiva bends down the right side of his head, so as to bring Gaṅgā in his matter hair just in front of Gaurī's eyes. This evokes a feeling of jealousy in her mind which causes her to close her eyes and her lips begin to throb through anger and jealousy.
- 11 : 'Five Trimātras, each having its short letter at the end, and two long letters at the end (in all the Pādas), but with an added (at the beginning) short letter in the even Pādas, make a Yavamati.' (*ra-ja-ra-ja; ja-ra-ja-ra-ga*); cf. H. 3.10; P. 5.42; Kd. 4.113.
- 11.1 : 'Can the lives of those warriors be said to have departed, when being urged on by the feet of infuriated elephants, they are abandoned by their souls through fear of the mud of infamy and freed from

their debts by the pleasure of their masters?' They really live because they have done their duty as true warriors.

12: 'When Yavamati has its (even and odd) Pādas interchanged, it is called Ṣaṭpadāvali by the poets.' (ja-ra-ja-ra-ga; ra-ja-ra-ja); cf. H. 3.11; Piṅgala and others do not mention this metre.

12.1: 'You look charming with the lotuses of your feet, oh lovely girl, which have the filaments of ruby-like nails and pretty petals of well shaped fingers, as if you were a goddess on earth honoured by mortals.'

13: 'If it is a Gīti in the first and the third Pāda and a Skandhaka in the second and the fourth, but when all the letters in each Pāda are short, except the last one (which is long), it is called Śikhā; in the opposite case, it is called Khañjā.' Thus according to Svayambhū, both Śikhā and Khañjā have four Pādas each, and are Ardhasama Catuṣpadis. In the former, the odd Pādas have 30 Mātrās and the even ones have 32; while in the latter the opposite is the case. Of the 30 and 32 Mātrās, the last 2 are always represented by a long letter. See P. 5.43-44 for the metres. Also cf. H. 3.28-29.

13.1-4: The first is a description of the Autumn, the second and the third are of the advance rains, and the fourth of the fresh Spring, all in their relation to separated lovers.

III. VIṢAMAM

The proper title of this chapter should be Viṣamam, though in the concluding stanza this is not mentioned. The word *Prākṛtasāraḥ* there refers to all the three, or rather all the earlier chapters, (including those of the Pūrvabhāga), which treat of Prākṛit, as against Apabhraṃśa, metres. Thus according to Svayambhū, not merely the Mātrā Vṛttas like the Gāthā and the Skandhaka, or the mixed Mātrā and Varṇa Vṛttas like the Vaitāliya and the Mātrāsamaka, but also all the Varṇa Vṛttas of the 26 classes together with the Daṇḍakas, are Prākṛit metres; he has accordingly defined them all in terms of the Mātrā Gaṇas which he has explained at SbPb. 1.2. The Viṣama Vṛttas are generally classified under four heads: 1. the Udgatā group; 2. the Pracupita (or Upasthitapracupita) group; 3. the Vaktra group and 4. the Padacaturūrdhva group. See *Jaya-dāman*, introduction, paras 12-15 (pp. 21-23).

1: 'Six Caturmatras, of which the first, the third and the fifth have their long letter at the end, the second and the sixth have it in the middle

while the fourth has all long letters in it, then a long letter, two Ṣaṇmātras of which the first has its long letter at the beginning while the second has it in the third place, and again a long letter (in succession), followed by a (Pāda of) Nandinī at the end of all make an Udgatā.' (*sa-ja-sa-la; na-sa-ja-ga; bha-na-ja-la-ga; sa-ja-sa-ja-ga*); cf. H. 3.45; Jd. 5.21; Vr. 5.6; Kd. 4.129. It should be noted that Svayambhū does not here define merely a Pāda of the metre, but all the four Pādas of it since no two Pādas are similar and equal; but what is very striking is that he does not indicate where the first two Pādas ought to end. The constitution of the first three Pādas is given in *continuation*, and not separately. Thus, for instance, the fourth Caturmātra is spread over the first and the second Pādas, though the third Pāda is shown separately with two Ṣaṇmātras and a long letter. This may lead us to believe that according to him the first and the second (and perhaps the third) Pādas of Udgatā are to be recited without a pause, i.e., without the Pādānta Yati. That Svayambhū understands a division into four Pādas of the Udgatā is, however, quite clear, since he mentions its third Pāda in the definitions of the next two metres. Piṅgala at P. 5.25 uses the word *ekataḥ* in its definition, which according to Halāyudha, prescribes that the first and the second Pādas are to be recited without pause (*prathamam pādam dvitīyena saha avilambena paṭhet ityarthah*). Jayadeva at Jd. 5.21 uses the words *tarasā uditā*, which according to a commentator of Vṛttaratnākara (on the words *ekataḥ paṭhet* at Vr. 5.6) who quotes him, mean that the two halves of the metre should be recited without any pause (*virāmam antareṇa ardhadvayam ekikṛtya paṭhet ityarthah*); see P. 5.26 (f. n. on p. 87). But Jayadeva's commentator Harṣaṭa thinks that the words are employed for mere padding required for filling up the gaps in the definition which is composed in the same metre as is sought to be defined.

“इदं सलक्ष्यं रचितं सलक्षणं ब्रह्मन् तस्मात्तरसादिकान् ध्वनीन् ।

प्रपूरणं कर्तुमतोन्यदस्ति नः प्रयोजनं किञ्चिदपि स्फुटं यतः ॥ Jd. p. 22.

It is, however, significant that Memacandra, Jayakīrti and the author of the Kavidarpaṇa are all silent on this particular point. The last Pāda of the Udgatā is the same as that of the Nandinī, for which see above 1.2.

- 1.1: 'I bow to Śiva, the Highest and ancient Being, the Lord of the creation, possessed of stainless lustre, the matchless supreme Ruler

- devoid of (human) frame, and free from all shortcomings of a Paśu, i.e., a creature.'
- 2: 'If in the third Pāda of the Udgatā the third (short) letter is joined with its (similar) successor (into a long letter), and if the rest is as in the Udgatā, they call it Saurabhaka.' By substituting a long for the two short letters in the 3rd and the 4th places in the third Pāda of the Udgatā, we turn it into a Saurabhaka. (3rd: *ra-na-bha-ga*); see H. 3.46; Jd. 5.22, Vr. 5.7; Kd. 4.129 com.
- 2.1: 'You look more charming with your face, oh lovely one, which resembles the full moon's orb and which is as it were a delicate lotus endowed with sweet taste and fragrance.'
- 3: 'If at the commencement of the third Pāda of the Udgatā, six short letters in succession are employed, know that to be the characteristic of Lalitā, adopted by all clever men.' (3rd: *na-na-sa-sa*); cf. H. 3.47; Jd. 5.23; Vr. 5.8; Kd. 4.129 com. Kavidarpaṇa does not define these two varieties of the Udgatā; but they are mentioned by its commentator.
- 3.1: 'The Lord of the elephants is entering the lotus-lake which is darkened by the swarms of bees, hovering around for the thick honey in the lotuses.'
- 4: 'A Ṣaṇmātra with all long letters, (six) Caturmātras of which the first and the fifth have their long letter at the end, the second has it in the middle, the third at the beginning, the fourth at both the places, while the sixth has all short letters in it, a pair of Pañcamātras, the first with its short letter in the middle and second at the beginning; eight short letters, a long one, ten short letters, a long one, two short and then two long letters (coming in succession), are regarded as Pracupita by all poets.' Even here the constitution of all the four Pādas is defined in *continuation* and not separately for the different Pādas. Thus out of the six Caturmātras, four go to make up the first Pāda, while the other two Caturmātras and the Pañcamātras make the second Pāda; the eight Laghus and one Guru form the third and ten Laghus and all the rest constitute the fourth Pāda. The metre is generally known as Upasthita-Pracupita. (*ma-sa-ja-bha-ga-ga*; *sa-na-ja-ra-ga*; *na-na-sa*; *na-na-na-ja-ya*); cf. H. 3.48; P. 5.28; Vr. 5.9; Kd. 4.130.
- 4.1: 'The dense mass of nightly darkness, which is brought on by the rainy nights, which is impregnable in its form, which has all its beauty caused by the heaps of clouds and looks like a curtain, gives great satisfaction to the heart of the wanton woman.'

- 5 : 'This itself they call (by the same name) preceded by (the word *upasthita*; but (they call it) *Vardhamāna*, when the third Pāda is doubled.' (3rd : *na-na-sa-na-na-sa*); cf. *H.* 3.49; *P.* 5.29; *Vr.* 5.10; *Kd.* 4.130.
- 5.1 : 'Whence can one get the sporting love of a household wife, which is pure, of a gentle nature, with a mind wholly devoted, unassuming (*nibhṛtam*), as clever as that of a charming temptress, greater than the nectar, (and) full of sweet but subdued talk?'
- 6 : 'If there are (three) *Caturmātras*, of which the first contains two long letters, the second and the third have it in their middle and at the end respectively, and a long letter (in succession) in the third Pāda and the rest as in the *Pracupita* in its entirety, that is called *Śuddhvirāṭikā*; the same is called *Āvṛṣabha* when there is a *Yati* after the first *Gaṇa* (in the third line).' (3rd : *ta-ja-ra*); see *H.* 3.50; *P.* 5.30; *Kd.* 4.130 com. *Śuddhvirāṭikā* and *Āvṛṣabha* are identical metres, with the only difference about the *Yati* in the 3rd Pāda. In the former it is indiscriminate, while in the latter it is after the first *Gaṇa*, i.e., after the *Tagaṇa*. *Pingala* and *Hemacandra* ignore this distinction and call the metre *Śuddhvirāṭ Rṣabha*; but *Jayadeva* (*Jd.* 5.26) and *Jayakīrti* (*Jk.* 4.39) seem to be hinting at it. *Jayadeva's* commentator *Harṣaṭa*, however, thinks that the words *prathame ca viratiḥ* in *Jayadeva's* definition mean that here in this metre, the longer pause which generally occurs at the end of the first hemistich, must occur here at the end of the first Pāda and not at the end of the second! According to him the name of the metre is *Śuddhvirāṭ Rṣabha*, and this is supported by *H* and *P*. *Svayambhū's* words show clearly that he understands the two as different metres; yet from his illustration in v. 6.2 it seems that the word *gaṇa* refers to an *akṣaragaṇa* (i.e., *tagaṇa*) and not a *Mātragaṇa*. This must be admitted as an exceptional case, if that is so.
- 6.1 : 'For whose sake do you reflect and heave deep sighs, having placed your cheeks resembling the orb of the moon on your hands (i.e., palms) and, shedding a stream of tears at the memory of his virtues, oh (lovely girl) of full bosom and slender waist; do speak it out.'
- 6.2 : 'The deer feels grieved when the moon together with whom he (i.e., the deer) had been brought up, feels grieved; and in his happiness he feels happy; but in the case of the moon this is not so, at least not to that extent. Can a crooked person avoid his inborn nature?' It is not clear why the poet says that the moon is indifferent to the joys and sorrows of the deer.

Here we have an example of the Āvṛṣabha since there is a pause after the first Gaṇa in the third Pāda, i.e., after the word *candassa*. This, however, is strange; for the Gaṇas in the third Pāda are two Caturmātras and a Guru. But the *virati* is not after this Gaṇa, i.e., the first Caturmātra; it is after the Akṣara Gaṇa, namely, the Ta Gaṇa, which thus seems to have been intended by our author. If this is correct, it is clear that before Svayambhū this particular metre was defined in the terms of the Akṣara Gaṇas and he merely reproduces what he knew by convention, forgetting for the time being that he has otherwise almost completely ignored the Akṣara Gaṇas, so well known to the followers of Piṅgala.

- 7: 'There are four Amśas in a Pāda; each consisting of two letters only; (but) there shall never be the amśa with all short letters after the first letter (in any Pāda). That is the definition of a Śloka.' *lahuam* i.e., *amśam*. Śloka is a comprehensive and very general term which may include all the varieties of the Vaktra as defined below in vv. 8-11 and also the metres of the Anuṣṭubh class defined in the first chapter (i.e., Uktādividhi), except those that contain a *bha* or a *na* Gaṇa at the beginning of their Pādas. No other author, so far as I know, defines a Śloka; they all define Vaktra which has further restrictions in respect of letters 5 to 7 in a Pāda. Nanditādhya's definition of a Śloka at N. 91 is, on the other hand, entirely different. It only speaks of the 5th short and 6th long in all the Pādas and 7th short only in the 2nd and the 4th Pādas.
- 7.1: 'Who has created your face which is as beautiful as the orb of the moon and as delicate as a lotus, for giving pleasure to all the people?'
- 8: 'It is called Vaktra when the fifth letter is short and is followed by three long letters in succession; but it is Suvaktra, when (both the 5th) and the 7th are short. When this is so (i.e., both the 5th and the 7th are short) only in the even Pādas, it is called Pathyā; in the opposite case it is (called) Pathyā-Vaktra.' Thus in Pathyā we have the 5th short followed by three long in the odd Pādas and the 5th and the 7th short in the even ones, while in the Pathyāvaktra we have the 5th and the 7th short in the odd Pādas and the 5th short followed by three long letters in the even Pādas. Svayambhū's Pathyā and Pathyā-Vaktra are respectively called Pathyā-Vaktra and Viparīta-Pathyā by Hemacandra and others; cf. *H.* 3.34; *Jd.* 5.7; *P.* 5.15; *Vr.* 2.23; *Kd.* 4.119.
- 8.1: 'Kṛṣṇa and Arjuna, the leaders of the whole battle, attacked Karna;

(but) both of them were halted by him. Here there took place a measure (for measure).'

- 8.2: 'This (i.e., collirium) indeed is the body of the god of love itself reduced to black suit; that is why young ladies put collirium in their eyes.' Thus Kāma himself becomes stationed in the eyes of these girls; that is why their eyes are so bewitching.
- 8.3: 'While the moon goes on decreasing, it seems, for removing the black spot on his body, the spot remains the same as before; who can avoid (the results of) his former deeds?'
- 8.4: 'The moon has attained to the lovely beauty of your face on the Purnamāsī night, after performing the Cāndrāyaṇa (Prāyaścitta), but the black spot on its body has become only more prominent than before.' In the Cāndrāyaṇa Prāyaścitta one has to decrease the morsels of food corresponding to the decreasing phases of the moon in the dark half of the month and to increase them correspondingly in the bright half.
- 9: 'That Vaktra itself becomes Capalā, when there are three short letters in succession after the 4th (in each Pāda); and that metre becomes particularly charming in a Capalā Pathyā.' Svayambhū seems to mean that the metre becomes more charming when it combines the characteristics of both Capalā and Pathyā, i.e., when its odd Pādas have three short letters after the 4th letter, while its even Pādas have the 5th and the 7th letters short. His illustration supports this. See H. 3.36; Jd. 5.8; P. 5.16; Vr. 2.24; Kd. 4.120.
- 9.1: 'The sandal-paste, moon-light, camphor and the breezes from the Malaya mountain give pleasure to the mind only so long as the beloved person is by one's side.'
- 10: 'In the opinion of Saitava Vipulā is of four kinds only; in that of Piṅgala it is of eight kinds. Who shall be able to give the (full) definition of all its kinds?' They are too many to attempt that, says Svayambhū. Our text seems to be defective, as it does not give a definition in general of Vipulā, before mentioning its divisions. Probably a stanza is dropped by the scribe of our ms. See H. 3.37-39; Jd. 5.10-15; P. 5.17-19; Vr. 2.26-30; Kd. 4.120-121, for Vipulā and its varieties; see also note on Kd. 4.121.
- 11: 'When there are eight Akṣaras in the first Pāda, twelve in the second, sixteen in the third and twenty in the fourth, it is called Padacatur-ūrdhva.' See H. 3.40; P. 5.20; Kd. 4.128.

- 11.1: 'Fruitful indeed is the life, wherever he may live, of him whose wife possessing a face resembling the full moon, a pair of restless eyes looking like two blooming blue lotuses and a well developed bosom, is always obedient to his will.'
- 12: 'When (in this Padacaturūrdhva) all letters are short except the first two, it is called Pathyāpīḍa. But when two letters are long at the end (of the Pādas) only, it is called Āpīḍa.' The footnote No. 6 on p. 49 translates *pacchāvidu* by Pathyāpīḍaḥ and this may be correct; but Hemacandra calls it Pratyāpīḍa. See H. 3.41-43; P. 5.22; Kd. 4.124 com. Jayakīrti at Jk. 4.16-17 calls the Pratyāpīḍa and Āpīḍa by the names Anupadaruci and Padaruci respectively.
- 12.1: 'Now you have (really) caused pain to my limbs, though seemingly it is deep sexual pleasure, oh youth, who have attracted all activities of the minds of young girls, who are possessed of matchless qualities and who have displayed various kinds of lovely mutterings.' The speaker means that her lover is too precious to be exclusively possessed by her. So there is the fear of losing him.
- 12.2: 'Oh friend, how charming does my lover look, being the very essence of sexual pleasure, giving delight to the entire world of living creatures, affording deep love to the hearts of different girls, and appearing amiable (to every one) owing to hundreds of different virtues which are quite evident.'
- 13: 'When the first Pāda of this metre is exchanged for the second it is called Mañjarī; when for the third, it is Lavalī and when for the last it is called Amṛtadhārā.' The reading *palhaṭṭai* of the Palm-leaf ms. is better; see p. 128 below for the variants. See H. 3.44; Jd. 5.18-20; Vr. 5.3-5; Kd. 4.128 com. In all these places, however, the metre is called Kalikā instead of our Mañjarī when there is an exchange between the first and the second Pādas. The other two names are the same. P. 5.24 agrees with Sb.
- 13.1: 'Look how on the breast of the housewife, which is yellowish white like the flower of the Phalinī plant; the nail-marks made by her lover have assumed the beauty of a fresh foliage placed on the mouth of a golden pitcher.'
- 13.2: 'Say whom shall the swarm of black bees not please, when it is smeared with the pollen of flowers, and has given great joy to the minds of men by its humming, while it is greedily running after the fragrance of white lotuses?'

- 13.3: 'Look how the unusual dalliance of youthful girls somehow tempts even an ascetic, when their girdles of gold are gingling and their ample bosoms are throbbing gaily !'
- 14: Here ends the essence of Prākṛit (metres) in the Svayambhū-chandas, which has the five Amśas as its essence, which contains ample matter and which is perfectly clear owing to its having the definitions and the defined metres together.'

IV. UTSAHADINI

- 1: 'Thus far both the definition and the illustration of the essence of the Prākṛit metres have been given by me; now listen while the same is being told with reference to (those in the) Apabhramśa language.'
- 2: 'Just as the nasalised *i* and *hi* are (pronounced) short at the end of a word (when necessary), so also according to the requirements of the metre, (nasalised) *u*, *hu* and *ha* should be similarly treated.'
- 2.1-2: Both the lines seem to be quoted from some Apabhramśa poem on the Rāmāyaṇa topic. They are evidently the lines of the Dohā metre; so that *tu* in *tumha* in 2.1 and *ko* in 2.2 are to be pronounced as short, in addition to *um* and *hum* for which they are quoted.
- 2.3: These two lines which illustrate the short *ham*, are a part of a Ghattā describing the greatness of the Jinās.
- 3: 'Just as both the simple *e* and *o* are treated as short when they stand at the end of a word, so also they are, whether at the beginning, or in the middle or at the end of a word, even when joined with a consonant.
- 3.1: The stanza is in the Dohā metre; simple *e* in *puttie* and also *e* combined with consonants in *je*, *ke*, *te* and *sire* are short. Similarly, simple *o* in *dhendhanao* and *o* combined with consonants in *jo*, *so*, *ko* and *taho* are all to be pronounced short.

'Oh daughter, enjoy a kingdom with them, whosoever give money to you; (but) if there be any person who is empty-handed, may Indra's Bolt fall on him, even if he were charming.' This is a piece of advice given by a prostitute to her daughter.

- 4: 'There occur six Caturmātras, of which the third and the fifth have their long letter in the middle or, have a short letter on each side (i.e., have a Madhyaguru or a Sarvalaghu at that place); the poets prescribe this to be the characteristic of the Utsāha.' Svayambhū

starts with the Utsāha and Hemacandra has very likely followed him. Kavidarpaṇa has a different arrangement, for which see *Kavidarpaṇa*, Introduction para 5.

- 4.1: The stanza describes the behaviour of those warriors who do their best in fighting, remembering the favours of their master.
- 5: 'Fourteen (Mātrās) in the first and the third Pādas, and twelve in the second and the fourth; such indeed is the characteristic of a Dvipathaka or Dohā in the Apabhramśa Śāstra.' The Śāstra is the Chandas Śāstra. The same stanza is repeated at Sb. 6.90 below among the definitions of the Antarasamā Catuspadīs. See also *HPk.* 6.20.100 and *R.* 129. Virahāṅka mentions (at *Vjs.* 4.27) that there must be a single long letter at the end of the odd Pādas and two at the end of the even ones. On the other hand, *Prākṛta Paṅgala* I.78, *Kavidarpaṇa* 2.15, *Chandaḥkośa* v.21 prescribe that there shall be 13 and 11 Mātrās respectively in the odd and even Pādas of a Dohaka. *Kavidarpaṇa* further says that at the end of the even Pādas there must be a long letter followed by a short one, as a matter of convention.
- 5.1: 'Oh mother, the camel is perverse; whatever is offered to him he would not eat, but would run for some bramble growing on the desert!' This is probably an Anyokti by a handsome girl who complains that the youth whom she loves does not care for her and yearns for some ordinary woman.
- 5.2: 'The wandering moon has secured a friend (after all), namely the Ocean, who wanes when he wanes and waxes when he waxes.' Cf. *N.* 83 where the same stanza is quoted; here it is ascribed to Mātrdeva.
- 6: 'Thirteen Mātrās in the first and the third; twelve in the second and the fourth. This is the characteristic of Upadohaka in the Apabhramśa Śāstra.' See *H.* 6.20.99; *R.* 11, 127. The same stanza is repeated at Sb. 6.88 below.
- 6.1: This too seems to be an Anyokti like 5.1 above; but the second half is not clear.
- 7: 'Twelve Mātrās in the odd Pādas (and) fourteen in the remaining ones; know such to be the characteristic of an Avadohaka.' See *H.* 6.19.45; *R.* 10, 128. The same stanza with a slight change in the latter half is repeated at Sb. 6.89 below.
- 7.1: 'What shall I do, oh mother? If I fall at his feet, my Lover does not care for me; (but) if I feign anger, he calls me refractory and fickle-minded.' This is the complaint of a girl who finds that her lover has

now lost interest in her and wants some excuse to break off with her. See *HPk.* 6.19.45 for similar thought.

- 8: 'There are five Pādas in all in the Mātrā metre; among them in the even ones there are three Caturmātras. In the other ones there occur two Pañcamātras, a Caturmātra and a Dvimātra (in succession). But (the Caturmātra) in the third place of the odd Pādas, excepting the first, shall not be an Ādya-guru, an Antya-guru or a Sarva-guru.' This definition entirely agrees with that of Hemacandra at *HPk.* 5.17, but much differs from that of the *Kavidarpaṇa*, *Kd.* 2.27-28; see notes on this, last. Instead of 16, 12, 16, 12, 16 of our Mātrā, *Kavidarpaṇa* has 15, 11, 15, 11, 15 Mātrās in the five Pādas of a normal Mātrā stanza.
- 8.1: 'He, i.e., Rāma, had monkeys for his friends, the ocean was very difficult to cross. But even that was bridged with a dam of blocks of stones. As in the case of Rāma, glory is achieved by a man who is active.'
- 9: 'If in the second or the fourth Pādas a Pañcamātra is employed at the very first place (i.e., in place of the first Caturmātra), that Mātrā is called Mattabālikā; if a Trimātra is employed at the third place (i.e., in place of the third Caturmātra), it is called Mattamādhukarī.'
- 9.1: 'The source or origin of the white and the blue lotus is the same; still the moon alone gives delight to the bed of the blue lotuses and the sun alone to (that of) the white ones. A fruit is necessarily obtained by a person from another, in accordance with what he had deposited with him.' Here the Lakṣaṇa of the Mattabālikā is seen in the second Pāda only.
- 9.2: 'The roads are full of mud, the sky displays the rainbow; the grounds are wet, the water is tasty; the clouds are thundering, the lightning is repeatedly flashing in the quarters. And then thereafter, causing infatuation to the minds of the travellers, the beautiful rains have started.' Here the Lakṣaṇa of the Mattabālikā is in the fourth Pāda only.
- 9.3: I do not understand the significance of the stanza. It is an example of Mattabālikā which has its characteristic in both the second and the fourth Pādas.
- 9.4: 'The night gives pleasure to couples (as a rule); but if it is so, why is the poor Cakravāka alone separated (from his mate) at that time? It is one's own former action that yields its fruit; none can give to any one, nor take away from him (unless he has already worked out

for it in his earlier lives).’ This is Mattamadhukarī which has a Trimātra in the second Pāda alone.

9.5: ‘At different places are seen herds of cows which have stopped eating, but whose jaws are moving owing to rumination, resting during the night, white and bright, as though they were heaps of moon-light.’ This is Mattamadhukarī having its characteristic feature in both the second and the fourth Pādas. No example is given by Svayambhū where it exists only in the fourth Pāda.

10: ‘If at the commencement of the 3rd and the 5th Pādas, both the Gaṇas are Caturmātras (in place of the usual Pañcamātras), it is called Mattavilāsini. On the other hand, if all the three are Pañcamātras (i.e., if the Caturmātra is replaced by a Pañcamātra), they call it Mattakarini.’

It will thus be seen that in all the varieties of Mātrā the first Pāda is unchanged and so is the second Caturmātra in the even Pādas, i.e., the second and the fourth.

10.1: ‘This indeed is a terrible order, which is clearly destructive to the life of a man. On the one hand there is that dreadful serpent Kāliya, which kills by mere sight, and on the other, there is Kāṁsa too, who is bent on killing (Kṛṣṇa). Where can one go, what can one do?’ This appears to be from some poem on the topic of the Harivaṁśa; the next one too, appears to be from the same poem. They are ascribed to Govinda.

10.2: ‘Even though Hari looks at all the Gopīs with (equal) regard, yet he unmistakably directs his glances just in the direction where Rādhā stands; who can conceal his poor eyes which dash forward through affection?’

10.2: Here in the third line the letter *hīm* is intended to be long in both the words, while in the fifth one letter has to be added as shown. This would make the Mātrā a Mattakarini in both the Pādas. If the letter is not added in the fifth line it would be a Mattakarini only in the third Pāda. The stanza occurs in a slightly different form at Hemacandra’s *Śabdānuśāsana*, 8.4, 422(5). It is quoted there to illustrate the word *drehī* for the Sanskrit *dṛṣṭi*. But our text does not contain that word at all. For attempts at its interpretation see Pischel, *Hemacandra’s Prakrit Grammar*, Part II, pp. 218-219; Alsdorf, *Apabhraṁśa Studien*, p. 55; Bhayani, *Bhāratiya Vidyā*, 1945, pp. 14-15.

- 11 : 'And that (Mātrā) too, which is a mixture of all the different forms, is called Bahurūpā. If there is at its end a Dvipathaka, it is well known as the famous Raḍḍā or Vastu, here (in prosody), which has nine Pādas (five of the Mātrā and four of the Dohā).'
- 11.1 : A Gopī has placed a lotus leaf after having cut it on her expansive bosom; owing to her separation from Hari she is suffering from this torture. The poor ignorant girl has got her due; now let the dear one (i.e., Hari) do whatever he likes.' This too is evidently from the same poem of Govinda, from which 10.1 and 2 are quoted. This is an illustration of Miśrā; the 4th Pāda is that of Mattamadhukarī, having a Trimātra in place of the third Caturmātra.
- 11.2 : 'What is the good of him being born, when after his birth his enemies do not shake with fear, good men do not feel happy and wicked men do not die out of anxiety ? (Only) the virginity of a good girl was destroyed. What indeed is the use of such a son being born, who is a man only in name and whose fame has not remained outside after completely filling up big and small caves (of the mountains) and the hollows (between the two worlds)?' This is an illustration of Raḍḍā, the first stanza being in the Miśra Mātrā, in which the second line is that of the Mattabālikā where the first Caturmātra is replaced by a Pañcamātra. In the Dohā both *e* and *te* in the first Pāda are to be pronounced as short. See the rule in v. 3 above.
- 11.3 : 'Misfortunes disappear....grows, success is assured, good name spreads, victory approaches, (and) sins also vanish like darkness when dispelled by the rays of the sun. If there had not been Jina's feet for the sake of those who wander in the forest of miseries, the whole world would have only strayed away aimlessly, being left without a support.' Here the first stanza is in the regular usual Mātrā metre, having 16, 12, 16, 12, 16 Mātrās in its five Pādas.
- 12 : 'There are three and a half Caturmātras preceded by a Ṣaṇmātra (in each Pāda); such are the Pādas of a Vadanaka. When a Trimātra is substituted in the place of the fourth (Caturmātra, i.e., the half Caturmātra at the end of the Pāda), it is called Upavadanaka. A Vādāna having a rhyme at its end is called Maḍillā. This Maḍilā (or Maḍillā) becomes possible (either) when it is composed with two ending rhymes (for the two halves), or when it is endowed with a common rhyme for all the four Pādas.'

From these definitions it would appear that Svayambhū employs the term Maḍilā to signify both the kinds of a Vadanaka, i.e., the one that has one common rhyme for all the Pādas and the other which has two separate rhymes for the two halves; but the introductory words before 12.3 show that he has a separate name, i.e., Aḍilā for the single-rhymed type, and that he treated Maḍilā as a common name signifying both the types. Hemacandra, *HPk.* 5.30, on the other hand, treats Aḍilā as the common name signifying both the types and records a view of 'Some' that Maḍilā is a specific name of Aḍilā when all its Pādas have a common rhyme. See also my notes on *Kd.* 2.21-22. Rājasekhara, *R.* 20, agrees with Svayambhū.

- 12.1: 'May you live as long as there is water in the Ganges; do not leave aside sandal or Agarū from your limbs (i.e., continue to use them); ride on swift-galloping horses, (and) enjoy in the company of your wife who is good and virtuous.' The stanza seems to contain a blessing to a young man from an elderly person.
- 12.2: 'While fried and unfried things are moistened and pounded (in it), warriors and brahmins visit and revisit that house. (But) being always infested with guests who visit and revisit it, the same is (in course of time) made devoid of rice-grains.' This seems to be something like a proverb, describing the fate of houses which are too much open to guests without any discretion. Here the two halves have two separate rhymes.
- 12.3: 'How can that girl, who is possessed of teeth bright like the Atimukta flowers, whose feet have a pair of glingling anklets and whose arms are adorned with ivory armlets, be enjoyed by persons whose teeth have fallen (i.e., who are very old) ?'
- 13: The text of the first half is corrupt; but a comparison with Rājasekhara's *Chandaḥśekhara*, v. 19 makes its meaning obvious. Any metre which they recite for the purposes of encouragement and compose in the Prākṛit language, is to be known by the name Vadanaka. Thus Vadanaka is a general name for a class of metres which are employed for a particular purpose, without any relation to the constitution of its Pādas.
- 14: 'This is called Prahelikā in Apabhraṃśa which is employed to serve the purpose of the Utsāha and others or has the characteristics of a Dvipathaka or Dohaka.' Prahelikā is not the name of a particular metre, but of a type of a composition where the intended meaning of the speaker is to be guessed from some word or words in the

composition itself, or even without them. See R. 21 and Daṇḍin, *Kāvyaḍarśa* 3.96 ff.

- 15: 'That is called Hṛdayālikā where letters and words which are apparently without meaning are employed for a composition in many different metres, the real intended meaning being kept in his mind (by the poet).' Compare R. 21.
- 16: 'Since a hero is described under the image of a bull, the metre is called Dhavala; this Dhavala, too, is of three kinds; eight-footed, six-footed and four-footed.' For the Dhavalas, which is the name of a class of metres, like the Maṅgalas, see *Kavidarpaṇa*, Introduction, para 12. The stanza is quoted both by Hemacandra, *HPk.* 5.32 com. and *Kavidarpaṇa*, 2.32 com. Also cf. *HPk.* 5.42.2 and R. 28.
- 17: 'In a Dhavala, there are three and a half Caturmātras in the first and the third Pādas, three Caturmātras in the second and the fourth; three Caturmātras with one Mātrā less in the fifth and the seventh Pādas. In the sixth Pāda they are as they are in the second and the fourth; then only two and a half of them (i.e., Caturmātras) in the eighth.' *aṭṭhavave* stands for both *aṣṭame* and *aṣṭapade*.

This Dhavala is the same as Hemacandra's Yaśodhavala at *HPk.* 5.34; but there is some difference as regards the sixth and the eighth Pādas. According to Hemacandra, both of them contain two and a half Caturmātras or three Caturmātras and are equal and similar, while Svayambhū directs that the two are of unequal length, the sixth having three Caturmātras and the eighth having only two and a half of them in it. Rājaśekhara (R. 22) agrees with Hemacandra.

- 18: 'There are three Ṣaṇmātras in the first and the third Pādas; two Ṣaṇmātras in the second and the fifth and in the remaining ones there are two Ṣaṇmātras followed by a Caturmātra or a Pañcamātra. That is the characteristic of the Ṣaṭpada Dhavala, which gives pleasure to the ear.' The text is clearly defective, particularly in the fourth and the sixth Pādas. See Hemacandra, *HPk.* 5.35 and R. 23. According to these last two, however, the first and the fourth Pādas contain only two Ṣaṇmātras and a Dvimātra, instead of three Ṣaṇmātras; similarly, the second and the fifth Pādas contain two Caturmātras only instead of two Ṣaṇmātras.
- 19: 'If a Ṣaṇmātra, a Caturmātra and a Trimātra occur in the first and the third Pādas, also a Ṣaṇmātra and a Caturmātra in the others, it is the characteristic of the four-footed Dhavala.' *e* in *dhavale* is to be

read as short. This is the same as the Bhramara-Dhavalā of *HPk.* 5.37 and *R.* 25. Svayambhū does not mention the Guṇa-Dhavalā which contains a Ṣaṇmātra and two Caturmātras in the odd Pādas and which has an additional Dvimātra or Trimātra in the even Pādas. For this see *HPk.* 5.36 and *R.* 24.

- 20: 'Know that to be the metre Maṅgalā, which is employed for auspicious occasions and which contains a Ṣaṇmātra followed by two Caturmātras in the first and the second Pādas and either five Caturmātras or four Pañcamātras in the third and the fourth Pādas.' This is much different from Hemacandra's Maṅgalā defined at *HPk.* 5.39. This latter contains one Ṣaṇmātra and three Caturmātras in each of the first two Pādas, while the last two contain five Caturmātras each; further, a Dvimātra or a Trimātra is added at the end of each Pāda. Rājaśekhara at *R.* 26 entirely agrees with Hemacandra, or rather, the latter has wholly followed the former and not Svayambhū. The metre is a proper Ardhasama Catuspadī, in which the lines in each half are equal and similar, but the halves themselves are dissimilar.

In addition to this particular Maṅgalā, Svayambhū explains how the term Maṅgalā is added to the names of other metres when they are composed for the sake of an auspicious occasion. (This is to be understood from the word *mangalatthe* in v. 20). It would seem that a verse containing a general direction about the use of name maṅgalā as appended to the name of another metre, is missing; because, otherwise, the illustrations under v. 20 would be unintelligible. Such directions are found at *HPk.* 5.40 and com. and *R.* 27-28.

Maṅgalas which are composed in the Utsāha, or Helā or Vadana metres are respectively called Utsāha-maṅgalā, Helā-maṅgalā, and Vadana-maṅgalā; in this connection Svayambhū repeats the definitions of these metres from the earlier portion of his work. Of the three Helā was defined among the Khaṇjakas in ch. 3 of the Pūrvabhāga, but that portion of the ms. is not available; see p. 110. It is defined by Hemacandra at *HPk.* 5.49.

- 21: 'Thus the Dhavalas and the Maṅgalas are called by those very names of metres, with whose characteristics they are composed, by the prosodists.' See note on v. 20 above and *Kd.* Introduction, para 12. Also see below *Sb.* 8.30-31.

- 22: In this chapter a few important Apabhraṁśa Catuspadīs of the Sarvasama type are defined; they are Utsāha, Dohaka and its two kinds Upadohaka and Avadohaka. Mātrā with all its kinds, the strophic

couplet Raddā, Vadana and Upavadana, Aḍilā and Maḍilā. At the end of the chapter several general terms which are used of more metres than one are mentioned and explained; they are Prahelikā, Hṛdayālikā, Dhavala, and Maṅgala. Among the Dhavalas, however, three particular ones are defined, having eight, six or four Pādas in their stanzas. Similarly a particular Maṅgala too is defined. The other characteristic metres of the Apabhraṁśa language are discussed in ch. 8 below, while chs. 5, 6 and 7 are taken up by Ṣaṭpadīs, Ardhasama Catuṣpadīs and Dvīpadīs.

V. ṢAṬPAJĀTĪH

- 1: This stanza defines a Dhruvaka; 'Dhruvaka is a stanza which is repeatedly added in all poetic compositions in their earlier part, i.e., at the beginning of a Kaḍavaka or a Sandhi; it is of three kinds: six-footed, four-footed and two-footed.' It is intended to serve the purpose of a connecting link between two Kaḍavakas of a poem. It is called Dhruvaka, not only because it appears in the same form, but also because it is unfailing in its appearance. See *Kd.* 2.30-31, vv. 73-74; also *Kd.* Introduction, para 12.
- 2: The directions about certain Akṣaras which may be treated as 'short', though they are ordinarily considered as long, are given above at 4.2-3 (p. 52), so far as Apabhraṁśa poetry is concerned; here in this stanza, a general direction about the metrical value of a short letter standing at the end of a line or Pāda is given. 'A single short letter at the end (of a Pāda or hemistich) is equivalent to a long one when the (required) number (of Mātrās) is incomplete; (but) a short letter conjoined with another short letter which precedes it, must be considered as only a short one when it stands so as to complete the (required) number.' This seems to be the import of the stanza; the contrast intended is between *ekkalahu* and *jamalalahu*, as also between *visamasamkhā* and *samasamkhā*. It therefore follows that the *ekkalahu*, though it is expected to be short, becomes long by its position at an uneven number of the Mātrā, at the end of a Pāda; this means that if this short letter is not able to stand for the last number of the Mātrā at the end of that Pāda, it must stand for two Mātrās and thus make up the required number and thus do the work of a long letter. If, on the other hand, a long letter were to stand for the last Mātrā of a Pāda, it must yield only one Mātrā which is necessary and thus do the work of a short letter. I have understood the word *jama-*

lalahu in the sense of a long letter (double short, i.e., long). In short, the last letter of a Pāda may be considered short or long according to the need of scansion, whatever its real nature is. This stanza is quoted by Hemacandra at *Chandonuśāsana* (NSP. ed.) 1.5 com., without mentioning Svayambhū's name, in support of his direction about the metrical value of the last letter of a Pāda. Hemacandra also quotes another stanza in Sanskrit where the words *guru* and *laghu* are actually used for our *ekkalahu* and *jamalalahu*. It is as follows :—

ओजसंख्या यदाभीष्टा ध्रुवासु विरतौ तदा ।

गो लता युग्मसंख्ये तु विरतौ गुह्यता लघोः ॥

Svayambhū has himself observed the rule and often enjoyed the option, both in respect of the *same* letter in different stanzas, as also in respect of different letters in the *same* stanza. Thus he considers the concluding letter *na* of the instrumental singular as *short* in Sb. 6.39. 1 *bd*; 44.1c, 52.1c and 54.1c; but as *long* in Sb. 6.56.cd, 72c, 96c, 114d, 112c; 8.1 and 8.1.1. On the other hand, he considers the concluding short letter as *short* in Sb. 6. 10.1c (but *long* in *bd*), 56.1ac (but *long* in *bd*), 61.1c (but *long* in *abd*), 87.1c (but *long* in *bd*), 124.1a (but *long* in *bd*). In the following cases he considers the final short as *short* only : Sb. 6.31.1c; 8.3ab; 8.3.1abcd; 8.8bd; 8.8.1abcd; 8.12.1ac; 8.13.1bd; 8.20.5de (but as *long* in *abc*) and so on. Also see Bhayani, *Paumacariu*, Introduction pp. 79-83.

3.6: These stanzas define the three main kinds of Ṣaṭpadīs, each of which is eightfold, according as its third and sixth Pādas contain from 10 to 17 Mātrās in each of them. The first of these three is called Ṣaṭpadaajāti; its 1st, 2nd, 4th and 5th Pādas contain only 7 Mātrās each, while its 3rd and 6th Pādas contain from 10 to 17 Mātrās in them, thus yielding its eight kinds. The second of the three main varieties is called Upajāti Ṣaṭpadī; its 1st, 2nd, 4th and 5th Pādas contain only 8 Mātrās each, while its 3rd and 6th Pādas contain from 10 to 17 Mātrās, thus yielding its eight kinds. The third main variety is called Avajāti; its 1st, 2nd, 4th and 5th Pādas contain only 9 Mātrās each, while its 3rd and 6th Pādas contain from 10 to 17 Mātrās, thus yielding its eight kinds. The defining stanzas 3 and 4 have respectively 10 and 11 Mātrās in their third and sixth Pādas; while stanzas 5 and 6 have both 13 Mātrās in the same Pādas.

4.1: This is an illustration of the fourth kind of the Ṣaṭpadaajāti, which has 13 Mātrās in its 3rd and 6th Pādas, the remaining ones having only 7 Mātrās each. The illustration is from Svayambhū's own poem

Paumacariu 3.3.11, as shown by Dr. Bhayani in his Introduction to the edition of that poem (p. 128).

'That alone is the divine Highest Soul, the lord of the sole Universe, in whom these marks are well established and whose self is considered by him as similar to that of others (in respect of joys and pain).'

51 : This is in Sanskrit : 'The moon behaves like the sun ; sandle like fire, friends like foes. When Fate is unfavourable and the mind becomes perturbed, all things appear otherwise.' This illustration is of the second kind of Upajāti where the 3rd and the 6th Pādas contain 11 Mātrās each, the others having 8 each.

61 : This stanza is an illustration of the 6th kind of the Avajāti as actually mentioned in the introductory words ; its 3rd and 6th Pādas contain 15 Mātrās each. It is from Svayambhū's own poem, *Paumacariu* as shown by Bhayani, *Paumacariu*, Introduction, p. 128.

'In some places, fresh (ruddy) nail-marks were observed well placed on the tops of the breasts (of young ladies), as if they were the hoofs, deeply planted, of the Horse, namely God of Love, ridden over for speed.' *ṇahara* is a nail-mark.

Here, as will be noticed, the last letter in the 3rd and 6th Pādas, is to be counted as short, so as to give us only 15 and not 16 Mātrās, as intended by the author himself. For these varieties of Śatpadis, see HPk. 6.15-17 ; Kd. 2.29 and R. 30-32.

VI. CATUṢPADAI-DVIPADYAH

This chapter deals with the Antarasamā and Ardhasamā Catuṣpadis which are really not different from each other in respect of their constitution, but have only a different arrangement of their Pādas. Thus in the Antarasamā the 1st and the 3rd Pādas are equal and similar, like the 2nd and the 4th ; in the Ardhasamā, on the other hand, the 1st agrees with the 2nd, and the 3rd with the 4th. Thus by a mere exchange of Pādas, one can be turned into the other and so Svayambhū defines and sometimes also illustrates, the 110 kinds of the Antarasamā only. These 110 varieties are obtained by a permutation and combination of the lines of different length, containing from 7 to 17 Mātrās ; thus a line of 7 Mātrās yields by its combination with lines of 8 to 17 Mātrās, 20 kinds of the Antarasamā Catuṣpadī. These are defined in vv. 2-21. The composition of this line of 7 Mātrās is given in v. 22 : it is twofold ; i.e., either by means of a Caturmātra and a Trimātra, or a Pañcamātra and a Dvimātra (*ca-ta* or

pa-da). A line of 8 Mātrās similarly yields 18 and those of 9, 10, 11, 12, 13, 14, 15, 16 and 17 Mātrās respectively yield 16, 14, 12, 10, 8, 6, 4, and 2 kinds of the Antarasamā or the Ardhasamā Catuspadī. These kinds of the Catuspadī which are yielded by lines of 8-16 Mātrās with their combination with lines of 9-17 Mātrās are respectively defined by Svayambhū in vv. 23-40, 42-57, 61-72 (see f. n. on p. 74), 74-85, 87-96, 98-105, 107-112, 114-115 and 117 of chapter sixth. In the last two cases, two kinds are given in one stanza; but in the others, a separate stanza is used for each one. After giving the total number of the kinds yielded by a line of particular length, Svayambhū explains the composition of that line in terms of the different Mātrā Gaṇas. Thus vv. 22, 41, 58, 73, 86, 97, 106, 113, 116, 118 and 119 respectively give the composition of the lines of 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 and 17 Mātrās and the first ten of these stanzas also mention the total number of the kinds yielded by them, viz., 20, 18, 16, 14, 12, 10, 8, 6, 4 and 2 respectively.

In defining these different kinds the composition of the odd lines is given first and generally the shorter line is mentioned before the longer one. Thus a Catuspadī with 7 in the odd and 8 in the even Pādas is mentioned before its counterpart with 8 in the odd and 7 in the even Pādas. But there are some exceptions to this rule just at the commencement; thus Catuspadīs with 9, 10, 13, 14, 15, 16 and 17 Mātrās in the odd Pādas and 7 in the even ones are defined before their counterparts with 7 in the odd and 9, 10, 13-17 Mātrās in the even Pādas. But afterwards, the shorter line for the odd Pādas is mentioned first and then the longer line for the same Pādas afterwards. In theory, every one of these 110 kinds can be used for the composition, though in practice only some of them were actually employed by the poets. Svayambhū does not compose his own illustrations for all of them like Hemacandra, but only now and then quotes from the existing Apabhramśa literature including his own poems on the Rāmāyaṇa and the Mahābhārata themes namely, *Paumacariu* and *Ritthanemicariu*.

10.1: 'The fires of separation burn even in the waters of a wet curtain;

13: Rāvaṇahastaka; it is called Rāvaṇamastaka at *HPk.* 6.19.9 and *R.* 47. It is called Rāsa at *Sb.* 8.27 below.

13.1: 'Separated from his dear mate and striking down the black bees by the flapping of his ears, a wild elephant roams about bewildered in the forest.'

- 15.1: 'It is far better that one's self is covered with heaps of stones than have a quarrel started with one's own friends at the instigation of other people.'
- 17.1: 'At the approach of the night the Cakravāka bird, being separated from his mate, wanders about in the Lotus-pond, flapping his wings now and then.' Cf. *Vikramorvaśīya* IV. 6 where a Haṁsa is mentioned in place of a Cakravāka (Pandit, p. 113Aa).
- 19.1: 'On the summit of the mountain a Palāśa tree is in full blossom in the early Fālguna month and looks as if it were the wild Fire itself wanting to take stock and see what (trees) were burnt by him and what were left out, (from the forest on the mountain).' Just as an observer must go to a high place, so the wild Fire ascends the mountain peak and makes his observation for taking stock of what was done by him and what was yet to be done. Bhayani quotes a similar stanza from *Paumacariu* (P.C. p. 128) but its metre and wording are different, though the idea is the same.
- 20: Svayambhū's Kadambaśiras is the same as Lilālaya of H. 6.20. 68 and R. 56.
- 21.1: 'The face of the beloved, feeling delighted owing to the touch of the arms of the lover, looks as if it were a lotus of lovely petals, feeling delighted at the touch of the rays of the Sun, free from dirt and so appearing very charming.' Most of the words are double-meaning.
- 22: The Pāda of seven Mātrās is of two kinds, namely, it may be made either with a Caturmātra and a Trimātra, or with a Pañcamātra and a Dvimātra.
- 26: Tārāgaṇā seems to be a scribe's mistake for *goroṇā* (Gorocaṇā) which is the name given to this metre by H. 6. 19. 70; R. 62.
- 29.1: 'The lordly elephant, namely, the mind (of a man), intoxicated by the rut of Infatuation (and therefore), under the influence of the she-elephant namely, Pleasures, has drowned himself in the deep waters of Misery.'
- 31.1: 'The deer has taken shelter on the moon like an ordinary timid person; so indeed, he is not known by his own name like the brave lion.'
- 33.1: '(Then) Hanumān was surrounded by the demon warriors and looked as if he were the rising sun surrounded by clouds in the sky.'

This is identical with Svayambhū's own *Paumacariu*, 65.1 as shown by Bhayani, P.C. p. 128.

35.1: '(Then he stood) after overpowering both Kṛṣṇa and Arjuna, who were deprived of their bows and enraged with fury, the two great wrestlers of the Bharata race and of great merit.' This is obviously the description of an incident in the Mahābhārata war and probably refers to Karna. It may be from Svayambhū's own poem on the Mahābhārata theme.

37: This metre is called Punyāmalaka by Rājaśekhara (R. 73) and Hemacandra (HPk. 6.19.21). But Svayambhū calls it Prajñāmūla.

37.1: 'A black bee keeps on humming and avoids perching on (other) flowers (except the lotuses) ; is he Brahmadeva of four faces remembering the Navel-Lotus of Nārāyaṇa ?'

39: This Kaṅkellinavapallava is called Navakusumitapallava by both HPk. 6.19.22 and R. 73.

39.1: 'The seat of the Old one (i.e., The Creator) with a pair of black bees hovering around it, is fascinating as if it were the face of a lovely damsel with a pair of her restless eyes.' The seat of the Old one is a lotus, the Old one being the Creator Brahmadeva, whose seat is a lotus.

40: This Puṣpāstarāṇa is Kusumāstarāṇa of Hemacandra (H. 6.20.17) and Rājaśekhara (R. 52), *kusuma* being the same as *puṣpa*.

41: A line of 8 Mātrās may be made with a Ṣaṇmātra and a Dvimātra or a Pañcamātra and a Trimātra, or two Caturmātras.

42.1: 'The lady of white complexion was seen lying down in her courtyard, as if she were the light of the moon bundled together and left there.'

43: Mārgavisamlāpa of Svayambhū is the same as Madhukarīsamllāpa of HPk. 6.19.78 and R. 80. Could the reading be *mahuari* for *maggavi* ? *ra* and *va* are often interchanged by our scribe.

44.1: 'There is only one Arjuna (on earth) ; so saying again and again, Drona bewails in the heaven.' This also looks like a stanza from Svayambhū's Mahābhārata poem. The point of Drona's grief is not very clear.

45: HPk. 6.20.79 and R. 82 call the metre Sukhāvāsa and our Mukhāvāsa may be a misreading for the same.

- 46 : HPk. 6.19.25 and R. 83 call the metre by the name Māṅgalikā, instead of Svayambhū's Kumkumakalā.
- 47 : Kumkumalekhā : See below Sb. 8.8 for the same metre called only Chaddanikā.
- 49 : Svayambhū's Kurabakadāma is the same as Kuvalayadāma of HPk. 6.20.81 and R. 86.
- 50.1 : 'It was reported to the lord of the Demons by the arrow, after going to him, that Nila could not be controlled, like the Great Soul without knowledge.' This seems to be from a poem on the theme of Rāmāyaṇa.
- 52.1 : 'Aṅgada advanced towards him breaking through the top of the house ; (and) the demon chief, Daśānana, came out through the gate of the fort, after putting on his armour.' This too seems to be from the Rāmāyaṇa poem.
- 54.1 : 'As Bibhiṣaṇa began to grieve for the loss of his brother (Rāvaṇa), the monkey warriors started weeping in sympathy with him in his bereavement.' This is ascribed to Caturmukha, but is actually found in Svayambhū's *Paumacariu* 71.1 as shown by Bhayani (P.C. p. 128). Perhaps the correct reading is *sa-harivai-vāṇāraloo* (*sa-haripati-vānara-loko*) 'Vānara warriors, together with the monkey chief, Sugriva, began to weep.' See on v. 43 above.
- 55 : Svayambhū's Aṅgadalalitā is Kuñjaralalitā of HPk. 6.20.84 and R. 92.
- 56.1 : 'Rāvaṇa who gave trouble to gods and men (should we read *suranara* for *suravara* ?) and from whom the world shook in terror, was consumed (by fire). The fire attacked (his body), saying as it were 'How will others now leave the right path ?' (seeing the fate of Rāvaṇa)'. Even this is found in Svayambhū's *Paumacariu*, 77.13.13 as shown by Bhayani (P.C. p. 128).
- 58 : A Pāda of nine Mātrās can be made with a Ṣaṇmātra and a Trimātra, or three Trimātras or a Caturmātra and a Pañcamātra.
- 59-60 : The meaning of these two stanzas is not very clear to me. They recount the 54 kinds defined so far and introduce the remaining ones. A comparison with v. 120 below will, however, show that Svayambhū makes a distinction between Vastukas and Dhruvakas, the former being 54 in number and containing either in their odd or even Pādas seven to nine Mātrās only (but not more). Dhruvakas are the remaining 56 Antarasamā Catuspadīs which have ten to seventeen Mātrās in

their odd or even Pādas, but not less than that in any of them. In short the shorter Catuspadis are Vastukas, while the longer ones are Dhruvakas. See below Sb. 7.1-2 for a similar distinction between Dvipadis and Dhruvakas.

61.1 : The meaning is not clear.

63 : Our Kokilarin̄choli is Kokilāvali of H. 6.19.33 and R. 101. As said by me in my note on p. 74, two stanzas appear to have been dropped by the scribe of the ms.

63.1 : 'In his wanderings through the forest, those fourteen (demon chiefs) were pierced with his arrows by Lakṣmaṇa and so looked as if they were tall Palāśa trees in full blossom.' This stanza which is evidently from a Rāmāyaṇa poem, is here ascribed to Caturmukha by Svayambhū. *ni* in c seems to have been dropped by haplology. In this case, *ni* in c is to be counted as a short letter like *a* in v. 61.1 c in accordance with the rule given at Sb. 5.2. (See note). But also cf. Bhayani, P.C. Intro. p. 17 f.n.

65.1 : 'Just then the moon arose which adorned the sky and appeared as if it were the wheel of the sun's chariot left behind by Aruṇa (the charioteer).' This also is ascribed to Caturmukha.

68.1 : 'The son of Vālin entered as an envoy into the assembly-hall of that (Rāvaṇa), to whom service was rendered in the three worlds, even by a multitude of the gods with a trembling mind.' This is possibly from Svayambhū's own Rāmāyaṇa poem.

73 : The Pāda of 10 Mātrās can be composed with a Ṣaṇmātra and a Caturmātra, or with two Pañcamātras, or with a Dvimātra and two Caturmātras.

75.1 : 'Having heard about the arrival of Hari, that king raised white fluttering flags in the city of Mathurā, where the citizens were greatly pleased (to hear it).' This is from a poem on the theme of the Harivaṁśa, perhaps composed by Svayambhū himself.

77 : Kusumākulamadhukara of Svayambhū, HPk. 6.20.94 and R. 116 is really a Dohaka, for which see Ck. 21 and Kd. 2.15.

78 : Our Vanafullandhaya is the same as Navapuspandhaya of HPk. 6.19.40 and R. 117.

78.1 : 'Let him who wants to run away, retire from Dhanañjaya who is difficult to conquer in a fight, in this army of the enemy; I alone shall

not turn back from him.' The theme is the Mahābhārata war. This is perhaps said by Karṇa.

80 : Kinnaramadhuravilāsa of Svayambhū and R. 119 is called Kinnaramithunavilāsa by Hemacandra at HPk. 6.19.41.

82 : Vidyādhara-lalitā of Svayambhū and R. 120 is the same as Hemacandra's Vidyādhara-lilā at HPk. 6.19.42.

86 : The Pāda of 11 Mātrās may be composed either with a Ṣaṇmātra and a Pañcamātra, or a Pañcamātra, a Caturmātra and a Dvimātra, or a Caturmātra, a Trimātra and a Caturmātra.

87.1 : 'When Droṇa was crowned as the Commander-in-chief, both the armies, having raised their different banners and being filled with martial spirit, kept themselves in readiness (for fighting).' This is also ascribed to Caturmukha and is from a poem on the theme of the Mahābhārata war.

90.1 : 'On hearing the sound of the (hoofs of the) horses, the eyes of the she-boars repeatedly turned towards the pair of fangs of their lord.' They were so confident of the protection which they expected to get from their lord with powerful fangs.

This stanza is quoted as an illustration of *chalika*, in the *Sarasvatī-kanthābharāṇa*, II. 392. *bhūṇḍa* or *bhūṇḍaa* is a 'boar'; *bhūṇḍaanī* is a she-boar. The male leader of the flock of the she-boars was walking stately in front of them and his mates were casting their glances of love and pride for the valour of their lord. *Chalika* expresses a mixture of the sentiments of love and heroism. For attempts at the interpretation of the stanza, see Pischel, *Materiaden zur Kenntniss der Apabhramśa*; p. 38; Alsdorf, *Apabhramśa Studien*, p. 93; also see Bhayani, *Bhāratiya Vidyā*, 1945, p. 14, for its correct interpretation.

94 : Our Suraālingana is the same as Sutaāligana of HPk. 6.20.103 and R. 132.

96 : Perhaps read *bhavaṇe* for *bharāṇe*, in view of HPk. 6.20.104. R. 134 calls it merely Kaṅkellilatā. Our ms. often confuses *ra* and *va*.

97 : The Pāda of 12 Mātrās is made either with a Ṣaṇmātra, a Caturmātra and a Dvimātra, or two Pañcamātras and a Dvimātra, or a Caturmātra, a Pañcamātra and a Trimātra, or three Caturmātras.

100.1 : 'In a battle the path of fighting is not abandoned ; who can turn back from it while he is alive ?' What is to be done with a mere post

at the threshing floor, which slaughters unskilful good warriors ?' The full meaning is not clear.

104: Our Kaṅkaṇahastaka is the same as Kāminikaṅkaṇahastaka of HPk. 6.19.52; R. 144.

106: A Pāda of 13 Mātrās is composed with a Pañcamātra, a Ṣaṇmātra and a Dvimātra, or, two Pañcamātras and a Trimātra, or, two Caturmātras and a Pañcamātra.

107: Our Varatīlaka is the same as Mukhapālanatīlaka of HPk. 6.19.53 and R. 147.

112: Our Āraṅgaka (or Āraṅgaḍa) is the same as Ohullaṅaka or Vāraṅgaḍī of HPk. 6.20.111 and R. 152.

113: A Pāda of 14 Mātrās is composed either with a Ṣaṇmātra, a Pañcamātra and a Trimātra, or two Pañcamātras and a Caturmātra, or three Caturmātras and a Dvimātra.

116: A Pāda of 15 Mātrās is composed either with a Ṣaṇmātra, a Pañcamātra and a Caturmātra, or, two Caturmātras, a Pañcamātra and a Dvimātra, or three Pañcamātras.

118: A Pāda of 16 Mātrās is composed with either two Ṣaṇmātras and a Caturmātra, or four Caturmātras.

119: A Pāda of 17 Mātrās is composed either with two Ṣaṇmātrās and a Pañcamātra, or three Caturmātras and a Pañcamātra.

120: The stanza gives the total number of the Antarasamā Catuspadīs, namely, 110. Of these some are called Vastukas and the others Dhruvakas. See above vv. 59-60 and note.

121: Before proceeding to define the Ardhasamā Catuspadī, Svayambhū defines an Ardhasamā Saṁkīrṇā Catuspadī; it has its 1st and 2nd as also 3rd and 4th Pādas equal and similar. What is meant is possibly that a Saṁkīrṇaka Ardhasamā may have the Pādas in its halves of any length containing from 7 to 17 Mātrās without any restriction. But I am unable to understand why a Saṁkīrṇa Ardhasamā should be only of eight kinds. Perhaps, in view of v. 122, Svayambhū intends to define here an Ardhasamā Saṁkīrṇaka Dhruvaka alone and not a Vastuka; so that the Pādas of two halves may contain only from 10-17 Mātrās in them, thus they can be only of eight kinds. For a Dhruvaka see above v. 60. A Dhruvaka according to v. 60 must not have less than 10 Mātrās in any of its Pādas and also not more than 17. Hemacandra's Saṁkīrṇa Catuspadī, defined at HPk. 6.21 is quite

different, though it entirely agrees with the one defined at R. 164. In it a mixture of any four Pādas containing from 7 to 17 Mātrās is permitted. It is not necessarily Ardhasamā or Antarasamā.

121.1: The stanza seems to be a popular Subhāṣita; it is quoted by Hemacandra at *HPk.* 6.21 (v. 118) and R. 164. But Hemacandra's readings in the 3rd and the 4th lines are different from those of Svayambhū, who considers it to be an Ardhasama Saṁkīrṇaka Dhruvaka as suggested above in my note on 121. Consequently Svayambhū's stanza contains 15 Mātrās in the first two lines and 13 in the last two; but the Pādas in Hemacandra's stanza respectively contain 15, 14, 16 and 13 Mātrās, thus making it a real Saṁkīrṇaka containing the Lakṣaṇas of four different Pādas of four different kinds of Catuspadī (or of three different kinds if the fourth Pāda is supposed to contain 14 Mātrās, the final short being equal to a long one as in the 2nd and the 3rd Pādas). According to Rājaśekhara's readings the stanza contains 15, 14, 15 and 13 Mātrās in its four Pādas respectively. Only here and in R. 163 Rājaśekhara quotes a Prākṛit stanza for an illustration.

'(Though both of them are) whispering, harsh, piercing, devoid of merit (released from the bowstring) and killing, yet arrows do not have as much power over good men as the villains have.'

122: This stanza gives the definition of Ardhasamā Catuspadī. Its first and the second, as also the third and the fourth Pādas are equal and similar, with the result that its halves are not equal and similar as in the case of an Antarasamā.

122.1: This is an illustration of an Ardhasamā Catuspadī whose first half has two lines of 15 Mātrās each and the second half has two lines of 16 Mātrās each. Its name is the same as that of the Antarasamā Catuspadī which has 15 in its odd and 16 in its even Pādas, viz., Mukhapaṇkti, for which see above v. 114. The same is quoted by Rājaśekhara at R. 163 and Hemacandra at *HPk.* 6.20.116. In the second line we have to read *ṇaravai* instead of *ṇavara*. The stanza is from a poem on the topic of the Mahābhārata war.

123-124: These two stanzas define the two Sarvasamā Catuspadīs having 10 and 11 Mātrās in each of their four Pādas. They are Śaśivadanā (Śaśāṅkavadanā of *HPk.* 6.24) and Mānakṛti (Mārakṛti of *HPk.* 6.25). See also R. 165-166.

124.1 : 'Saṅkha is seen at a distance ; (but) Hanumān is not seen. It is also seen how that matchless chariot-fighter is entering the battle-array.' This is evidently from a poem on the story of the Rāmāyaṇa.

125-129 : These five stanzas define the five Sarvasamā Catuspadīs which respectively contain 12, 13, 14, 15 and 16 Mātrās in each of their four Pādas. In v. 129 Svayambhū defines three different metres of 16 Mātrās in their Pādas : they are Pādākulaka, Saṅkulaka and Paddhatikā. In a Pādākulaka the 16 Mātrās may be made up in any way; in Saṅkulaka we must have a Ṣaṇmātra, a Caturmātra and a Ṣaṇmātra, while in a Paddhatikā, we should have four Caturmatrās alone. For these three metres see R. 171-173 ; for others see R. 167-170. Also HPk. 6.26-30 ; Hemacandra mentions Pādākulaka under the Sanskrit Mātrā Vṛttas at H. 3.70 and Saṅkulaka at HPk. 5.28 commentary, including it under Vadanaka. His words *kecit* here obviously refer to Rājaśekhara and Svayambhū.

130 : This stanza defines the Sarvasamā Catuspadī called Upavadanaka whose Pādas contain 17 Mātrās each. This is also defined earlier at Sb. 4.12 above. At HPk. 6.31 Hemacandra defines a metre called Ragaḍā Dhruvaka which too has 17 Mātrās in its Pādas ; but they are made up by a Ṣaṇmātra, two Caturmātras and a Trimātra ; or by three Caturmātras and a Pañcamātra. This wholly agrees with R. 174. Svayambhū adopts the first of these alternatives for his Upavadana, but gives other two as a Caturmātra, a Trimātra, a Dvimātra, a Pañcamātra and a Trimātra, or Three Pañcamātras and a Dvimātra ; but he does not mention the name Ragaḍā Dhruvaka for the metre.

The Sarvasamā Catuspadīs defined here in this chapter are of the Dhruvaka type, i.e., containing from 10 to 17 Mātrās in their Pādas ; see above v. 60, and Introduction parās 15-16.

131 : So far Ṣaṭpadīs and Catuspadīs are treated ; now the Dvipadīs shall be defined hereafter. This stanza looks like an opening of a new chapter treating of the Dvipadīs ; v. 173 too mentions only the Dvipadī and not also the Catuspadī. But a stanza marking the conclusion of a topic (and so a chapter) is not found before this one and therefore I have not started a new chapter here, though there are indications of this as shown above. It is quite possible that our ms. may have dropped it through oversight or through some other reasons, just as the palm-leaf ms. drops it in ch. 8 of Sb. (See f.n. on p. 101).

- 132-172 : Sama Dvipadīs of different length, beginning with a Pāda of 28 Mātrās are defined in these Stanzas. It is worth noting that the Dvipadīs of the same length are distinguished from one another and get different names owing to the different Yati, which generally occurs twice in the longer lines. For all these see *HPk.* 7.4-57 and *R.* 176-223. For Ullālas which only Hemacandra (and following him, the author of the *Kavidarpaṇa*) defines at *HPk.* 7.2-3, see *Kavidarpaṇa* Introduction paras 7-8 and note on *Kd.* 2.2-3 (p. 130-131).
- 142 : The line contains 2 Mātrās less than are needed and does not also contain the name of the metre as in the other cases. Perhaps we should read *pavirāmā sihā* for *pavirāmiā*.
- 146 : The latter part of the line is not clear ; it corresponds to *HPk.* 7.21 and *R.* 190. It should mean that if instead of 8 Caturmātras the Pādas of Skandhakasama, Mauktikadāma, and Navakadalipatra are made with a Ṣaṇmatra, 6 Caturmātras and a Dvimātra, they should be known by the feminine forms of their names.

VII. ŚEṢA-DVIPADYAH

Please note that the correct title of the chapter is Śeṣa-Dvipadyah and not Śeṣa-Catuṣpadyah.

- 1 : '(A Dvipadī i.e. any one of those defined in 6.132-172 above) is composed (and employed) as a Dhruvaka for the purposes of making a request, (a summary of) a topic in hand, an auspicious benediction and a review of the past episodes.' In all other cases, all the Dvipadīs are called as such.' A Sanskrit version of this direction in an Anuṣṭubh Śloka is given by Hemacandra at *HPk.* 7.57 com., and in an Āryā stanza by Rājaśekhara at *R.* 225. The latter is clearly a close translation of Svayambhū's stanza. The meaning of these directions seems to be that the longer Dvipadīs having from 27 to 42 Mātrās in their Pādas are to be given the name Dhruvā, when they are employed for the purposes mentioned in the stanza, while the shorter ones should be called merely by the name Dvipadī. See above on *Sb.* 6.59-60.
- 2 : These same Dvipadīs are also found (to contain) from 4 to 30 (Mātrās), are possessed of two Pādas and contain a rhyme extending over one or more letters at the end (of the Pādas). *R.* 226 is again a close translation in Sanskrit of our stanza, while *HPk.* 7.72 is a Sanskrit version of it introduced by the words *yadāha*, showing that it is a quotation from some author.

3-12: These stanzas contain the definitions and names of only ten Dvipādīs which have from 4 to 10 Mātrās in each of their two Pādas. Of these ten, those that have 7 Mātrās are two, those that have 8 are three; all the others are of one kind each. In v. 9, Hemacandra at *IIPk.* 7.64 reads *karimakarabhujā* in place of our *kira macarabhujā*; but *R.* 233 follows Svayambhū and calls the metre by the name Makarabhujā. To these ten Hemacandra at *HPk.* 7.63-72 adds six more; 2 of eight Mātrās called Vasudvipadī and Candralekhā, and 1 of nine Mātrās called Lavalī; 2 of ten Mātrās called Amarapurāsundarī and Kāñcanalekhā and 1 more of 12 Mātrās called Puṣpamālā. On the other hand, Svayambhū's Maṅgalāvatī (v. 8) is called Madanavilasitā and his Lalataka (v. 12) is called Cāru by Hemacandra. Rājasekhara mentions all the three kinds of a Dvipadī of 8 Mātrās like Hemacandra, as also the two kinds of that of the 9 Mātrās; but he does not mention any one which contains either 10 or 12 Mātrās in its Pādas. He defines all the others defined by Svayambhū, except the Malayavikasitā (v. 10) of eight Mātrās which is neglected by both Hemacandra and Rājasekhara.

VIII. UTTHAKADAYAH

This chapter defines few more Apabhramśa metres; they are Utthakka, Madanāvatāra, Dhruvaka, seven kinds of Chaḍḍanikā, three kinds of Ghattā, Paddhatikā and Rāsa. The wording of stanza 1 is not very clear, yet the composition of the line is pretty clear. Each Pāda has three Pañcamātras followed by a Dvimātra, and all the Pādas have a common rhyme. See *HPk.* 5.31: the metre is not defined by any other prosodist so far as I know. It is a Sama Catuṣpadī.

1.1: The first two lines of the stanza refer to Duśśāsana, son of Dhṛtarāṣṭra; but the meaning is not clear.

2: 'There are four Pañcamātras in the Madanāvatāra.' This metre is defined by Hemacandra at *HPk.* 4.75 as the last one among the Khañjakas; it is difficult to see why Svayambhū has separated it from them and mentioned it separately here. Hemacandra gives at the same place the five derivatives of this metre, obtained by adding in succession 1 to 5 Pañcamātras to each Pāda. Like the Utthakka the Madanāvatāra too is a Sama Catuṣpadī; it is called by another name, viz., Kāminīmohana, when all the Pañcamātras are of the Mādhyalaghu type (i.e., Raganās), at *Ck.* 10. On the other hand, Nanditādhyā, whose definition is similar to that of Svayambhū, calls it at *N.* 76,

Candrānana. Virahāṅka does not mention it, though Nanditādhya seems to have quoted him, as is apparent from the wording of v. 76 and v. 77 which is identical with Vjs. 1.17. See also Kd. 2.22.

2.1: The stanza is from Svayambhū's *Paumacariu*; see P. C. 24.2.1-2; Intro. p. 128.

3: 'In a Dhruvaka, both are Caturmātra Gaṇas with a single Mātra added (at the end of the Pāda).' Each of its four Pādas has thus 9 Mātrās. This Metre is defined by Hemacandra at the beginning of the Sarvasama Catuspadīs at HPk. 6.23. Svayambhū could not define it before Śaśivadanā at 6.123 above, because there he was defining only the Dhruvaka Catuspadīs and ours is a Vastuka Catuspadī; see on 6.130 above.

3.1: 'The cub of a lion has stood in the midst of the elephants after straying away in the forest.' The stanza occurs at Svayambhū's *Paumacariu* 33.3.9 with the readings *vārantaho* for *vāraṇaho* and *risisīhakisora va* for *sīhakisora* *thiu*.

4: The stanza enumerates the different kinds of metres which may appear at the beginning of a Sandhi as said in v. 20 below. These are Chaḍḍanikā of seven kinds, Ghattā of three kinds, and Paddhatikā as also Gīti of various kinds.

5-11: The seven kinds of a Chaḍḍanikā are defined in these stanzas each being followed by an illustration. Among these seven, the 1st, 2nd, 3rd, 4th and 6th are Ardhasama Catuspadīs, having in their odd and even Pādas 14 and 12, 10 and 13, 16 and 9, 12 and 9, and 8 and 10 Mātrās respectively. The 5th is a Viṣamā Catuspadī, whose first three Pādas have 2 Ṣaṇmātras each, while the fourth has one more Mātrā in it. The 7th or the last of the Chaḍḍanikās is a Ṣaṭpadī whose halves contain 3 lines of 10, 8 and 13 Mātrās each. Sometimes, however, the first line in each half contains 12 instead of 10 Mātrās in it.

5.1: This is from a poem on the Mahābhārata story. 'Having fought for 17 days, the lord of the Kurus stood concealed in the great lake, remaining quiet after stopping the (action of the) water.'

6.1: The meaning is not clear.

7.1: 'Even though you do not take pity (on suffering creatures), still oh fool, do not forget the great Jina in your mind even for a moment.' The first line is not clear.

8.1: 'Many non-believers have fallen at your feet; (now) you yourself protect me, your own servant, as best as you can.'

- 9.1: This is from Svayambhū's own *Paumacariu* 3.1. See P.C. Intro. p. 128.
- 10.1: This seems like a proverb the meaning of which is not clear.
- 11.1: This is the same as Svayambhū's *Paumacariu* 31.1.1.
- 11.2: 'He made the formidable kings submissive after overthrowing all enemies and adorning the world with his fame.' The second half is not clear.
- 11.3: 'A person born with merit and possessed of virtues possesses the white umbrella of the three worlds (i.e., rules over them), which is inherited by him, being seated on the throne.'
- 12-14: These stanzas define the three Ghattās, of which the first is an Ardhasama Catuṣpadī containing 9 and 14 Mātrās in its odd and even Pādas; the second is a Saravasamā Catuṣpadī whose Pādas have 12 Mātrās each; while the third too is a Sarvasamā Catuṣpadī whose Pādas have four Caturmātras each, all of which are Ādigurus.
- 12.1: 'Having devoured Khara and Dūṣaṇa, the goddess of War was not satisfied; it seemed as if at the time of his destruction, she ran at and attacked Rāvaṇa.' The stanza is the same as Svayambhū's *Paumacariu* 41.1, with a different reading in the 2nd line. See P. C. Intro. p. 128.
- 13.1: 'Then Gautama Svāmin said: Oh Śreṇika, hear (from me) the origin of the Rākṣasa and Vānara Families which have received praise in the three worlds.' The stanza is the same as Svayambhū's *Paumacariu* 5.1. See P.C. Intro. p. 128.
- 14.1: 'Having assumed the form of a dwarf, Mādhava came as an ascetic reciting the Vedas; after taking three steps that demon of dark complexion called Bali was imprisoned by him.'
- 15: This stanza defines a Paddhatikā: 'Those again who compose a Paddhatikā put 16 Mātrās in each Pāda; they make a rhymed couplet with two Pādas each and produce a Kaṣavaka with eight such couplets.' The directions in the second half of the stanza are very important as they show the practice of the Apabhraṃśa poets according to which a Kaṣavaka is made of eight couplets, though in theory it consists of four stanzas in the Paddhatikā metre as *HPk.* 6.30, *Kd.* 2.37 prescribe. The result of this practice is that a Kaṣavaka came to be regarded as made up of couplets rather than of stanzas of four lines as the theory requires. So that sometimes a Kaṣavaka may contain a couplet or two more than the required number, viz., eight. In

short the unit of a Kaḍavaka is a couplet and not a quartet. See *Kd.* Introd. para 14 (p. XX).

16: 'They call it a Ghattā, on the one hand, at the beginning (of a Sandhi), and describe it as a Chaddanikā when it has a rhyme at the end. You too should compose your Sandhi in various ways with Kaḍavakas arranged in proper manner.' The meaning of the word *Jamaāvasāna* is not very clear; but see v. 20 below. The Commentator of *Kd.* 2.30.6 mentions the 'end' of a Kaḍavaka and this seems to be correct. See also *HPk.* 6.3 com. According to this last a Ṣatpadī or a Catuṣpadī is called a Chaddanikā when it stands at the end of a Kaḍavaka briefly summarizing what has been said so far. Hemacandra, however, defines a Dvipadī of 31 Mātrās in each of its two Pādas having a double Yati after the 10th and the 18th Mātrās at *HPk.* 7.17 and gives it the specific name Chaddanikā.

17-18: 'Call all these (metres) Chaddanikās or Ghattās of various kinds when they are composed at the beginning or at the end of a Sandhi. There are other Ghattās, Chaddanikās and Vidārikās of various kinds. They are composed by the people on hearing them; who can know these as well as the many different kinds of Dhavalas which were composed by Sālāhaṇa?'

19: 'Thus are all these composed in this way; all of them are fashionable (*nāgarika*). They are well known among the people and employed by learned men.'

The popularity of the Chaddanikās, Ghattās and Vidārīs used in the composition of Apabhraṁśa poetry is quite evident from these stanzas. The Dhavalas of Sālāhaṇa are specially mentioned here; but unfortunately none of them are available at present. For the Dhavalas see above *Sb.* 4.16-19. The Vidārī which is mentioned in v. 17 seems to be a general term like the words Dhavala, Ghattā, Chaddanikā and Maṅgala etc., and is alluded to by Virahāṅka, at *Vjs.* 2.5 and also by *Jānāśrayī* at 6.65. It is defined by the latter at *Jns.* 6.66 as a Mātrā Vṛtta of four Pādas, each having 14 Mātrās, the last two covered by a long letter, generally also the 5th and the 6th, while the 11th and the 12th are represented by short letters. See also v. 28 below.

20: 'At the beginning of a Sandhi (are employed) a Ghattā, a Dvipadī, a Gāthā, an Aḍillā, a Mātrā, or a Paddhatikā, while the Chaddanika is (found) at the end of it.'

- 20.1 : This illustrates a Ghattā which is really an Ardhasama Catuspadī with 14 and 12 Mātrās in its odd and even Pādas. Svayambhū has called it Chaddanikā at Sb. 8.5 above. 'Having offered water with red lotuses to the five jinas, destroy your (cycle of) birth and death all at once, by striking at the eightfold (Karman).'
- 20.2 : This is a Dvipadī with four Pādas each containing 28 Mātrās, standing at the commencement of a Sandhi in some poem. The last two lines are in Sanskrit. Svayambhū's definition of Dvipadī is lost on the missing folios 9 and 10 of the palm manuscript of the Pūrvabhāga. See p. 110 below.
- 20.3 : This is a Gāthā, also quoted from some poem where it stands at the commencement of a Sandhi. 'We have pushed ourselves at the lotus-like feet of yours, oh Jina, when we are tortured by misfortunes ; now you should do what you think fit.'
- 20.4 : 'Oh pious man, a black bee is pleased whether it is an Arka or a Bilva, a Palāśa or an Aṭarūṣa plant (which gives it its honey) ; so, that god who may give me highest delight, may he be either the Buddha, or Āditya, Brahman, or Hari or even Śaṅkara.' (I do not care for the name with which this god is called as long as He removes my miseries.) The metre is Adilla for which see above Sb. 4.12. The two halves have two different rhymes.
- 20.5 : This is a Mātrā, probably also quoted from some work where it is used as Ghattā at the beginning of a Sandhi. 'Be victorious, oh best Jina, you who are spotless, honoured by gods, free from fear, devoid of (the feelings of) Love, Anger, Pride and Infatuation, Chastiser of the god of love, and free from the bonds of transmigration. All objects of enjoyment are centred in you, oh God.' This is a regular type of Mātrā having 16 Mātrās in its odd Pādas and 12 Mātrās in the even ones. See Sb. 4.8 above.
- 20.6-9 : These stanzas illustrate a Paddhatikā as well as a Kaḍavaka, which is made of four Paddhatikās. See above v. 15. The Kaḍavaka is in praise of the greatness of Jina's name. In v. 8c read *khaahi* for *khahi* for correcting the metre and in 9b, the letter *va* before the conjunct *lla* has no Gurutva.
- 20.10 : This is a Chaddanikā which is defined above in v. 11. This too is in praise of Jina's name.
- 21-23 : These stanzas define what is called a Tāla, which is defined by Svayambhū as a poem which is sung to the accompaniment of vocal

and instrumental music and also acting. A single stanza thus sung is called merely a Tāla. A pair of them is called a Yugala, a group of three a Tritāla, that of four a Cakkalaka, that of five a Pañcatāla, that of seven a Saptatāla, while groups of six, eight etc., are called Kulakas. The word *rūpa* in the stanza. (as in *SbP.* 6.2) means an individual metre or stanza.

24: 'A Rāsa composition made up of Ghattās, Chaddanikās, Paddhatikās or (other) well-worded individual metres in Poetry becomes extremely pleasing to the minds of the people.' See also v. 26 below, according to which all Mātrā Vṛttas or for that matter even the Vārṇa Vṛttas, may be used for the composition of a Rāsa. It is not very clear whether the Tāla and the Rāsa Kavyas are two different varieties or are one and the same. I am inclined to believe that they are identical and that the Rāsas may be either Yugala, Tritāla, Pañcatāla, or Saptatāla etc. This kind of a lyric composed in Prākṛit or Apabhraṁśa language is also defined by Virahāṅka at *Vjs.* 4.37-38. The wording of the latter stanza, i.e., 38, is very similar to that of ours.

25: The term Rāsa used of a group of stanzas in different metres reminds Svayambhū of an individual metre called Rāsa which has 21 Mātrās in each of its four Pādas. The Yati in each Pāda is after the 14th Mātrā and the last three Mātrās are represented by three short letters. It is possible to maintain that the name Rāsa was transferred from the group to the individuals comprising the group as in the case of the name Dvipadī; see my remarks in para 5 in the introduction to *Vṛttajāṭisamuccaya* (new edition in Rājasthān series), p. vi. This was perhaps the most popular metre employed for lyric poetry in the Apabhraṁśa language, though every metre which is used for the composition of a Rāsa Kāvya is called Rāsaka according to *HPk.* 5.3 com., where, by the bye, Svayambhū's stanza (v. 26 below) is actually quoted without mentioning his name. Hemacandra gives several such Rāsakas at *HPk.* 5.3-15. This Rāsaka of 21 Mātrās is called Ābhāṇaka by Ratnaśekhara at *Ck.* 17. Rāsaka of *Kd.* 2.23 is similar but has 23 Mātrās in each Pāda.

25.1: This is in praise of Jina; lines 3 and 4 are corrupt.

25.2: This is an important stanza in which the words *morī* and *ava hamsa* appear to be used punningly. Really the two, i.e. pea-hen and swan, do not play together; for the one rejoices at the appearance of the clouds, while the other shuns it.

The Stanza is perhaps Svayambhū's own composition, and refers to one of his Apabhramśa poems.

- 26: 'All the Jātis (kinds of metres) are employed here in view of their structure. The composition of a Rāsa is indeed an elixir among assemblies of men.' The stanza is bodily quoted by Hemacandra at HPk. 5.3 com. and by the commentator of the *Kavidarpaṇa* on Kd. 2.23. See above on v. 24.
- 27: Another Rāsa, an individual metre of the Ardhasama Catuṣpadī type so called, is here defined by Svayambhū; its odd and even Pādas contain respectively 7 and 13 Mātrās. See Kd. 2.14 and HPk. 5.16; the same metre is defined under the name of Rāvaṇamastaka at HPk. 6.19.9 and R. 47 and also by Svayambhū at Sb. 6.13 above. One more individual Rāsa with 16 Mātrās in each of its four Pādas is defined by Virahāṅka at Vjs. 4.85.
- 28: Here again we have some directions about the relationship between a Kaḍavaka, a Vidāri and Tāla; but unfortunately I have no clear idea as to what exactly is meant.
- 29: 'Those Jātis which are employed in praising the deities in the Apabhramśa language are also called Phulladakas'. See HPk. 5.41.
- 30: 'These same are described as Maṅgalas when they are composed for the auspicious occasion of marriage etc. Wise men honour them owing to their many different structures on all (auspicious) occasions.' See above Sb. 4.20-21 where an individual metre having the name Maṅgala is defined and the directions given in the present stanza are also stated, along with those about the Dhavalas. Here they seem to have been repeated for the specific purpose which is given in the next stanza (v. 31). See HPk. 5.39-40.
- 31: 'There may not exist in them purity in the matter of a Yamaka, or of the metrical form, or of its usual characteristics; and yet they are appreciated by clever men.' See Intro. para 20, f. n. 24.
- 32: This stanza does not occur in the palm leaf ms.; it is found only in the Baroda paper ms. The palm leaf ms., however, often contains this stanza which is used by the author to mark the end of a topic; see SbPb. 2.5; 3.13 and 5.7. I have marked the chapters both in the Sb. and SbPb. on the basis of this stanza and numbered them accordingly.

The colophon at the end of the work is found only in the palm leaf ms. It calls the work by the name *Sambhu* (a corrupt form of of the name Saambhū) and describes the author as *Kairāa* (Kavirāja).

APPENDIX I

Concordance of Svayambhūchandas and Chandaḥśekhara Ch. V.

I have published Rājaśekhara's *Chandaḥśekhara* Ch. V. on pp. 129 ff. On a closer examination of this chapter of the work—which alone is available at present—one can easily see how Rājaśekhara has often given a mere Sanskrit version of the corresponding Prakrit stanzas in *Svayambhūchandas*. I give below a concordance of the two works. R = *Chandaḥśekhara* Ch. V., Sb. = *Svayambhūchandas*, Ch. 1-8; SbP. *Svayambhūchandas-Pūrvabhāga* Ch. 1-6 (pp. 103-127).

R.	Sbp.	R.	Sb.
1-2	4:1-2	58-77	6:23-41
5	4:4	78-95	6:42-58
		96-111	6:59-73

37-57	6:2-22	233-235	7:9-11

APPENDIX II

Concordance (Svayambhūchandas)

I had published the *Svayambhūchandas* partly in the Journal BBRAS, Bombay 1935 (Chs. I-III) and partly in the Journal of the University of Bombay, Sept. 1936 (Chs. IV-VIII). The system of numbering the stanzas which was adopted by me there is different from the one employed here. So to avoid confusion in reference I give below a concordance of the two editions.

1st ed.	2nd ed.	1st ed.	2nd ed.
Ch. I			
1-2	1-1.1	61 (2nd)-62 =	30-30.1
3-4	2-2.1	63-64	31-31.1
5-6-7	3-3.1-3.2	65-66	32-32.1
8-9-10	4-4.1-4.2	67-68	33-33.1
11-12	5-5.1	69-70	34-34.1
13-14	6-6.1	71-72	35-35.1
15-16	7-7.1	73-74	36-36.1
17-18	8-8.1	75-76	37-37.1
19-20	9-9.1	77-78	38-38.1
21-22	10-10.1	79-80	39-39.1
23-24	11-11.1	81-82	40-40.1
25-26	12-12.1	83-84	41-41.1
27-28	13-13.1	85-86	42-42.1
29-30	14-14.1	87-88	43-43.1
31-32	15-15.1	89-90	44-44.1
33-34	16-16.1	91-92	45-45.1

APPENDIX III

Svayambhūcchandās and other works

(A concordance)

This concordance is not meant to be exhaustive; only a few cases of reproduction or striking similarity are put down here as they were casually noticed. For most of these I am indebted to Dr. Bhayani. The following abbreviations are used :—

- कवि = कविदर्पण. Published in the Rajasthan Granthamālā, 1962.
 गाथा = गाथासप्तशती. N. S. P. edition (Kāvya-mālā 21), 1933.
 छन्दो = छन्दोनुशासन of हेमचंद्र. Published in the Singhi Jain Series, 1961.
 नन्दि = नन्दिताव्य's गाथालक्षण. Published as Appendix I in कविदर्पण. See above.
 पउम = पउमचरित of स्वयम्भू. Published in the Singhi Jain Series, 1953, 1961.
 पञ्च = पञ्चरात्र of भास in भासनाटकचक्रम्. Published by Oriental Book Agency, Poona 1937.
 पर = परमात्मप्रकाश of योगीन्दु. Published in the Raichandra Jain Shāstramālā Bombay, 1937.
 भामह = भामह's काव्यालंकार. Published as an Appendix in Bombay Sanskrit Series Bombay 1909 : Also in the Kashi S. Series, 1928.
 रत्ना = रत्नावली नाटिका of श्रीहर्ष. N. S. P. edition, 1913.
 रिद्ध = रिद्धनेमिचरित of स्वयम्भू. Unpublished.
 वज्रा = वज्रालङ्कार. Published in Bibliotheca Indica, 1923.
 सद्भुक्ति = सद्भुक्तिकर्णामृत. Published in Bibliotheca Indica, 1912.
 सूर्य = सूर्यशतक of मयूर. Published in Kāvya-mālā, Bombay, 1889.
 सेतु = सेतुबन्ध of प्रवरसेन. Published in Kāvya-mālā, Bombay, 1895.
 सिद्ध = सिद्धहेम (प्राकृताध्याय). Published by B. O. R.I., Poona, 1958.
 सरस्वती = सरस्वतीकण्ठाभरण. Published in Kāvya-mālā, 1934.
